**REPORT
2024 BUSINESS PERFORMANCE RESULTS
AND 2025 PLAN**

To: Annual General Meeting of Shareholders 2025

2024 Annual General Meeting of Shareholders on the 2024 Production and Business Plan and Investment and Development Plan of Phu Yen Water Supply and Sewerage Joint Stock Company; Decision No. 02/2024/QD-HDQT dated January 2, 2024 approving the Production and Business Plan and Investment and Development Plan for 2024. Authorized by the Board of Directors, the General Director of the Company reports on the Company's 2024 business results and 2025 plan as follows:

PART I

RESULTS OF IMPLEMENTATION IN 2024

I. Situation characteristics:

1. Advantages:

– Production activities at factories are stable, ensuring water supply to customers; water quality is maintained and controlled according to the Ministry of Health's standards and local standards.

– The Company's production, business and investment development activities are in line with the 10-year production, business and investment development strategy for the period 2016-2025 approved by the Provincial People's Committee.

– The weather during the year was favorable for the supply of clean water throughout the province. The demand for water from customers increased, so the water consumption output met the set plan.

2. Difficulty:

– Due to the impact of the project of embankment to prevent landslides on the left bank of Ba River combined with the development of urban infrastructure through Vinh Phu village for the Hoa An collection project, forced relocation is a big difficulty and challenge for the Company in the coming years.

– Currently, the riverbed upstream of Da Vai dam is heavily silted with sand, reducing the ability to store fresh water; In the dry season, the streams leading upstream

of Da Vai dam dry up, leading to an inability to meet the surface water supply for Song Cau water supply system.

– Propaganda work on the importance of clean water is still limited. Some areas have invested in water supply systems, however, because people still maintain the habit of using well water, the demand for water is not high, leading to low investment efficiency.

– Illegal drilling for groundwater for production and daily life is still very common in the whole province, reducing the demand for clean water and reducing the efficiency of investment in water supply projects in the area.

– Expanding the service area for some factories with difficult terrain such as: Song Hinh Water Plant, Son Hoa Water Plant, Dong Xuan Water Plant leads to limited customer development in the neighboring areas of the factories.

– The quality of source water at Song Cau Water Plant and Son Hoa Water Plant is 2-3 times higher than usual, leading to increased costs of chemical and electricity operations and equipment maintenance.

– The current network development areas mainly expand to suburban areas. At the beginning of the connection, the average water usage of customers is low, especially in the rainy season, the clean water consumption of customers decreases sharply. The awareness of customers in rural areas about clean water is not high, and there is still the habit of using water on the spot (mainly from rainwater sources, well water, etc.). After some projects are put into use, the rate of customers connecting to water is low and the usage level is low.

II. Results of implementing the 2024 plan :

1. Production and business activities:

1.1. Implementation results:

– The targets according to Decision No. 02/2024/QĐ-HĐQT dated January 2, 2024 such as: Total revenue, profit and budget payment completed the plan.

– Basic production indicators such as:

+ Production water output and consumption water output achieved compared to the plan ;

+ The rate of water loss and revenue loss is in line with the plan.

– **Specific results :**

	Total	172,899	35,648	20.62%

- In 2024, the Company has completed and put into use the following projects: Developing water supply service pipelines for households in Tan Hoa, Tan Dinh, Phu Diem villages of An Hoa Hai commune in the project list: Developing and expanding the regional water supply network serving Tuy Hoa water plant and My Thuan Trong village, Hoa Dong commune, Tay Hoa district; renovating, repairing and replacing uPVC water distribution and service pipelines on inner-city roads of Hai Rieng water plant; renovating, repairing and replacing uPVC water distribution and service pipelines on inner-city roads of Son Hoa water plant; Project to install solar power system at Chi Thanh water plant;

Project to upgrade and expand Song Cau water plant from 5,000m³ / day and night to 8,000m³ / day and night.

- During the production and business operations, during the year the Company implemented 4 additional projects as follows:

+ Project of purchasing servers to install Fast accounting software service; Total investment: 116 million VND.

+ Project: Purchase Tsurumi 250BZ475-41 submersible pump and TOS3-250 coupling; Total investment: 1,012 million VND.

+ Project: Drilling 01 geological exploration well, 01 exploitation well to replace damaged G2 well at Phu Hoa Water Plant; Total investment: 102 million VND.

+ Project: Purchase 02 Diesel Engine Water Pumps Flow rate 240-300 m³/hH= 6-8m; Total investment: 119 million VND.

