- The English name: NAM DINH WATER SUPPLY JOINT STOCK COMPANY
- Abbreviation: NAM DINH WATER SUPPLY COMPANY
- Address: 30 Cu Chinh Lan Street, Vi Xuyen Ward, Nam Dinh City, Nam Dinh Province, Vietnam.
- Tel: (0228)3649.510
- Fax: (0228) 3636.679
- Website: www.capnuocnamdinh.vn
- Registered Capital: 343,117,480,000 VND
- Contributed Capital: 343,117,480,000 VND
- Legal Representative: Mr. Nguyen Sy Long – Chairman of the Board of Directors
- Business Registration Certificate No: 0600008000, issued by the Department of Planning and Investment of Nam Dinh Province, first granted on December 28th, 2007, and registered for the sixth amendment on September 9th, 2024.
- Main Business Activities: Production and trading of clean water, as well as constructing and installing technology systems and water supply pipelines.

2. Establishment and development process:

The predecessor of Nam Dinh Water Supply Joint Stock Company is The Nam Dinh Water Plant, established in 1924 with an initial capacity of 600 m³ per day to serve the needs of the French colonial administration in the local area. At that time, the residents of the city had very limited access to water through a few public taps on the streets.

In 1946, the plant had to cease operations due to resistance against the French, particularly the scorched earth movement. After 10 years of inactivity, with assistance from the former Soviet Union, the plant was restored, its capacity increased to 6,000 m³ per day, and operations resumed on September 2, 1956, still under the name Nam Dinh Water Plant.

In 1992, the plant was renamed Nam Ha Water Supply Company. In 1997, it was renamed again as Nam Dinh Water Supply Company.

To align with the market economy, pursuant to Decision No. 3088/QĐ-UBND dated December 13th, 2007, issued by the Nam Dinh Provincial People's Committee, approving the proposal for the restructuring and transformation of the state-owned Nam Dinh Water Supply Company, the company was officially converted into Nam Dinh Clean Water Business One-Member Limited Liability Company. It now operates under the Law on Enterprises, based on Business Registration Certificate No. 0600008000, issued on December 28th, 2007, by the Nam Dinh Department of Planning and Investment.

Alongside its clean water production and business operations, the company has expanded into several additional sectors, including purified water production, construction and installation services, trading of water supply materials and equipment, and the manufacturing of composite plastic products... These expansions not only create employment opportunities for workers but also generate additional revenue for the company, enabling reinvestment and business expansion.

In line with the government's major policy on the equitization of state-owned enterprises and pursuant to Decision No. 366/QĐ-UBND dated March 21st, 2013, issued by the Nam Dinh Provincial People's Committee, which approved the list of wholly state-owned enterprises to be equitized in 2013, the company gradually implemented the equitization process in accordance with regulations. On July 19th, 2017, the Nam Dinh Provincial People's Committee issued Decision No. 1616/QĐ-UBND approving the equitization plan for Nam Dinh Clean Water Business One-Member Limited Liability Company, along with Official Letter No. 496/UBND-VP5 approving the criteria for selecting strategic investors to purchase shares in the company. On October 18th, 2017, in coordination with the consulting partner, Royal International Securities Joint Stock Company, the company organized its initial public auction of shares. As a result, all 986,075 shares (equivalent to 2.87% of the charter capital at par value) were successfully allocated to 16 investors who participated in the auction. On December 29th, 2017, Nam Dinh Clean Water Business One-Member Limited Liability Company was officially converted into Nam Dinh Water Supply Joint Stock Company, as per Business Registration Certificate No. 0600008000, initially issued by the Nam Dinh Department of Planning and Investment on December 28th, 2007, and amended for the sixth time on September 9th, 2024.

With the dedicated efforts of the company's employees and the strong support of leadership at all levels, from the central to local governments, the company has transformed

from a small-scale enterprise into a large-scale corporation. Its total production capacity has now reached 115,000 m³ per day, an increase of 192 times compared to its initial establishment. The workforce has expanded from just five employees in its early days to 501 employees today, many of whom are highly skilled professionals and experienced engineers. This growth demonstrates the company's steady development in both scale and expertise. Currently, the company is the leading entity in Nam Dinh province with extensive experience in the extraction, treatment, and supply of clean water.

3. Business lines and locations of the business

3.1. Business lines:

According to Business Registration Certificate No. 0600008000, initially issued by the Nam Dinh Provincial Department of Planning and Investment on December 28th, 2007, and amended for the sixth time on September 9, 2024, the company's business activities are as follows::

✓ ***Thien Truong Purified Water Branch***

A business unit under the company, subject to its rights and obligations. It is responsible for the production and trade of purified drinking water.

