## **3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

The following significant accounting policies have been adopted by the Company in the preparation of the financial statements for Quarter IV of 2024.

### **Accounting estimates**

The preparation of the financial statements for Quarter IV of 2024 in accordance with Vietnamese Accounting Standards, the Vietnamese Accounting System for enterprises and the relevant statutory requirements applicable to Quarter IV financial reporting requires the Board of General Directors to make estimates and assumptions that affect the reported amounts of assets, liabilities and disclosures of contingent assets and liabilities at the date of the financial statements for Quarter IV of 2024 and the reported amounts of revenues and expenses during the period. Although these accounting estimates are based on the Board of General Directors' best knowledge, actual results may differ from those estimates and assumptions.

### **Cash and cash equivalents**

Cash comprises cash balances, call deposits and short-term investments which are highly liquid, readily convertible to known amounts of cash and subject to an insignificant risk of changes in value.

**Investments**

***Held-to-maturity investments***

Held-to-maturity investments are those that the Company has the intention and ability to hold until maturity. Held-to-maturity investments include term deposits for the purpose of earning interest periodically.

***Investments in joint ventures***

A joint venture is a contractual arrangement whereby the Company and other parties undertake an economic activity that is subject to joint control, i.e., the strategic financial and operating policy decisions relating to the activities of the joint ventures require the unanimous consent of the parties sharing control.

Where a group entity undertakes its activities under joint venture arrangements directly, the share of jointly controlled assets and any liabilities incurred jointly with other ventures are recognized in the financial statements of relevant entities and classified according to their nature. Liabilities and expenses incurred directly in respect of interests in jointly controlled assets are accounted for on an accrual basis. Income from the sale or use of the Company's share of the output of jointly controlled assets, and its share of joint venture expenses, are recognized when it is probable that the economic benefits associated with the transactions will flow to/from the Company and their amount can be measured reliably.

Joint venture arrangements that involve the establishment of a separate entity in which each venturer has an interest are referred to as jointly controlled entities.

***Investments in associates***

An associate is an entity over which the Company has significant influence and that is neither a subsidiary nor a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but not control or joint control over those policies.

Investments in joint ventures and associates are initially recognised at cost. The Company records its income in the statement of income from the accumulated net profit of the investee arising after the investment date. Other amounts received by the Company in addition to the distributed profits are considered as a recovery of investments and are recognised as a deduction from the cost of investment.

Investments in joint ventures and associates are carried in the balance sheet at cost less allowance for impairment of such investment (if any). Allowance for impairment of investments joint ventures and associates is made in accordance with Circular No. 228/2009/TT-BTC dated 7 December 2009 of the Ministry of Finance guiding the appropriation and use of allowance for devaluation of inventories, loss of financial investments, bad debts and warranty for products, goods and construction works at enterprises, Circular No. 89/2013/TT-BTC dated 28 June 2013 of the Ministry of Finance on amendments of and supplements to Circular No. 228/2009/TT-BTC and other prevailing regulations.

***Equity investments in other entities***

Equity investments in other entities represent the Company's investments in equity instruments of the entities over which the Company has no control, joint control, or significant influence.

Equity investments in other entities are carried at cost less allowance for impairment

**Accounts receivable**

Accounts receivable represent the amounts recoverable from customers or other debtors. Accounts receivable are stated at book value less allowance for doubtful debts.

Allowance for doubtful debts is made for receivables that are overdue for six months or more, or when the debtor is in dissolution, in bankruptcy, or is experiencing similar difficulties and so may be unable to repay the debt.

**Inventories**

Inventories are stated at the lower of cost and net realisable value. Cost comprises direct materials and where applicable, direct labor costs and those overheads that have been incurred in bringing the inventories to their present location and condition. Cost of inventories is determined on a weighted average basis. Net realisable value represents the estimated selling price less all estimated costs of completion and costs to be incurred in marketing, selling, and distribution.

The assessment of necessary provision for inventory devaluation follows the prevailing accounting regulations, which allow provisions to be made for obsolete, damaged, or sub-standard inventories and for those which have costs higher than net realisable values as at the balance sheet date.

**Tangible fixed assets and depreciation**

Tangible fixed assets are stated at cost less accumulated depreciation.

Tangible fixed assets are depreciated using the straight-line method over the following estimated useful lives:

	<b>From 01/10/2024 to 31/12/2024</b>
	<b>(years)</b>
Buildings and structures	5 - 30
Plant and equipment	5 - 10
Motor vehicles	6 - 10
Office equipment	3 - 6
Other assets	3 - 6

Loss or gain resulting from sales and disposals of tangible fixed assets is the difference between profit from sales or disposals of assets and their residual values and is recognised in the statement of income.

**Leases**

Leases where the rewards and risks of ownership of assets substantially remain with the leasing company are accounted for as operating leases. Operating lease expenses are recognised in the statement of income on a straight-line basis over the term of the relevant lease. Benefits received and receivable as an incentive to enter into an operating lease are also recognised on a straight-line basis over the lease term.

Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs are recognised on a straight-line basis over the lease term.

