MCG ENERGY AND REAL ESTATE JOINT STOCK COMPANY

Address: Alley 102, Truong Chinh Street, Phuong Mai Ward, Dong Da District, Hanoi

FINANCIAL STATEMENTS

4th Quarter of the fiscal year ending December 31, 2024

Notes to the financial statements

III. Applicable Accounting Standards and Regimes

1. Applicable accounting regime

The Company applies the Vietnamese Enterprise Accounting Regime issued together with Circular No. 200/2014/TT-BTC dated December 22, 2014 of the Ministry of Finance.

2. Declaration on compliance with accounting standards and accounting regimes

The Board of Directors of MCG Energy and Real Estate JSC declares compliance with the issued Vietnamese Accounting Standards in accordance with the characteristics of the Company's production and business activities.

IV. Applicable accounting policies

1. Types of exchange rates applied in accounting:

Economic transactions arising in foreign currencies are accounted for at the actual exchange rate of the transaction bank at the time of the transaction. At the end of the year, assets in cash and liabilities denominated in foreign currencies are converted at the buying exchange rate of the commercial bank where the Company opens an account on the closing date of the accounting year. All actual exchange rate differences arising during the period and revaluation differences of currency items are transferred to the business performance report of the fiscal year.

2. Principles of recording cash and cash equivalents.

Cash and cash equivalents include cash, bank deposits, cash in transit and short-term investments with maturity or maturity not exceeding 3 months from the date of purchase, easily convertible to known amounts of cash and subject to insignificant risk of change in value.

3. Principles of accounting for financial investments.

a) Trading securities: are recorded at original cost, including: purchase price plus purchase costs (if any) such as brokerage, transaction, information provision, taxes, fees and bank fees. The original cost of trading securities is determined according to the fair value of payments at the time the transaction occurs. The time of recording trading securities is the time of ownership, specifically as follows:

- Listed securities are recorded at the time of order matching (T+0)

- Unlisted securities are recorded at the time of official ownership according to the provisions of law.

b) Investments held to maturity: Term bank deposits (including types of bills, promissory notes), bonds, preferred shares that the issuer is required to repurchase at a certain time in the future.

c) Loans: Loans under contracts between parties but are not traded on the market like securities.

d) Investments in subsidiaries and associates: are accounted for using the cost method. Net profits distributed from subsidiaries and associates arising after the date of investment are recorded in the Income Statement. Other distributions are deductions from the cost of investment.

Investments in joint ventures are accounted for using the cost method. Joint venture capital contributions do not adjust for changes in the company's ownership share in the net assets of the joint venture. The income statement of the company reflects the income distributed from the accumulated net profits of the joint venture arising after the joint venture capital contribution.

d) Investments in equity instruments of other entities: are recorded at cost starting from the date of investment capital contribution.

e) Accounting methods for other transactions related to financial investments.

Provision for devaluation of securities is made for each type of securities traded on the market and whose market price is lower than the price recorded in the books. The market price used as the basis for considering provision is determined as follows:

MCG ENERGY AND REAL ESTATE JOINT STOCK COMPANY

Address: Alley 102, Truong Chinh Street, Phuong Mai Ward, Dong Da District, Hanoi

FINANCIAL STATEMENTS

4th Quarter of the fiscal year ending December 31, 2024

Notes to the financial statements

- For securities listed on the Hanoi Stock Exchange (HNX), it is the average trading price on the date of provision.
- For securities listed on the Ho Chi Minh City Stock Exchange (HOSE), it is the closing price on the date of provision.
- For securities registered for trading on the trading market of unlisted public companies (UPCom), it is the average trading price on the system on the date of provision.
- For securities not registered for trading on the trading market of public companies, it is the average price based on the trading price announced by at least 3 securities companies on the date of provision.
- For listed securities that are cancelled or suspended from trading from the sixth trading day onwards, the book value is the date of the most recent Balance Sheet.

Provision for losses for financial investments in other economic organizations is set up when these economic organizations suffer losses (except for planned losses determined in the business plan before investment) with the provision level equal to the difference between the actual capital contributions of the parties in the economic organization and the actual equity multiplied (x) by the Company's capital contribution ratio compared to the total actual capital contributions of the parties in the economic organization.