** Investment implementation results in 2024 are not achieved due to the following reasons:*

- Some of the Company's key projects with large investment values are slow to be implemented, such as:

+ Investment project to upgrade the water plant in the Northeast of Song Cau area from 900 m³ / day and night to 10,000 m³ / day and night (Investment phase, period up to 2025: 5,000 m³ / day and night; period up to 2030: 10,000 m³ / day and night) The implementation progress was prolonged due to the prolonged time for land lease procedures to implement the project, specifically: due to the change in land origin compared to the investment policy, it is necessary to supplement the conversion of protective forest land and supplement the conversion of production forest land according to Land Law No. 31/2024/QH15

+ Project: Investment in the construction of a factory producing bottled and canned purified water : Not yet implemented because the current land used to locate the factory producing bottled and canned purified water at Binh Ngoc Water Treatment Area has been leased by the Provincial People's Committee in Decision No. 1964/QĐ-UBND dated November 13, 2020 for the purpose of commercial and service land, so it is not suitable for project implementation. Currently, the Company is carrying out related procedures to adjust the purpose of land use of the above land.

- Some projects have not been implemented yet such as: Renovation, repair and replacement of distribution and service pipelines at Water Supply Branch No. 1; Renovation, repair and replacement of distribution and service pipelines at Water Supply Branch No. 2; Investment in developing the water supply pipeline network for Dan Phu 1 Village, Xuan Phuong Commune, Song Cau Town, because the Company has to balance existing financial resources to implement key projects, so they have not been implemented yet. As for the project of Investing in equipment for monitoring the exploitation and use of water resources according to Circular No. 17/2021/TT-BTNMT dated January 14, 2021, the Department of Natural Resources and Environment of the province has not yet

synchronously equipped data transmission connection devices and has specific implementation instructions, so it has not been implemented yet.

– In addition, the project: Developing a water supply pipeline network for Phuoc Luong village and Tan Long village, An Cu commune, Tuy An district, when implementing the route agreement, the Locality required the Company to commit to relocating the pipeline when the State expanded the road according to the plan. This requirement affected the efficiency of the project investment, so the Company had to work with the authorities to reach an agreement, leading to slow implementation.

III. Business administration and management:

– Maintain the activities of the Board of Directors and the Supervisory Board in accordance with the Company Charter. Organize the 2024 Annual General Meeting of Shareholders, pay 2023 dividends to shareholders. Implement information disclosure of public companies in accordance with regulations.

– Organize internal assessment of the quality management system according to ISO 9001:2015 standard and improve according to actual work requirements.

– Submit to the Board of Directors for approval to amend and supplement the Salary Regulations of Phu Yen Water Supply and Sewerage Joint Stock Company (amended and supplemented for the third time);

– Amendment and supplement to the Regulations:

+ Regulations on timekeeping using fingerprint scanners (amended and supplemented for the second time);

+ Regulations on evaluating work completion and classifying employees at Phu Yen Water Supply and Drainage Joint Stock Company (amended and supplemented for the second time);

+ Regulations on document and archive work (amended and supplemented for the second time).

– Pay quarterly performance bonuses; fully implement social insurance, health insurance, unemployment insurance, support social insurance and provide uniforms and labor protection for the Board of Directors and employees.

– Maintain the activities of the Board of Directors and the Supervisory Board in accordance with the charter. Organize the 2025 General Meeting of Shareholders and pay dividends in 2024 to Shareholders. Perform well the information disclosure of the public company.

– Ensure employment and stable income for employees; fully implement social insurance, health insurance, unemployment insurance, support personal insurance and provide uniforms and labor protection.

IV. Other work:

– Organize the Company's Labor Conference in 2024. Maintain traditional activities for the Company's affiliated organizations on holidays, Tet and anniversaries; organize visits

and give gifts to the families of the Company's officers and employees who are policy beneficiaries.

– Actively participate in contributing to social and charity funds launched by all levels. Respond to and participate in activities of the Provincial Business Association.

PART II

MISSION PLAN 2025

I. Assessment of the situation in 2025:

1. Advantages:

– The Company always receives attention and support from the Provincial Party Committee, People's Council, Provincial People's Committee, relevant Departments and branches and strategic shareholder Aqua One Water Joint Stock Company in all production and business activities of the Company.

– The Company's water supply system has covered all urban areas in Phu Yen province, which is convenient for expanding the service area, ensuring timely water supply for water users for many different purposes, meeting the demand for clean water for socio-economic development in the area.

– Phu Yen is a province where many investors are interested in researching and developing projects and are implementing projects on tourism, service and urban development, so it is forecasted that the demand for clean water in the province will increase day by day.

– The company has a team of dedicated managers and employees with appropriate professional qualifications and is always a united group striving to complete the set goals and plans.

