 - + Receivable and accrual of interest on financial assets: Be accounted in detailed for each object, recorded according to each transaction and payment time.
- Accounting principles and methods of other receivables: Be accounted in detailed for each object, recorded according to each transaction and payment time.
- Accounting principles and methods of provisions for bad debts: The Premium rate of provision for bad debts according to the guidance of Circular 228/2009/TT-BTC issued by the Ministry of Finance on December 7, 2009 is as follows:

Overdue time	Premium rate
From over six (6) months to less than one (1) year	30%
From one (1) year to less than two (2) years	50%
From two (2) years to less than three (3) years	70%
From three (3) years and above	100%

4.10 Accounting principles and methods of the long-term and short-term liabilities:

Liabilities are tracked in detail by payment term, payable object, and payable currency. When preparing financial statements, accountants base on the remaining term of payables to classify them as long-term or short-term.

4.11 Accounting principles and methods for recognition of owners' equity of the Company:

- Recognition principles of the owners' capital investment : Recorded according to actual contributed capital.
- Recognition principles of the profits of the Company:
 - + Recognition principles of the realized profit: Realized profit during the period is the net difference between the total revenue, income and the total expenses that calculated on the Separate Income statement of the Company.

+ Recognition principles of the unrealized profit : Unrealized profit of the period is the difference between the total value of the profit and loss after revaluation of FVTPL or other Financial Assets calculated in the profit and loss statement of the Separate Income Statement under the list of financial assets accumulating and arising in the period.

- Recognition principles of the exchange rate difference: None

4.12 Accounting principles and methods for recognition of revenue::

Revenue is recognised to the extent that it is probable that the company is able to receive economic benefits that can be reliably measured. Revenue is determined based on the fair value of amounts collected or to be collected, after deducting trade discounts, sales allowances, and returns. The specific recognition conditions outlined below must also be met in accordance with this principle when recognizing revenue.

Revenue from trading of securities, providing services are recorded according to regulations of Revenue standards and Relevant financial tool standards and guidelines in Circular NO.210/2014/TT-BTC and Circular No.334/2016/TT-BTC.

- Revenue from financial assets at FVTPL is determined based on the difference between the selling price and the average cost of the stock.

- Dividends, interests from financial assets:

Revenue from dividend will be recognized when the receiving rights of dividend are determined. For bonus shares, the Company only records the entitled shares, do not record an increase revenue from dividend.

Revenue from the sale of financial assets is recognized on the basis of accrued interest by time and the actual interest rates of each accounting period.

- Interests from loans: is the interest from Investors, using service of margin trading, advance transaction of the company in the period.

- Revenue from brokerage services: is recognized in the separate income statement. There are brokerage fees that Investors must pay to the Company when trading securities is implemented by Investors' order and other fees from brokerage services under securities law.

- Revenue from consulting activities: including the securities investment consulting and business management consulting, financial consulting and improving enterprise (consulting for listing, issuing and improving enterprise ...). Revenue from consulting activities is recognized in the separate income statement according to the completion rate of the transaction at the date of making financial statement. The completion rate is evaluated on the basis of the completed tasks.

- Custody revenue: is the fee collected from customers when using services on custody services provided by the company such as: register, custody, transfer, transfer the securities ownership rights ... and they must be completed.

4.13 Recognition principles of the financial income, financial expense

Comply with accounting standards and regimes of the Securities Company according to Circular No.210/2014TT-BTC, Circular No.334/2016TT-BTC and current regulations of securities law.

4.14 Recognition principles of the administrative expenses of the Company

Company management expenses are recorded even before the payment due date but will likely arise to ensure prudence and capital preservation principles. Expenses and the revenue it generates must be recorded simultaneously according to the matching principle.

4.15 Recognition principles of other incomes and expenses:

Recording other income:

Other revenue is recognized at the time the transaction arises, when it is certain that economic benefits will be obtained, determined according to the fair value of the amounts entitled to receive, regardless of whether money has been collected or will be collected.

Recognition of other expenses:

Other expenses are recorded at the time the transaction occurs. Expenses and the revenue it generates must be recorded simultaneously according to the matching principle.