✓ ***District Water Supply Branches***

Subsidiary production and business units under the company, responsible for clean water production and supply in district areas. They ensure adequate production and supply of clean water that meets current Vietnamese national standards, handle monthly water billing and implements efficient water loss prevention strategies

They carry out water pipeline installation, network expansion, and customer development as assigned by the company.

4.2 Subsidiaries, associated companies

❖ **Subsidiaries:** None

❖ **Associated companies:** None

5. Development orientations

5.1. Main objectives of the Company:

- **Collaboration:** Establishing partnerships with shareholders and potential partners who possess financial resources, technical expertise, management capabilities, products, and market access. Simultaneously, strengthening internal collaboration within the company to create a value chain and integrated resources, enhancing competitive advantages and operational efficiency.
- **Industry and Products:** Continuously improving business and production efficiency to ensure the company's sustainable development. Guaranteeing that clean water meets hygiene standards for domestic use while providing the best services to consumers.
- **Technology and Engineering:** Gradually modernizing construction technologies and adopting advanced equipment to enhance service capacity, improve quality, and create higher added value. Collaborating with international partners for technology transfer and technical support to optimize operations, boost productivity, and develop highly competitive products and services.
- **Innovation:** Continuously innovating technology and improving management practices by applying scientific and technical advancements in business operations. Encouraging innovative initiatives to optimize production processes and reduce costs.

5.2 Development strategies in medium and long term:

- Develop and expand the city's water supply network, including residential areas, industrial zones, and urban districts, to increase the percentage of the population with access to clean water.
- Build and develop a professional, modern workforce by integrating scientific and technological advancements into management, operations, and the expansion of the water supply network.
- Train, develop, and utilize human resources effectively to meet growth and integration demands while improving employees' material and spiritual well-being.
- Foster a healthy corporate culture that encourages enthusiasm, creativity, and physical development among employees while strengthening community relationships. Promote economic and social participation in water resource protection and the development of the water supply system.

5.3. Corporate objectives with regard to Corporate environment, society and community Sustainability

- Implement effective measures to minimize water loss and improve overall system

efficiency.

- Improve service quality to meet customer demands for clean water while strictly adhering to legal regulations in business operations. Ensure full compliance with tax obligations to the state

6. Risks

6.1. Economic Risks

The water supply pipeline network and connection meters were installed over different periods of time and have now deteriorated, leading to a high rate of water loss.

Rising input material costs and the significant expense of replacing expired water meters pose major financial challenges for the company.

6.2 Industry-Specific Risks

A common risk for water supply companies is water loss in business operations, which can occur due to leaks, surface overflow, or underground seepage into drainage systems.

6.3 Other Risks

The company faces risks and impacts from weather conditions such as heavy rain, storms, and floods, which degrade raw water quality.

Public awareness of water resource management and protection remains limited.

Rapid urbanization, industrial village expansion, and increasing wastewater discharge from cities and residential areas into receiving sources without proper treatment heighten the risk of raw water pollution.

II. Operations in the Year

1. Situation of production and business operations

1.1 Results of business operations in the year:

Table 1: Business Performance Results for 2023 - 2024

Unit: Million VND

Indicators	Year 2023	Year 2024
Revenue from Sales and Services	270,142	277,710
Net Revenue	270,142	277,710
Gross Profit	92,215	92,878
Net Operating Profit	37,281	38,416
Other Profit	(101.352)	(793.888)
Profit Before Tax	37,180	37,622
Profit After Tax	33,042	33,361

Conflicts of Interest with the Company:	None

2.2. Changes in the Board of Management:

In 2024, the Company had two personnel changes in the Executive Board, specifically:
+ Mr. Đinh Van Hoa was appointed as General Director on July 11th, 2024 (Previous position: Deputy General Director).

+ Mr. Mai Manh Hung was appointed as Deputy General Director on July 11th, 2024 (Previous position: Director of the Nam Định City Clean Water Production Branch – Nam Định Water Supply Joint Stock Company).

2.3. Number of staffs:

As of December 31st, 2024, the total number of officers and employees of the Company is 501.

2.4. Brief information and changes on the employee's policies:

- Working Regulations:

In compliance with government regulations, the company's working hours are 40 hours per week, and employees must strictly adhere to the designated schedule. Specific working hours are as follows:

Office Staff: Monday to Friday (Morning: 7:00 AM – 11:30 AM; Afternoon: 1:30 PM – 5:00 PM)

Production Staff: Work according to a product-based contract mechanism and specific working hours as regulated separately.

The company ensures a safe and well-maintained working environment. Employees are fully entitled to occupational safety benefits, hazardous duty allowances, meal allowances, and overtime compensation. Strict adherence to occupational safety principles is enforced.