When liquidating an investment, the difference between the net liquidation value and the book value is recorded as income or expense.

4. Principles of accounting for receivables

Accounts receivable from customers, prepayments to sellers, internal receivables and other receivables are recorded according to invoices and documents. At the time of reporting, if:

- The collection or payment period is less than 1 year (or within a production and business cycle), it is classified as a short-term asset.
- The collection or payment period is more than 1 year (or over a production and business cycle), it is classified as a long-term asset.

Provision for doubtful debts is established for each doubtful debt based on the age of the debt or the expected loss that may occur, specifically as follows:

For overdue receivables:

- 30% of the value for receivables overdue for less than 1 year.
- 50% of the value for receivables overdue from 1 year to less than 2 years.
- 70% of the value for receivables overdue from 2 years to less than 3 years.
- 100% of the value for receivables overdue for 3 years or more.

For receivables that are not overdue but are unlikely to be recovered: based on the expected loss level to establish a provision.

Provision for doubtful debts (if any) is established at the end of the accounting year.

5. Principles of inventory recording

Inventories are stated at cost. The cost of inventories comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

Inventories are valued at the weighted average cost method and accounted for using the perpetual inventory method.

MCG ENERGY AND REAL ESTATE JOINT STOCK COMPANY

Address: Alley 102, Truong Chinh Street, Phuong Mai Ward, Dong Da District, Hanoi

FINANCIAL STATEMENTS

4th Quarter of the fiscal year ending December 31, 2024

Notes to the financial statements

Provision for inventories is recognised when the cost is greater than the net realisable value. The net realisable value is the estimated selling price of the inventories less the estimated costs of completion and the estimated costs necessary to make the sale.

6. Principles of recording and depreciating fixed assets, financial lease fixed assets, investment real estate

Fixed assets are stated at cost less accumulated depreciation. The cost of fixed assets includes all costs incurred by the Company to acquire the fixed assets up to the date when the assets are ready for use. Expenditures incurred after initial recognition are only recorded as an increase in the cost of fixed assets if it is certain that these costs will result in an increase in future economic benefits from the use of the assets. Expenditures that do not satisfy the above conditions are recorded as expenses in the period.

When fixed assets are sold or liquidated, the cost and accumulated depreciation are written off and any gain or loss arising from the liquidation is included in the income or expenses of the period.

Fixed assets are depreciated using the straight-line method over their estimated useful lives. The depreciation period is calculated according to the depreciation period prescribed in Circular No. 45/2013/TT-BTC dated April 25, 2013 of the Ministry of Finance. The specific depreciation years are as follows:

<u>Type of fixed asset</u>	<u>Number of years</u>
Houses, buildings	10 - 50
Machinery and equipment	3 - 20
Means of transport, transmission	6 - 20
Management equipment and tools	3 - 10
Other fixed assets	4 - 6

Borrowing costs are recorded as expenses in the period. In particular, borrowing costs for investment in construction of the high-rise residential and office project at 102 Truong Chinh are capitalized into the value of the project.

7. Deferred corporate income tax accounting principles

Deferred income tax is the income tax payable or recoverable in respect of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and their amounts used for tax purposes. Deferred income tax liabilities are recognised for all taxable temporary differences. Deferred income tax assets are recognised only to the extent that it is probable that future taxable profits will be available against which the deductible temporary differences can be utilised.

The carrying amount of deferred income tax assets is reviewed at the end of each financial year and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability settled, based on tax rates that have been enacted at the end of the financial year. Deferred income tax is recognised in the income statement except to the extent that it relates to items recognised directly in equity, in which case it is recognised directly in equity.

8. Principles of accounting for prepaid expenses.

Tools and equipment that have been put into use are allocated to expenses using the straight-line method over a period of no more than 3 years.

MCG ENERGY AND REAL ESTATE JOINT STOCK COMPANY

Address: Alley 102, Truong Chinh Street, Phuong Mai Ward, Dong Da District, Hanoi

FINANCIAL STATEMENTS

4th Quarter of the fiscal year ending December 31, 2024

Notes to the financial statements

In particular, tools and equipment that have been reclassified due to not meeting the criteria of Fixed Assets as prescribed in Circular 45/2013/TT-BTC dated April 25, 2013 are allocated over a period of no more than 3 years from January 1, 2013.