2. Difficulty:

– The Hoa An raw water intake project was affected by the construction of the Ba River embankment project to prevent landslides on the left bank, combined with the development of urban infrastructure through Vinh Phu village, forcing the construction of a new water intake project. Finding a stable and safe water source, a construction location, technical solutions, and financial solutions for implementation are major difficulties and challenges for the Company in the coming time.

– Climate change is becoming increasingly complex, weather patterns are constantly changing and unpredictable, directly affecting production and customer consumption.

– The flow status upstream of some water exploitation works is somewhat affected by highway construction, leading to impacts on exploitation flow.

– Propaganda work on the importance of clean water is still limited. Some areas have invested in water supply systems, however, because people still maintain the habit of using well water, the demand for water is not high, leading to low investment efficiency.

– The complicated situation in the world has led to an increase in the prices of some goods used for production and business, directly affecting the production and business activities of the Company.

115
NG
PH
CÁT
JYI
A-

- The fluctuation in electricity production price gradually increased (increased by about 9% compared to, leading to increased production costs.
- Illegal drilling for groundwater for production and daily life is still very common in the whole province, reducing the demand for clean water and reducing the efficiency of investment in water supply projects in the area.
- Expanding the service area for some factories with difficult terrain such as: Song Hinh Water Plant, Son Hoa Water Plant, Dong Xuan Water Plant leads to limited customer development in the neighboring areas of the factories.
- The quality of the source water is 2-3 times higher than usual, leading to increased costs of chemicals, electricity, and equipment maintenance.
- The current network development areas mainly expand to urban areas, at the beginning of the connection, the average water usage of customers is low, especially in the rainy season, the clean water consumption of customers decreases sharply. The awareness of customers in rural areas about clean water is not high, and the main use is other water sources (rainwater, well water, etc.). Some projects after investment and put into use but the rate of customers connecting to water is low such as: Phu Thu Town area, Tay Hoa district; Hoa Hiep Trung ward, Dong Hoa town or customers have completed the installation but rarely use it, leading to the Company having to cut off the water such as: Nam Binh 1 Quarter, Nam Binh 2 Quarter, Hoa Vinh ward; Binh Thanh village, An Ninh Tay commune, Tuy An district, etc.

II. General objectives :

- Regarding production and business: Strengthen management at water plants to ensure water quality according to the standards of the Ministry of Health; ensure the technical and economic indicators of the plants towards safety, efficiency and savings; change technology to improve production capacity; effectively implement the safe water supply plan; strengthen and synchronously implement solutions to prevent loss.
- Strive for an average increase in commercial water output of 3-5%/year.
- Regarding investment and development: Focus on implementing and completing the Company's key projects/works early, especially projects to develop the pipeline network, improve the system's water supply capacity and service quality with the goal of creating breakthroughs in customers , consumption output and revenue.

III. Plan for 2025 :

1. Production and business plan:

- Total revenue : 145,300 million VND;
- In there*
- + Clean water business activities: 139,200 million VND ;
- + Other business activities: 2,600 million VND ;
- + Financial activities: 3,000 million VND;
- + Other income: 500 million VND;
- Profit before tax : 31,500 million VND;

- Budget payment (taxes and fees): 15,117 million VND;
- Dividend rate : 4.0 % .

*** Main production indicators:**

- Water production : 15,532,000 m³;
- Water consumption : 13,200,000 m³;
- Water loss rate , loss of revenue : 15.0%;

2. Investment development plan

- **The expected capital plan for 2025 is 114,150 million VND, of which:**
- + *Capital mobilized from shareholders 40,100 million VND.*
- + *Enterprise capital 34,050 million VND.*
- + *Loan capital 40,000 million VND.*

Include:

a . Project transition from 2024:

- Estimated capital plan 94,450 million VND:
- + *Capital mobilized from shareholders 40,100 million VND.*
- + *Enterprise capital 14,350 million VND.*
- + *Loan capital 40,000 million VND.*

b . New investment projects in 2025:

- Estimated capital plan 19,700 million VND:
- + *Shareholder capital 0 million dong*
- + *Enterprise capital 19,700 million VND.*
- + *Loan capital 0 million VND.*

(Attached project list)

IV. Implementation solutions:

1. Production and business activities:

- Develop and implement production and business plans according to the 10-year production, business and investment development strategy, period 2016-2025 approved by the Provincial People's Committee.