- Training and Recruitment Policies:

Each year, the company provides salary support for employees attending training programs and on-the-job training. The company facilitates flexible working arrangements to enable staff participation in part-time courses, short-term training programs, and workshops on business administration, financial accounting, tax policies, human resource management, and investment management. The focus is on enhancing professional competency and work efficiency.

- Salary, Bonus, and Welfare Policies:

The company implements a salary structure based on job titles and work performance. Additionally, the company prioritizes employee well-being by improving working conditions, providing allowances for employees working in harsh environments, and offering annual trips and vacations. Special attention is given to employees on public holidays and company celebrations.

3. Investment activities, project implementation

3.1. Major investments:

In 2024, the Company is implementing an investment project to construct a clean water plant in Hai Minh Commune, Hai Hau District, under Business Cooperation Contract No. 21/HDHTKD, dated November 6, 2023, signed between the Company and DNP Water Investment Joint Stock Company. The project has a total investment capital of 616,908,000,000 VND, with business results distributed based on the capital contribution ratio (Nam Dinh Water Supply Joint Stock Company holding 42% and DNP Water Investment Joint Stock Company holding 58%). As of December 31, 2024, the Company's audited financial statements recorded an investment in ongoing construction work for the project amounting to VND 14.93 billion.

(Source: Audited Financial Statements 2024 of Company)

3. Improvements in organizational structure, policies, and management

Advancements in Organizational Structure, Policies, and Management: The Company's executive and leadership structure is streamlined and direct. Under the Board of General Directors, various departments operate with clearly defined functions and responsibilities, closely supervised and managed by department heads. The Company's policies strictly comply with the current laws of Vietnam, and its human resource policies are designed to enhance corporate performance. The salary policy, based on job positions and attractive benefits, has enabled the Company to recruit highly capable and dedicated personnel.

Control Measures: The Company has a Supervisory Board consisting of members who oversee financial activities and corporate management.

Information Disclosure: The Company's leadership strictly adheres to public company disclosure requirements, ensuring full compliance with legal regulations.

4. Development plans in future

Based on specific market conditions, socio-economic factors, and the urbanization pace of the city, the Board of Directors has developed a concrete business plan, focusing on market expansion and strengthening its market presence. The Company seeks to leverage the support of the provincial and municipal People's Committees, local communities, socio-political organizations, and businesses in the city and districts to enhance clean water supply services across the city and province. The Company will continue to capitalize on its strengths, maximize human resources, improve quality and efficiency, increase labor productivity, and enhance technological and facility upgrades. These efforts aim to optimize operational effectiveness, reduce input costs, and ensure the highest quality and profitability in business operations.

Technical Measures:

- **Investment in New Equipment and Machinery:** The Company will invest in modern machinery and equipment to enhance business operations and production efficiency.

- **Strengthening Management and Supervision:** The Company will reinforce leadership, management, and monitoring in business activities to achieve optimal efficiency. Internal regulations and policies, such as financial management regulations, work coordination procedures, and recruitment policies, will be established and enforced.
- **Standardization of Key Personnel:** The Company will standardize management positions, particularly key roles such as Branch Directors and Department Heads, to ensure a highly competent leadership team.
- **Optimized Workforce Allocation:** Labor will be strategically assigned to maximize employee capabilities and efficiency. Additionally, on-the-job training and external educational programs will be implemented to enhance managerial skills.
- **Continuous Improvement of Technical Capabilities:** The Company will progressively upgrade technological processes, optimize machinery utilization, and fully exploit the capacity of its production lines and equipment.
- **Business Partnerships and Market Expansion:** The Company will seek joint ventures and collaborations with individuals, organizations, and enterprises to expand its business. Incentives will be introduced to encourage internal and external entities to explore new market opportunities, thereby creating additional jobs and increasing employee income.

5. Explanation of the Board of Management for auditor's opinions: None

6. Assessment Report related to environmental and social responsibilities of the Company

6.1. Assessment concerning management of raw materials:

a) The total amount of raw materials used for the manufacture and packaging of the products as well as services of the organization during the year: None

b) The percentage of materials recycled to produce products and services of the organization: The water production system operates on a closed-loop circulation process, ensuring that no wastewater is discharged into the environment. The sludge generated during production is concentrated, collected, transported, and properly treated.

6.2. Assessment concerning energy consumption:

a) Energy consumption - directly and indirectly: None

b) Energy savings through initiatives of efficiently using energy: None

c) The report on energy saving initiatives (providing products and services to save energy or use renewable energy); report on the results of these initiatives: None

6.3. Assessment concerning water consumption (water consumption of business activities in the year)

a) Water supply and amount of water used: None

b) Percentage and total volume of water recycled and reused: None

6.4. Assessment concerning compliance with the law on environmental protection

The company consistently complies with environmental protection laws and regulations.