9. Principles of accounting for liabilities.

Payables to suppliers, internal payables, other payables, loans at the reporting time if:

- Having a payment term of less than 1 year or within a business production cycle are classified as short-term debt.

- Having a payment term of more than 1 year or over a business production cycle are classified as long-term debt.

10. Principles of recording loans and financial lease liabilities

Finance lease loans are monitored by payment term. Loans with repayment term of more than 12 months from the date of the Financial Statement are classified as long-term loans and finance lease debts. Loans due within the next 12 months from the date of the Financial Statement are classified as short-term loans and finance lease debts.

11. Principles of recognition and capitalization of borrowing costs.

Borrowing costs are recognized in financial expenses in the period, except in cases where these costs arise from specific borrowings for the purpose of investment, construction or production of uncompleted assets, they are capitalized.

12. Principle of recording payable expenses

Actual expenses that have not yet been incurred but are deducted in advance into production and business expenses in the period to ensure the principle of matching between revenue and expenses. When such expenses arise, if there is a difference with the amount deducted, the accountant will make an additional addition or reduce the cost corresponding to the difference.

13. Principles and methods of recording provisions for payables.

Provisions for payables are recorded in business management expenses, except for provisions for payables for product and goods warranties, which are recorded in sales expenses, and provisions for payables for construction warranty costs, which are recorded in general production costs.

14. Principles of recognizing unrealized revenue.

Unearned revenue includes revenue received in advance such as: Amounts paid in advance by customers for one or more accounting periods for asset leases, interest received in advance for lending capital or purchasing debt instruments; and other unearned revenue.

15. Principles of recording convertible bonds.

Convertible bonds are bonds that can be converted into common stock under predetermined conditions.

Convertible bonds are recognized as liabilities and equity. The liability portion is estimated using the market interest rate of similar non-convertible bonds at the issuance date. The liability portion is adjusted for the actual interest rate over the life of the bond through recognition as expense. The portion recognized as equity is the difference between the fair value of the convertible bond and the liability portion. The costs associated with the issuance of convertible bonds are allocated to liabilities and equity on a pro rata basis.

16. Principles of equity recognition.

The Company's operating capital includes:

Owner's investment capital: recorded according to the actual amount invested by shareholders.

Share capital surplus: the difference due to the issuance of shares higher than the par value.

MCG ENERGY AND REAL ESTATE JOINT STOCK COMPANY

Address: Alley 102, Truong Chinh Street, Phuong Mai Ward, Dong Da District, Hanoi

FINANCIAL STATEMENTS

4th Quarter of the fiscal year ending December 31, 2024

Notes to the financial statements

Undistributed profit after tax is the profit from the business's operations after deducting the current year's corporate income tax expense and adjustments due to retroactive application of changes in accounting policies and retroactive adjustments of material errors of previous years.

After being approved by the Board of Directors, the profit after corporate income tax is allocated to funds according to the Company's Charter and current legal regulations, and will be distributed to shareholders based on the proportion of shares owned.

Dividends payable to shareholders are recorded as payables in the Company's Balance Sheet after the Company's Board of Directors announces the dividend payment.

The Company's funds are allocated according to the Charter and the decision of the Annual General Meeting of Shareholders.

17. Principles and methods of revenue recognition

Revenue from the sale of goods is recognised when the significant risks and rewards of ownership have been transferred to the buyer and no significant uncertainties remain regarding the payment of consideration, associated costs or the possible return of the goods.

Revenue from the provision of services is recognised when there are no significant uncertainties regarding the payment of consideration or associated costs. In the case of services being performed over several accounting periods, the determination of revenue in each period is based on the percentage of service completion at the end of the fiscal year.

Revenue from construction activities: construction contracts stipulate that contractors are paid according to the value of the volume performed, revenue related to the contract is recognised corresponding to the completed work confirmed by the customer during the year.

Revenue from real estate trading is recognised when the transfer contract has been signed by both parties and the boundary has been handed over.

Interest is recognised on the basis of time and the actual interest rate for each period.

Dividends and profits are recorded when the Company is entitled to receive dividends or profits from capital contributions. Dividends received in the form of shares are not recorded in income but only the increased quantity is monitored. Other income includes: income from liquidation of fixed assets, difference in revaluation of assets contributed as capital, fines, compensation and other income.