- Establish and thoroughly implement a safe water supply plan at factories, focusing on drought and saltwater intrusion prevention to maintain stable water sources; maintain water quality control according to current regulations and standards; maintain machinery, equipment and other infrastructure to ensure the entire system operates stably and safely;

- Strengthening solutions for pipeline network management (zoning, network separation, setting up DMAs, Blocks, installing specialized equipment...) and optimizing operations to reduce water loss, striving to reduce the annual loss rate by 1%/year; building reasonable operating scenarios to save electricity for factories. Complying with environmental protection regulations.

- Promote the application of science and technology in production, especially in system operation, reduce human resources, gradually move towards automation; control input water quality, improve output water quality.

- Promote the implementation of other business lines such as: Construction, design consulting and some advantageous business lines.

2. Development investment:

Focus on implementing new investment projects to build or renovate, increase the capacity of water treatment plants in the plan to be proactive in production capacity to meet the demand for clean water for the socio-economic development of the province and in accordance with the goals of each region. At the same time, gradually implement projects to develop the pipeline network in accordance with the local development speed. Develop a roadmap for implementing projects to meet the demand for clean water for socio-economic development.

3. Customer management and development solutions:

- Improve the quality of customer care services; use multiple electronic payment channels to facilitate customers in paying water bills; develop specific action programs aimed at customers to best address customer requests.

- Strengthen propaganda work so that people see the importance of using clean water that meets standards, gradually changing the backward and unhygienic habits of using water. Water supply branches need to be proactive and have specific solutions in propaganda work, mobilizing people to use clean water. Pay special attention to customer development in areas that have invested in water supply networks in recent years, striving to increase the rate of people using clean water while avoiding waste in investment projects.

- For customers with large-scale projects (restaurants, hotels, factories, enterprises...) with low water consumption compared to the scale, coordinate with state management agencies in inspecting and evaluating the status of illegal exploitation of groundwater for these customers in order to have solutions to promote the use of clean water sources that meet the standards of the Ministry of Health and protect increasingly depleted groundwater resources.

- Resolutely handle cases of illegal water use, unauthorized intervention in the meter cluster or failure to fulfill responsibilities when using clean water according to the signed Contract. Have appropriate management solutions to limit the situation of using water in small drops.

4. Business Administration:

- The Board of Directors of the Company and the leaders of the affiliated units closely direct the proposed plan, control the implementation process and results to evaluate and provide timely guidance. Assign annual production and business plan targets and investment and development plans to each unit according to each factory so that the units can be proactive in production management.

Phu Yen, April 28, 2025

REPORT

**On 2024 performance results and 2025 performance plan
of the Board of Directors of Phu Yen Water Supply and Sewerage Joint Stock
Company**

To: General Meeting of Shareholders of Phu Yen Water Supply and Sewerage Joint Stock Company

Pursuant to the Charter on organization and operation of Phu Yen Water Supply and Sewerage Joint Stock Company (the Company Charter); Resolution of the 2024 Annual General Meeting of Shareholders, the Board of Directors (BOD) reports to the Annual General Meeting of Shareholders on the activities of the Board of Directors in 2024 and the 2025 operation plan as follows:

1. Payment of remuneration to members of the Board of Directors and related benefits:

During the year, members of the Board of Directors were fully remunerated according to the Resolution of the General Meeting of Shareholders. The operating expenses of the Board of Directors were paid according to internal spending regulations.

2. Summary of Board of Directors meetings and resolutions and decisions of the Board of Directors:

In 2024, the Board of Directors of the Company held in-person meetings and meetings through written voting as prescribed in the Company's Charter with a total of **21 sessions**, issued 05 Resolutions and 16 Decisions on contents under the authority of the Board of Directors as prescribed in the Company's Charter on organization and operation. Minutes of meetings/Minutes of vote counting were fully prepared; documents and files were sent to members of the Board of Directors and Supervisory Board attending the meeting as prescribed.

3. Results of monitoring the activities of the Company's General Director:

The Board of Directors closely supervises and directs the General Director and the Company's Executive Board in the implementation of the 2024 plan approved by the General Meeting of Shareholders.

- The General Director and the Board of Directors of the Company have fulfilled their roles through timely and flexible management solutions, in line with the policies and orientations of the Board of Directors. The policies and directions given by the Board of Directors have also been fully and promptly implemented by the Board of Directors and detailed reports on implementation results with a high sense

of responsibility, thereby helping the Company's performance achieve a number of important targets and exceed the plan in the Resolution of the 2024 Annual General Meeting of Shareholders, specifically as follows: **Production water output:** Implemented 15,103,919 m³ (average 1.2 58 . 659 m³ /month) reached 104.4 % compared to the yearly plan, up 5.2 % compared to 2023. **Water consumption output:** Actual 12,715,506 m³ (average 993,563 m³ / month) reached 101.7% of the annual plan, up 6.6 % compared to 2023. **Rate of clean water loss and revenue loss :** 15.6 % , down 0.1 % compared to the plan, down 1.3 % compared to 2023. In 2024, the General Director of the Company directed to promote many solutions to prevent loss and loss of clean water, especially the establishment of a Water Loss Prevention Team and investment and purchase of many modern equipment to serve the task. **Revenue and income:** Total revenue and income in 2024 was 142,374 million VND, reaching 104.5% of the annual plan, up 3.9% compared to 2023 , of which revenue from clean water business activities was 133,810 million VND, accounting for 94.0% of total revenue, due to favorable weather conditions in the year for the supply of clean water in the whole province, so the demand for water from customers increased . **Profit before tax:** Profit realized in 2024 was 41,921 million VND, reaching 139.7% of the annual plan, up 24.1% compared to 2023. **Budget payment:** Total budget payment was 13,675 million VND, reaching 101.3% of the plan. **Dividend rate:** Expected to be approved by the General Meeting of Shareholders at 10%, this is considered the highest dividend rate since the Company switched to operating under the model of a joint stock company.

– In addition to the achievements, in 2024, the Company's operations still had difficulties and challenges that affected the management and operation of the Board of Directors according to the content of the Report of the Company's General Director.

– At the same time, the Company's production and business activities still have some shortcomings and limitations such as: Water quality sometimes and in some places still does not meet requirements, especially the phenomenon of colored water in some local pipelines in Tuy Hoa city and Song Cau town, affecting customers' water consumption. Some projects to renovate and upgrade factories and pipeline networks are slow to be implemented; the work to prevent water loss and revenue loss has been strongly implemented but has not been in-depth and has not achieved clear results. Production and business activities at the branches still have some shortcomings, limitations and delays that affect customers.

However, the Board of Directors acknowledges the efforts of the Company's Board of Directors in managing production and business activities, investment and development in 2024 and shares the difficulties and challenges. At the same time, in the coming time, it will continue to accompany, coordinate, supervise, and promptly give instructions to the Board of Directors to help the Company overcome difficulties and complete the tasks and targets set for 2025 approved at the Annual General Meeting of Shareholders.

4. General assessment of the Board of Directors' activities in 2024:

- The Board of Directors of the Company has organized activities in accordance with the provisions of the Company Charter, ensuring the number of meetings, the number of Board members attending the meetings, and the participation of members of the Supervisory Board at the meetings to ensure the legality and effectiveness of the meetings.

- Timely provide specific and feasible directions for implementing corporate governance and closely monitor the implementation of the Resolution of the General Meeting of Shareholders and the Company's production and business activities.

- The supervision of the activities of the General Director and members of the Executive Board is carried out seriously, effectively and in compliance with the provisions of law, in accordance with the Resolutions/Decisions of the Board of Directors that have been approved.

- In 2024, the Board of Directors approved the issuance of the Salary Regulations (amended and supplemented for the third time) to ensure compliance with labor laws, overcome shortcomings in the practice of salary and labor management, and at the same time add allowances for employees when establishing/consolidating Teams, Groups, etc.

- In general, the Board of Directors' activities during the year basically met the shareholders' requirements in the Resolution of the 2024 Annual General Meeting of Shareholders. However, there are still certain difficulties affecting the Board of Directors' performance in recent times, such as:

+ Some key projects of the Company serving the medium and long-term development strategy are still slow to implement, facing many legal problems related to land and planning in the process of investment procedures, typically the project: Investment in upgrading the Northeast Song Cau Water Supply Plant from 900 m³ / day to 10,000 m³ / day, facing problems with procedures for changing land use purposes, land allocation, and land lease to implement the project; Project: Upgrading and expanding the water supply system of Tuy Hoa city and neighboring areas facing problems with procedures for local adjustment of construction planning at the factory construction site in Son Thanh Dong commune, Tay Hoa district. The project to expand the Tuy Hoa city water supply system is a particularly important project to replace the clean water source for Tuy Hoa NMN with a capacity of 28,000 m³ /day . affected by the project: Embankment to prevent landslides on the left bank of Ba River combined with urban infrastructure development through Vinh Phu village, Hoa An commune. However, the implementation procedures still face many difficulties.

+ The legal and policy mechanisms are still overlapping, related to the authority of many state management agencies and localities where the project is implemented, leading to many projects being delayed compared to the proposed schedule because of having to consult with all levels, sectors, etc.

5. Operational plan for 2025:

To maintain the stability and development of the Company, complete the production, business and investment development targets and tasks assigned by the 2025 Annual General Meeting of Shareholders, the Board of Directors sets out a number of directions and tasks for 2025 as follows:

- Direct and manage the Company's operations to continue to stabilize and develop according to the plan approved by the 2025 Shareholders' Meeting;
- Continue to direct the Executive Board to review and amend issued regulations and rules that are still inadequate in practical implementation;
- Elect the position of Chairman of the Board of Directors and appoint the General Director of the Company and other executive management positions under the authority of the Board of Directors after the beginning of the Board of Directors term 2025-2030.
- Continue to direct the improvement of the organizational structure, ensuring the requirements of decentralization and delegation. Promote training, improve the professional qualifications and skills of employees at the Company. Strongly apply information technology in production and business activities.
- Strengthen supervision and direction of the Executive Board to operate effectively, achieve production and business plan goals and especially the 2025 development investment plan.
- Carry out procedures related to the cancellation of public company status because the Company does not meet the conditions on the percentage of shares owned by investors who are not major shareholders according to the provisions of law.
- Implement related work after the General Meeting of Shareholders approves the adjustment of the plan for using capital raised from the public offering of securities.

6. General assessment of the Board of Directors' performance for the 2020-2025 term:

During the 2020-2025 term, the Board of Directors has successfully fulfilled its role as the Company's management body, promptly deciding on investment projects and medium-term and annual production and business plans in accordance with the Company's development situation. Reviewing, amending and supplementing the Company's Charter, internal governance regulations and many other regulations and rules to ensure that the Company operates in compliance with legal regulations. Regularly monitoring, directing and supervising the Company's General Director to perform the task of managing and operating the enterprise to achieve good results, completing and putting into use most of the investment projects approved by the Board of Directors, especially projects to improve technology and increase the capacity of water plants, and expand the water supply pipeline network. Directing the promotion of the application of information technology and digitalization in production and business activities, the results are shown through the rate of customers

paying for water without cash by the end of 2024 reaching 99.66%. During the past term, the Company has put into use many information technology software to serve its operations such as: Document and operation management software, human resource management software, timekeeping, payroll; improving customer management software (CRM), applying the form of recording meter readings via phone, etc. It can be seen that during its term, the Board of Directors has successfully completed the functions and tasks assigned by the General Meeting of Shareholders each year and ensured the goal of developing each year better than the previous year. Hereby, the Board of Directors hereby ends its term of office and respectfully requests the General Meeting of Shareholders to elect the Board of Directors for the new term 2025-2030 according to the provisions of the Company's Charter.

Above is the Board of Directors' performance report, respectfully submitted to the 2025 Annual General Meeting of Shareholders for consideration and approval.

Best regards./

- The expected disbursement amount for the remaining part of phase 02A is VND 4,923,000,000, with implementation time in 2025.

2. Additional working capital:

a. Implementation progress: Not yet implemented

b. Capital usage progress : Not yet disbursed.

III. Adjusting the plan for using capital raised from the public offering of securities:

1. Reason for adjustment:

- The project "Investment in renovation and upgrading of Tuy Hoa water plant with a capacity of 28,000 m³ / day and night" has been completed and the investment capital settlement has been approved. The remaining amount after the project

have enough supply capacity.

+ Build a new water plant to upgrade and expand Tuy Hoa Water Plant to meet the capacity of 50,000 m³ / day and night. At that time, the existing Tuy Hoa water plant will be a pumping station to transmit and distribute clean water to water users, ensuring safe water supply to meet the goals of local socio-economic development.

2. Adjustment content:

- Net capital raised from the offering: **156,780,031,099 VND** .

- Implemented capital: **106,378,760,262 VND** , of which:

STT	Project/Portfolio	Capital mobilized and to be implemented (VND)	Note
1	Investment project to renovate and upgrade Tuy Hoa water plant with capacity of 28,000 m ³ / day and night	49,428,760,262	According to settlement data
2	Investment project to upgrade the water plant in the Northeast of Song Cau from 900m ³ / day and night to 5,000m ³ / day and night (adjusted to: Investment to upgrade the water plant in the Northeast of Song Cau from 900m ³ / day and night to 10,000m ³ / day and night).	40,000,000,000	Project in progress
3	Project to upgrade and expand Song Cau water plant from 5,000m ³ / day and night to 8,000m ³ / day and night	16,950,000,000	The project is ongoing and will be completed upon completion of phase 2A.
4	Additional working capital	0	Not implemented
	Total	106.378.760.262	

- Remaining capital: **50,401,270,837 VND**.