### **Investment properties**

Investment properties comprise buildings and structures held by the Company to earn rentals. Investment properties held to earn rentals are stated at cost less accumulated depreciation. The costs of purchased investment properties comprise their purchase prices and any directly attributable expenditures, such as professional fees for legal services, property transfer taxes and other related transaction costs. The costs of self-constructed investment properties are the finally accounted construction or directly attributable costs of the properties.

Investment properties held to earn rentals are depreciated using the straight-line method over their estimated useful lives of 30 years.

### **Prepaid expenses**

Prepaid expenses are expenses which have already been paid but relate to results of operations of multiple accounting periods. Prepaid expenses include business advantages and other prepaid expenses.

Value of business advantage reflects the business advantage arising when determining the enterprise value for the equitisation purpose. This business advantage will be allocated for a period of 5 years to operating expenses when the Company officially operates in the form of a joint stock company.

Other prepaid expenses comprise costs of insignificant tools, supplies and spare parts issued for consumption and are expected to provide future economic benefits to the Company. These expenses have been capitalised as prepaid expenses and are allocated to the statement of income, using the straight-line method in accordance with the current prevailing accounting regulations.

### **Revenue recognition**

Revenue of a transaction involving the rendering of services is recognised when the outcome of such transactions can be measured reliably. Where a transaction involving the rendering of services is attributable to several periods, revenue is recognised in each period by reference to the percentage of completion of the transaction at the balance sheet date of that period. The outcome of a transaction can be measured reliably when all four (4) following conditions are satisfied:

- (a) the amount of revenue can be measured reliably;
- (b) it is probable that the economic benefits associated with the transaction will flow to the Company;
- (c) the percentage of completion of the transaction at the balance sheet date can be measured reliably; and
- (d) the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

Interest income is recognised on an accrual basis, by reference to the outstanding principal and at the applicable interest rate.

Income from investments is recognised when the right to receive income is established.

### **Foreign currencies**

Transactions arising in foreign currencies are translated at exchange rates ruling at the transaction date. The balances of monetary items denominated in foreign currencies as at the balance sheet date are retranslated at the exchange rates ruling at the same date. Exchange differences arising from the translation of these accounts are recognised in the statement of income.

**Taxation**

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the period. Taxable profit differs from profit before tax as reported in the statement of income because it excludes items of income or expense that are taxable or deductible in other periods (including loss carried forward, if any) and it further excludes items that are never taxable or deductible.

Deferred tax is recognised on differences between carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit and is accounted for using balance sheet liability method. Deferred tax liabilities are generally recognised for all temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which deductible temporary differences can be utilised.

Deferred tax is calculated at the tax rates that are expected to apply in the period when asset is realised, or liability is settled. Deferred tax is charged or credited to profit or loss, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity. As at 31 December 2024, the Company did not have any significant differences between carrying amounts of assets and liabilities in the balance sheet and the corresponding tax bases.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same tax authority and the Company intends to settle its current tax assets and liabilities on a net basis.

The determination of the tax currently payable is based on the current interpretation of tax regulations. However, these regulations are subject to periodic variation and their ultimate determination depends on the results of the tax authorities' examinations.

Other taxes are paid in accordance with the prevailing tax laws in Vietnam.

**4. CASH AND CASH EQUIVALENTS**

	<u>Closing balance</u> VND	<u>Opening balance</u> VND
Cash on hand	77,089,132	78,790,667

As at 31 December 2024, costs of the Company's long-term investments represent revaluated amounts approved under Decision No. 7189/QD-UBND dated 29 December 2014 of the Hanoi People's Committee on approval of the enterprise valuation and equitisation plan of Hanoi Tourist Service Joint Stock Company. These investments were revalued in accordance with guidance in the Government's Decree No. 59/2011/ND-CP dated 18 July 2011 on transformation of 100% state-owned enterprises into joint stock companies ("Decree 59"), the Government's Decree No. 116/2015/ND-CP dated 11 November 2015 amending, supplementing a number of articles of Decree 59, and Circular No. 127/2014/TT-BTC date 5 September 2014 guiding financial settlement and enterprise valuation upon transformation of 100% state-owned enterprises into joint stock companies.

In accordance with Circular No. 200/2014/TT-BTC dated 22 December 2024, it is required to present fair value of investments as at 31 December 2024. However, the Company has not determined these fair values because the invested entities have not listed their shares on the stock markets and the Company has not collected other reliable information to determine the fair values. Therefore, fair values of the above investments as at 31 December 2024 have not been disclosed in the Notes to the financial statements for Quarter IV of 2024.

As at 31 December 2024, detailed information on joint ventures, associates and other investees of the Company are as follows:

Applicable tax rate	20%	20%
<b>Current tax expense</b>	<b>1,911,703,419</b>	<b>2,423,605,562</b>

During the period, the Company has obligations to pay the government income tax at the rate of 20% of taxable profits. The determination of the tax currently payable is based on the current interpretation of tax regulations. However, these regulations are subject to periodic variation and their ultimate determination depends on the results of the tax authorities' examinations.