6.5. Assessment concerning the labor issues:

The company ensures that all employees have stable employment and receive a relatively high income compared to the average in Nam Dinh province. It strictly adheres to occupational safety and labor protection regulations, regularly organizing periodic and annual training on workplace safety and hygiene. The company promptly and fully provides benefits related to illness, maternity leave, holidays, paid leave, hardship allowances, and organizes company trips and vacations for employees. It also offers gifts to employees facing difficulties, recognizes outstanding workers for their achievements, and conducts comprehensive periodic health check-ups for all employees.

6.6. Assessment concerning the corporate responsibility for the local community

The company actively participates in community development initiatives across economic and social aspects. It engages in charitable activities, fosters a spirit of mutual support, and maintains close collaboration with local authorities to ensure workplace security, public order, and social safety.

IV. Assessments of the Board of Directors on the Company's operation (for joint stock companies)

1. Assessments of the Board of Directors on the Company's operation, including the assessment related to environmental and social responsibilities

In 2024, the lingering effects of the post-Covid-19 pandemic and escalating global conflicts significantly impacted business operations across industries, including our company. However, the Board of Directors provided comprehensive leadership, enabling the company to overcome challenges and successfully achieve its planned objectives.

2. Assessment of Board of Directors on Board of Management's performance

2.1. Achievements:

- Complied strictly with legal regulations, the Company's Charter, General Meeting of Shareholders' Resolutions, and Board of Directors' Resolutions.
- Maintained a high level of responsibility, closely monitored work processes, provided timely and decisive guidance, and promptly resolved difficulties in business operations.
- Proactively implemented the Board of Directors' resolutions and decisions in

alignment with the approved development direction and strategies.

- Developed and applied appropriate solutions tailored to each specific period and circumstance. Leveraged the collective strength of employees to fulfill the company's business and production objectives.

2.2. Areas for Improvement:

The company's leadership should continue enhancing training programs and developing the management team. Based on the business performance achieved in 2024, the Board of Directors assesses that the Executive Board, under the direction of the General Director, has successfully fulfilled its assigned duties for the year.

3. Plans and orientations of the Board of Directors

Given the opportunities and challenges of the industry, the Board of Directors is determined to successfully achieve the 2025 business plan with the following key directives:

- Strengthen oversight and direct the Executive Board in implementing investment projects in infrastructure construction to ensure sufficient water supply and transmission capacity to meet customer demand.

- Collaborate with the Supervisory Board to monitor costs, enhance labor productivity, improve business efficiency and profitability, while ensuring a balance of interests among the State, shareholders, employees, and the community.

- Continue reviewing and restructuring the organization to ensure streamlined, efficient, and effective operations. Reinforce discipline and accountability in business operations, aligning tasks with responsibilities.

- Closely monitor the quality of raw water sources, promptly address risks affecting the quality of treated water, and further explore and apply scientific and technological advancements in management and production.

- Implement effective strategies to prevent and mitigate water loss and revenue leakage across the company.

V. Corporate governance

1. Board of Directors

1.1. Members and structure of the Board of Directors:

Table 11: Member of the Board of Directors

3	Pham Tai Dinh	Member of the Supervisory Board	+ Number of shares owned individually: 106,910 shares, accounting for 0.31% of charter capital. + Number of shares held as a representative: 0 shares

2.2. Activities of the Board of Supervisors:

In 2024, the Supervisory Board held periodic meetings to inspect and oversee compliance with the provisions of the Enterprise Law, the Company's Charter, and operational regulations in the management and execution of the Company's business activities. Specifically, the Supervisory Board carried out the following tasks:

- Reviewed the appropriateness of the decisions made by the Board of Directors and the Executive Board in management and operations; monitored the procedures and issuance of Company documents to ensure compliance with legal regulations and the Company's Charter; and supervised the Company's adherence to legal requirements.
- Examined and evaluated the Company's critical processes to identify potential risks or shortcomings in the internal management system, thereby proposing appropriate recommendations and solutions.
- Represented the Supervisory Board at Board of Directors' meetings, provided input, and monitored the implementation of resolutions passed by the 2024 General Meeting of Shareholders regarding the Board of Directors and the Executive Board.
- Supervised the Company's compliance with and disclosure of information in accordance with the Securities Law and relevant legal provisions.
- Reviewed periodic reports prepared by the Executive Board, including quarterly and annual financial reports, to assess the accuracy and reasonableness of financial data. Additionally, the Supervisory Board coordinated with independent auditors to examine the impact of material accounting and audit discrepancies on financial statements and monitored the management's implementation of the auditors' recommendations.