- **Content of capital use plan adjustment:** Transfer the remaining capital from the public offering of securities according to the prospectus due to some contents that cannot be implemented with the amount of **VND 50,401,270,837** to implement the project " *Investing in upgrading and expanding the water supply system of Tuy Hoa city and neighboring areas* " .

Respectfully submit to the Company's General Meeting of Shareholders for consideration and approval./ .

Nominees/candidates for members of the Board of Directors/Board of Supervisors must be responsible before the law and the General Meeting of Shareholders for the accuracy and honesty of the content in their profiles.

2. Location and deadline for receiving nomination and candidacy applications

Shareholders, please send nomination/candidate documents to Phu Yen Water Supply and Sewerage Joint Stock Company **no later than 3:00 p.m. on April 1, 2025** at the following address:

- **Phu Yen Water Supply and Sewerage Joint Stock Company**
- **No. 05 Hai Duong, Ward 1, Tuy Hoa city, Phu Yen province.**
- **Recipient: Mr. Le Gia Vinh - Person in charge of Company Administration.**

Based on the nomination and candidacy records of shareholders, shareholder groups and the attached records of the candidates, the Company will prepare a List of candidates who meet the prescribed conditions to elect members of the Board of Directors/Board of Supervisors.

VI. Method of election of members of Board of Directors/Board of Supervisors:

1. Principles for election of members of the Board of Directors/Board of Supervisors:

- Ensure compliance with legal regulations and company charter, ensuring democracy and fairness;
- Voting rights are calculated based on the number of shares owned and represented. Election results are calculated based on the number of voting shares of shareholders attending the meeting.
- In each election, a shareholder delegate may only use one vote corresponding to the number of shares owned or represented.
- The Ballot Counting Committee is nominated by the presiding committee and approved by the congress. Members of the Ballot Counting Committee cannot be on the list of nominees and candidates for the Board of Directors or the Supervisory Board.
- Voting to elect members of the Board of Directors is carried out by cumulative voting. Accordingly, each delegate has a total number of votes corresponding to the total number of shares owned and/or represented multiplied (x) by the number of elected members of the Board of Directors. Delegates have the right to accumulate all their votes for one or several candidates.

2. Election method

- Implement the cumulative voting method, whereby each shareholder has a total number of votes corresponding to the total number of shares owned multiplied by the number of elected members of the Board of Directors or Board of Supervisors.

- Delegates have the right to cast all or part of their total votes for one or several candidates.

3. How to fill out the ballot

How to vote is specifically instructed as follows:

- Delegates elect a maximum number of candidates equal to the number of members to be elected;

- If the vote is cumulative for one candidate or the vote is divided equally among candidates, the delegate shall check the "**Cumulative vote**" box of the corresponding candidate.

- If the number of votes is not equal for the candidates, the delegate must clearly write the number of votes in the "**Number of votes**" box for the corresponding candidates.

Note: In case the Delegate both checks the "**Cumulative voting**" box and writes the number in the "Number of votes" box, the result will be based on the number of votes in the "**Number of votes**" box .

- Valid ballot: is a ballot according to the pre-printed form issued by the organizing committee, stamped by the Company, not erased, scratched, or written with any content other than the regulations for the ballot.

- The following ballots will be considered invalid:

- Add other content to the ballot;
- Ballots that do not follow the pre-printed form issued by the organizing committee, do not have the Company's red seal, or have been erased, edited, or have additional content written outside the regulations for the ballot;
- The ballot has the total number of votes for the candidates of the delegates greater than the total number of votes allowed to be cast;
- No signature and full name of the attending delegate.

4. Voting and counting

- Each shareholder attending the meeting is given 01 ballot for the Board of Directors and 01 ballot for the Board of Supervisors. When receiving the ballot, delegates must check the information on the ballot. If there is any error, they must immediately notify the Vote Counting Committee.

- Delegates cast their ballots into sealed ballot boxes supervised by the Counting Committee.

- After the voting is over, the vote counting will be conducted under the supervision of the Counting Committee and shareholder representatives (if necessary).

- The vote counting committee is responsible for making minutes of vote counting, announcing results and, together with the Chairman, resolving shareholders' questions and complaints (if any).

- Ballots after being counted will be stored according to regulations.

VII. Principles of election

- The elected members of the Board of Directors or the Supervisory Board are determined according to the number of valid votes from high to low, starting from the candidate with the highest number of valid votes until the required number of members is reached.

- In case there are two (02) or more candidates with the same number of valid votes elected for the final member of the Board of Directors or the Supervisory Board, a re-election will be held among the candidates with the same number of valid votes.

- If the first election results do not have enough members of the Board of Directors or the Supervisory Board, the Congress will proceed with the election until the required number of members are elected.