18. Accounting principles for revenue deductions

19. Principles of accounting for cost of goods sold.

The cost of land transfer with infrastructure is determined according to the investment estimate.

For construction activities: cost of goods sold is recorded according to actual costs incurred but does not exceed the contract rate on revenue recorded in the period for each project. The contract rate is determined according to each contract between the Company and the Enterprise, Branch and is applied consistently for each period during the construction process of each project..

20. Principles of financial cost accounting.

Financial expenses include expenses or losses related to financial investment activities, costs of lending and borrowing capital, costs of contributing capital to joint ventures and associations, losses on short-term securities transfers, costs of securities sales transactions, provisions for devaluation of trading securities, provisions for losses on investments in other entities, exchange rate differences and other financial expenses.

MCG ENERGY AND REAL ESTATE JOINT STOCK COMPANY

Address: Alley 102, Truong Chinh Street, Phuong Mai Ward, Dong Da District, Hanoi

FINANCIAL STATEMENTS

4th Quarter of the fiscal year ending December 31, 2024

Notes to the financial statements

Financial expenses are recorded according to the amount incurred in the period without offsetting against financial revenue.

21. Principles of accounting for sales costs and business management costs

Selling expenses are actual expenses incurred in the process of selling products, goods, and providing services, including costs of offering, introducing products, advertising products, sales commissions, product warranty costs (except for construction and installation activities), product preservation and packaging costs, and other sales expenses.

Business management expenses are general management expenses of the enterprise, including salary expenses and deductions based on salaries of employees in the business management department, office materials, labor tools, depreciation of fixed assets used for business management, land rent, business license tax, provision for bad debts, outsourced services, and other cash expenses.

All sales and business management expenses incurred during the period are immediately recorded in the business performance report of that period when such expenses do not bring economic benefits in the following periods..

22. Principles and methods of recording current corporate income tax expenses and deferred corporate income tax expenses.

The Company is obliged to pay corporate income tax at the rate of 20%.

Corporate income tax expense for the period includes current income tax and deferred income tax.

Current income tax is the tax calculated based on taxable income for the period using the tax rate applicable at the end of the period. Taxable income differs from accounting profit due to adjustments for temporary differences between tax and accounting as well as adjustments for income and expenses that are not taxable or deductible.

23. Other accounting principles and methods

Basis for preparing financial statements: Financial statements are prepared and presented based on basic accounting principles and methods: accrual basis, going concern, historical cost, relevance, consistency, prudence, materiality, offsetting and comparability.

Report by department: A business segment is a distinguishable component that is engaged in providing products or services and that is subject to risks and returns that are different from those of other business segments.

MCG ENERGY AND REAL ESTATE JOINT STOCK COMPANY

Address: Alley 102, Truong Chinh Street, Phuong Mai Ward, Dong Da District, Hanoi

FINANCIAL STATEMENTS

4th Quarter of the fiscal year ending December 31, 2024

Notes to the financial statements

A geographical segment is a distinguishable component that is engaged in providing products or services within a particular economic environment and that is subject to risks and returns that are different from those of components operating in other economic environments.

Stakeholders: Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control or common significant influence.

In considering any possible related party relationship, attention is directed more to the substance of the relationship than to the legal form.

FINANCIAL REPORT

4th Quarter of the fiscal year ending December 31, 2024

Notes to the financial statements

2- Present assets, revenue, and business results by segment (by business sector or geographical area) in accordance with Accounting Standard No. 28 "Segment reporting":

Segment information is presented by business segment and geographical area. Segment reporting is primarily by business segment based on the Company's internal organizational and management structure and internal financial reporting system because the Company's business activities are organized and managed according to the nature of the products and services provided by the Company with each segment being a business unit providing different products and serving different markets because the Company's risks and profitability are mainly affected by the differences in the products and services provided by the Company.

Business Field

The company has the following main business areas:

- Construction Field
- Commercial Business Field
- Real Estate Business
- Other Service Business Fields

Geographical area

All activities of the Company take place only in Vietnam.

Information on business results, fixed assets and other long-term assets and the value of major non-cash expenses of the Company's business segments is as follows:
