Re: Explanation for Separate Financial Statements Q1/2025

Hanoi, April 25 2025

To: Hanoi Stock Exchange

BGI Group Joint Stock Company (Stock Code: VC7) would like to provide an explanation to your esteemed agency regarding the difference in business results between the separate financial statements for Q1/2024 and Q1/2025 as follows:

- Profit after Corporate Income Tax for Q1/2024: VND 1,422,402,987
- Profit after Corporate Income Tax for Q1/2025: VND 2,605,716,048

Profit after corporate income tax in Q1/2025 increased by more than 10% compared to Q1/2024, primarily due to an increase in sales revenue in Q1/2025. This includes revenue recognized from the investment cooperation project "Renovation of residential areas at lots CTR1, CTR2 in Area A, An Van Duong New Urban Area, Hue City, Thua Thien Hue Province." As a result, gross profit from sales and service provision for the current period significantly increased compared to the same period last year. The higher gross profit in this period led to the profit after tax in Q1/2025 exceeding that of Q1/2024 by more than 10%.

Sincerely,

CHỦ NGHỊ HỘI ĐỒNG QUẢN TRỊ

Hoàng Trọng Đức

The Company has applied the Vietnamese Accounting Standards and related guidance issued by the State. The financial statements are prepared and presented in full compliance with all regulations of each standard, circular, and the currently applicable accounting regime.

IV. Accounting Policies Applied (in case the company meets the going concern assumption)

4. Principles for Recognizing Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, bank deposits, and short-term investments with a maturity period not exceeding three months, which are highly liquid, easily convertible into specified amounts of cash, and subject to an insignificant risk of changes in value.

5. Principles for Accounting Financial Investments

a) Trading securities

b) Held-to-maturity investments

Held-to-maturity investments include investments that the Company intends and is able to hold until maturity. The Company's held-to-maturity investments consist of term deposits in banks.

c) Loans

d) Investments in subsidiaries, joint ventures, and associates

Investments in subsidiaries: Subsidiaries are companies controlled by the Company. Control is achieved when the Company has the ability to govern the financial and operational policies of the investee to obtain benefits from its activities.

Investments in associates: Associates are companies in which the Company has significant influence but does not have control over their financial and operational policies. They are not subsidiaries or joint ventures of the Company. Significant influence refers to the ability to participate in financial and operational policy decisions of the investee but does not include control or joint control of those policies.

Investments in subsidiaries and associates are initially recognized at cost, which includes the purchase price or contributed capital plus any directly attributable costs. If the investment is made through non-monetary assets, the investment cost is recognized at the fair value of the non-monetary assets at the time of the transaction.

Dividends and profits from periods after the investment acquisition are recognized as revenue. Dividends received in the form of shares are tracked only by the increased number of shares, without recognizing the value of the received shares.

d) Investments in equity instruments of other entities

These represent investments in equity instruments where the Company does not have control, joint control, or significant influence over the investee.

Investments in equity instruments of other entities are initially recognized at cost, including the purchase price or contributed capital plus any directly attributable costs. Dividends and profits from periods prior to the acquisition of the investment are deducted from the investment's value. Dividends and profits from periods after the acquisition are recognized as revenue. Dividends received in the form of shares are tracked only by the increased number of shares, without recognizing the value of the received shares.

Provisions for losses on investments are made at the financial statement date when investments show a decline in value compared to their cost. The Company makes provisions as follows:

For investments whose fair value cannot be determined at the reporting date, the provision is calculated as the difference between the actual capital contributed by all parties to the investee and the actual net equity of the investee, multiplied by the Company's capital contribution ratio to the total actual capital contributed by all parties.

Provisions for losses on investments in subsidiaries and associates are made when subsidiaries and associates incur losses. The provision is calculated as the difference between the actual capital contributed by all parties to the subsidiary/associate and its actual net equity, multiplied by the Company's capital contribution ratio to the total actual capital contributed by all parties. If the subsidiary or associate prepares consolidated financial statements, the provision is based on the consolidated financial statements.

Increases or decreases in the provision for losses on investments in subsidiaries, associates, and equity instruments of other entities that need to be recognized at the financial statement date are recorded in financial expenses.

e) Accounting methods for other transactions related to financial investments

6. Accounts Receivable Accounting Principle

Accounts receivable should not be recorded higher than the recoverable value. Receivables are presented at their book value, less allowances for doubtful accounts.

The classification of receivables is based on the following principles:

- Receivables from customers reflect commercial receivables arising from transactions of a buying and selling nature between the Company and independent buyers.
- Other receivables include non-commercial receivables that are not related to buying and selling transactions.

An allowance for doubtful receivables is established for each receivable based on the overdue age of debts or the estimated level of loss due to the debtor's inability to pay, which may occur if the debtor is liquidated, bankrupt, or faces similar difficulties.

Any increase or decrease in the balance of the allowance for doubtful accounts must be recorded as of the date of the closing for the preparation of the financial statements and recognized as part of business management expenses.

7. Principles of Inventory Recognition

Principles of Inventory Recognition: Inventory is measured at cost. In cases where the net realizable value is lower than the cost, inventory is measured at net realizable value. The cost of inventory includes purchase costs, processing costs, and other directly related costs incurred to bring the inventory to its current location and condition.

Method of Inventory Valuation: Inventory value is determined using the weighted average method.

Method of Inventory Accounting: Inventory is accounted for using the perpetual inventory system.

Provision for Inventory Write-Down: The provision for inventory write-down is established at the end of the year as the difference between the cost of inventory and its net realizable value, where the cost exceeds the net realizable value.

8. Principles of Recognition and Depreciation of Fixed Assets, Finance-Leased Fixed Assets, and Investment Properties

The recognition of tangible fixed assets and their depreciation is conducted in accordance with Vietnamese Accounting Standard No. 03 - Tangible Fixed Assets; Circular No. 200/2014/TT-BTC dated December 22, 2014, issued by the Ministry of Finance, providing guidance on corporate accounting; Circular No. 45/2013/TT-BTC dated April 25, 2013, guiding the management, use, and depreciation of fixed assets; Circular No. 147/2016/TT-BTC dated October 13, 2016, amending and supplementing certain provisions of Circular No. 45/2013; and Circular No. 28/2017/TT-BTC dated April 12, 2017, further amending and supplementing certain provisions of Circular No. 45/2013 and Circular No. 147/2016/TT-BTC.

The company applies the straight-line depreciation method for tangible fixed assets. Tangible fixed assets are classified into groups based on their similar nature and usage purposes in the company's production and business activities, as follows:

<i>Type of Fixed Asset</i>	<i>Depreciation Period (Years)</i>
- Buildings and structures	05 - 30 years
- Machinery and equipment	05 - 10 years
- Transportation vehicles	06 - 10 years
- Office equipment	03 - 05 years

Investment properties are recognized at cost. During the holding period for price appreciation or operational leasing, investment properties are recorded at historical cost, accumulated depreciation, and residual value. Investment properties are depreciated using the straight-line method over the estimated depreciation period as follows: Buildings and structures: 25 years.

11. Principles of Prepaid Expense Accounting

Prepaid expenses that pertain solely to the production and business operations of a single financial year or a business cycle are recognized as short-term prepaid expenses and are allocated to production and business costs within the financial year. Expenses incurred during a financial year but related to the business performance of multiple accounting periods are recorded as long-term prepaid expenses and gradually allocated to business performance results over subsequent accounting periods.

The calculation and allocation of long-term prepaid expenses into production and business costs for each accounting period are based on the nature and magnitude of each expense type to determine an appropriate allocation method and criterion. Prepaid expenses are allocated to production and business costs on a straight-line basis.

12. Principles of Liability Accounting

Liabilities represent amounts owed to suppliers and other parties. Liabilities include accounts payable to suppliers and other payables.

Liabilities must not be recorded at an amount lower than the payment obligation.

The classification of liabilities is based on the following principles:

- Accounts payable to suppliers include trade payables arising from transactions for purchasing goods, services, and assets where the seller is an independent entity from the buyer, including payables between parent companies and subsidiaries.
- Other payables consist of non-trade payables unrelated to transactions for the purchase, sale, or supply of goods and services.

Payables are tracked in detail by each party and the payment due date.

13. Principles for Recognizing Loans and Finance Lease Liabilities

Loans are recognized based on receipts, bank documents, agreements, and loan or finance lease contracts. Loans are tracked by individual entities and terms.

14. Principles for Recognizing and Capitalizing Borrowing Costs

Borrowing costs are recognized as production and business expenses in the year incurred, unless capitalized in accordance with the accounting standard "Borrowing Costs." Borrowing costs directly related to the acquisition, investment in construction, or production of assets requiring a substantial period to complete and be ready for use or sale are added to the asset's original cost until the asset is ready for use or sale. Income generated from the temporary investment of borrowings is deducted from the related asset's original cost. For specific loans used to construct fixed assets or investment properties, interest is capitalized even if the construction period is under 12 months.

15. Principle of Accrued Expenses Recognition

The Company's accrued expenses include costs for the construction of the Chung Cu project at 136 Ho Tung Mau, loan interest, and other expenses. These are actual costs incurred during the reporting period but not yet paid due to the absence of invoices or incomplete accounting documentation. These costs are recognized as production and business expenses for the reporting period. Accrued loan interest is determined based on contracts, loan agreements, and the actual borrowing period.

Provisions for these expenses in production and business costs for the period are calculated meticulously and must have reasonable and reliable evidence to justify the amounts accrued, ensuring that the expenses recorded in this account align with the actual costs incurred.

16. Principles and Methods for Recognizing Provisions for Payables

This reflects the existing provisions for payables, the situation of provision establishment, and the use of provisions for payables by the enterprise. The recorded value of a provision for payables is the best reasonable estimate of the amount required to settle the present obligation as of the end of the annual or interim accounting period.

Provisions for payables are established when preparing financial statements. For construction warranty provisions, they are established for each construction project and recorded at the end of the annual or interim accounting period.

17. Principles of Recognizing Unearned Revenue

This reflects the current balance and the changes (increases or decreases) in unearned revenue of the business during the accounting period. Unearned revenue refers to the money received from customers for real estate sales that have not yet met the conditions for revenue recognition.

19. Principles of Equity Recognition

Principle of recognizing owners' equity contributions, share premium, convertible bond options, and other owners' equity:

Owners' equity contributions reflect the current investments from owners and the changes in these investments (increase or decrease).

Owners' equity contributions include: Initial contributions and additional contributions from owners.; Amounts supplemented from funds under owners' equity or post-tax profits from business activities.; The company accounts for the actual capital contributed by the owners,

not the committed or receivable amounts from them. The company maintains detailed accounting of owners' equity contributions by source (e.g., owners' equity contributions, share premium, other equity) and tracks contributions by individual organizations or persons.

- Principle of recognizing revaluation differences of assets.
- Principle of recognizing foreign exchange differences.
- Principle of recognizing undistributed profits.

Reflects the after-tax business results (profits or losses) and the allocation or handling of profits and losses by the enterprise.

20. Principles and Methods of Revenue Recognition

- Sales Revenue: Revenue from selling construction products under contracts undertaken by the company, selling purchased goods, and selling investment real estate.
- Service Revenue: Revenue from performing agreed-upon tasks as per contracts within one or multiple accounting periods, such as providing services or leasing fixed assets under operating lease agreements.
- Financial Income: Includes revenue from bank deposit interest, dividends, and shared profits; income from investment activities involving the purchase and sale of short-term and long-term securities; and gains from capital transfers when liquidating joint venture contributions, investments in associate companies, subsidiaries, or other capital investments.
- Construction Contract Revenue.
- Other Income: Reflects income outside the enterprise's production and business activities, including: Income from the sale or liquidation of fixed assets; Penalty payments received from customers for contract violations.

21. Principles of Accounting for Revenue Reductions

Reflects adjustments to reduce revenue from sales of goods and services during the period, including trade discounts, sales allowances, and returns of goods sold.

22. Principles of Accounting for Cost of Goods Sold

Reflects the cost of goods, products, services, and investment properties; the production costs of construction products sold during the period; costs related to real estate investment business activities; and costs of transferring or liquidating investment properties.

23. Principles of Accounting for Financial Expenses

Financial expenses are costs or losses related to financial investment activities and borrowing costs. These expenses are recognized as the total incurred during the year, without offsetting against financial income.

24. Accounting Principles for Selling Expenses and Enterprise Management Expenses

Selling expenses reflect the actual costs incurred in the process of selling products, goods, and providing services. These include costs for product promotion, product introduction, advertising, sales commissions, product warranty costs (excluding construction activities), storage costs, packaging, transportation, etc.

Enterprise management expenses include costs for the salaries of employees in the management department (wages, salaries, allowances, etc.); social insurance, health insurance, union funds, unemployment insurance for management employees; office supplies, labor tools, depreciation of fixed assets used for enterprise management; land rent, license tax; provisions for doubtful debts; outsourced services (electricity, water, telephone, fax, property insurance, fire insurance, etc.); other cash expenses (client reception, customer meetings, etc.).

25. Principles and Methods of Recognizing Current Corporate Income Tax Expense and Deferred Corporate Income Tax Expense

Current corporate income tax expense is the corporate income tax payable based on taxable income for the year and the applicable corporate income tax rate.

Quarterly, accountants calculate the provisional corporate income tax to be paid as current corporate income tax expense.

Deferred corporate income tax expense:

Unit: VND

According to the regulations in Vietnamese Accounting Standard No. 05 - Investment Property, the fair value of investment property as of December 31, 2024, needs to be disclosed. However, the company has not yet determined this fair value, so the fair value of investment property as of December 31, 2024, has not been disclosed in the Notes to the Financial Statements. To determine this fair value, the company will need to hire an independent consulting firm to assess the fair value of the investment property. Currently, the company has not yet found a suitable consulting firm to carry out this task.