VIII. Effective date

This election regulation takes effect immediately after being approved by the General Meeting of Shareholders and only applies to the candidacy, nomination and election of members of the Board of Directors and the Board of Supervisors for the 2025-2030 term at the 2025 Annual General Meeting of Shareholders of Phu Yen Water Supply and Sewerage Joint Stock Company.

INSTRUCT
ELECT MEMBERS OF THE BOARD OF DIRECTORS AND
SUPERVISORY BOARD FOR THE TERM 2025-2030
(Cumulative voting method)

1. Type of ballot

There are 02 types of ballots to elect members of the Board of Directors and the Board of Supervisors, including:

- Blue ballot: To elect members of the Board of Directors
- Pink ballot: To elect members of the Board of Supervisors

2. Vote

Shareholders/authorized representatives of shareholders shall vote to elect members of the Board of Directors and Supervisory Board in the ballot box.

3. How to vote

a) Each shareholder has a total number of votes corresponding to the total number of voting shares (including owned and authorized votes) multiplied (x) by the number of elected members of the Board of Directors or the Board of Supervisors.

b) Shareholders can divide their total number of votes among the candidates they choose or concentrate all their total votes on one or several candidates, but must ensure that the total number of votes for the candidates does not exceed the total number of votes of that shareholder; and the number of candidates that the shareholder chooses to vote for must not exceed the number of candidates to be elected to the Board of Directors or the Board of Supervisors (approved by the General Meeting).

For example:

- Suppose the Congress votes to elect 05 members of the Board of Directors for the 2025-2030 term from a total of 06 candidates.

- Shareholder Nguyen Van A holds (including owned and authorized shares) 1,000 voting shares. Then the total number of votes of shareholder Nguyen Van A is $1,000 \times 5 = 5,000$ votes.

- Shareholder Nguyen Van A can choose up to 05 candidates from among the candidates to be elected to the Board of Directors and the total number of votes for the candidates that shareholder Nguyen Van A chooses must not exceed 5,000 votes.

- Shareholder Nguyen Van A can vote cumulatively in the following manner:

*** Case 1.**

Shareholder Nguyen Van A divides his votes equally among several candidates of his choice (in the example below, it is divided among 05 candidates - equivalent to each candidate receiving 1,000 votes)

STT	Candidate's full name	cumulative vote	Number of votes
1	Candidate 1	<input checked="" type="checkbox"/>	
2	Candidate 2	<input checked="" type="checkbox"/>	
3	Candidate 3	<input checked="" type="checkbox"/>	
4	Candidate 4	<input checked="" type="checkbox"/>	
5	Candidate 5	<input checked="" type="checkbox"/>	
6	Candidate 6	<input type="checkbox"/>	

*** Case 2.**

Shareholder Nguyen Van A cast all his votes for 01 candidate (equivalent to the selected candidate receiving all 5,000 votes)

STT	Candidate's full name	cumulative vote	Number of votes
1	Candidate 1	<input type="checkbox"/>	
2	Candidate 2	<input type="checkbox"/>	
3	Candidate 3	<input checked="" type="checkbox"/>	
4	Candidate 4	<input type="checkbox"/>	
5	Candidate 5	<input type="checkbox"/>	
6	Candidate 6	<input type="checkbox"/>	

*** Case 3**

Shareholder Nguyen Van A divided his votes among several candidates but not equally. In the following case, he divided them among two candidates: Candidate No. 1 (3,000 votes) and Candidate No. 3 (2,000 votes).

STT	Candidate's full name	cumulative vote	Number of votes
1	Candidate 1	<input type="checkbox"/>	3,000
2	Candidate 2	<input type="checkbox"/>	
3	Candidate 3	<input type="checkbox"/>	2,000
4	Candidate 4	<input type="checkbox"/>	
5	Candidate 5	<input type="checkbox"/>	
6	Candidate 6	<input type="checkbox"/>	

4. Invalid ballot

Cases of invalid ballots are specified in Clause 3, Section VI of these Regulations, specifically in the following cases:

a) The voucher is not issued by the Company and/or does not have the Company's seal;

b) The form crosses out, corrects, or adds content that is not in accordance with regulations;

d) The total number of votes for candidates exceeds the total number of voting rights of that shareholder (including ownership and authorization);

e) The ballot is not signed and clearly states the full name of the shareholder/authorized representative of the shareholder;

g) Voting for more candidates than the number needed;

h) Ballots without an (X) mark or without the number of votes for any candidate.

5. The election of members of the Supervisory Board is carried out similarly to the election of members of the Board of Directors, with the only difference being the number of candidates and the number of members selected for the Supervisory Board.