4.16 Principles and methods for recognizing of the current corporate income tax expenses:

Current corporate income tax expense is determined on the basis of taxable income and corporate income tax rate in the current year.

Deferred corporate income tax expense is determined on the basis of deductible temporary differences, The taxable temporary difference and the corporate income tax rate. This transaction did not occur during the period.

Do not offset current corporate income tax expense with deferred corporate income tax expense.

4.17 Other accounting principles and policies:

4.18 Recognition, management and presentation principles of the Financial Statement on customers'

Assets and liabilities payable to customers are recognized at the time the transaction occurs, and are managed separately from the assets and liabilities of the securities company. They are presented on the financial position statement under the section "Items outside the financial position statement" and are disclosed in the notes to the financial statements.

4.19 Nil balances

Items or balances required by Circular No. 210/2014/TT-BTC dated 30 December 2014 and Circular No. 334/2016/TT-BTC dated 27 December 2016 issued by the Ministry of Finance that are not shown in these interim separate financial statements indicate nil balances.

5. FINANCIAL RISK MANAGEMENT FOR THE COMPANY

The Company's financial liabilities mainly include loans and debts, trade payables, and other payables. The main purpose of these financial liabilities is to mobilize financial resources to serve the company's activities. The company has loans, customer receivables, and other receivables, cash, and short-term deposits arising directly from the company's operations.

For financial activities, the Company has market risk, credit risk, and liquidity risk.

Risk management is an indispensable profession for the entire business activities of the company. The company has built a control system to ensure a reasonable balance between risk costs and risk management costs. The Board of Directors continuously monitors the company's risk management process to ensure an appropriate balance between risk and risk control.

The Board of General Directors reviews and agrees to apply management policies for the above risks as follows:

Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate with changes in market value. Market prices have different types of risks: interest rate risk, foreign currency risk, commodity risk, and other price risks, such as equity price risk. Financial instruments affected by market risk include loans and debt, deposits, financial assets recognized through profit and loss, covered warrants, and available-for-sale investments.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate with changes in market interest rates. Market risk due to changes in a company's interest rates is mainly related to the company's cash and short-term deposits. Financial liabilities have stable interest rates.

The company manages interest rate risk by analyzing the competitive situation in the market to obtain interest rates that are beneficial for the company's purposes and remain within its risk management limits. The company assesses that the risk due to the impact of interest rate changes on the company at the reporting date is insignificant. Bank deposits, certificates of deposit, corporate bonds, and company loans mostly have fixed interest rates and are recovered according to the prescribed maturity period of each item. Fixed interest rate loans are determined according to each specific loan agreement.

Foreign currency risk: None

Stock price risk

Listed and unlisted shares held by the company are affected by market risks arising from uncertainty about the future value of the investment stocks. The company manages stock price risk by setting investment limits. The company's investment board also reviews and approves stock investment decisions.

An increase or decrease in the stock index may increase or decrease a corresponding proportion of the company's revenue from investment activities, depending on the severity and duration of the decline, and on the portfolio's holding status for stocks that have a significant influence on the market index.

Credit risk

Credit risk is the risk that one party involved in a financial instrument or customer contract fails to fulfill its obligations, resulting in financial loss. The company faces credit risk from its business operations and financial activities, including bank deposits and other financial instruments.

Accounts receivable from customers

The company manages customer credit risk through policies, procedures, and control processes related to customer credit risk management. The credit quality of customers is assessed based on the evaluation of the Board of Directors.

The company regularly monitors loans and accounts receivable that have not been collected. For large customers, the company regularly reviews any deterioration in the credit quality of each customer. The company seeks to maintain strict control over outstanding receivables and operates a credit control department to minimize credit risk. Based on this, and considering that the company's accounts receivable involve a diverse range of customers, credit risk is not significantly concentrated in any specific customer.

Cash at bank

The company primarily maintains bank deposit balances with highly reputable banks in Vietnam. Credit risk related to deposit balances at banks is managed according to the company's annual risk management policy. The company's maximum credit risk for items in the financial statements at each reporting period is the carrying amount as presented in the notes to the financial statements. The company perceives the level of credit risk concentration for bank deposits to be low.

Loans and advances to customers

The company manages customer credit risk through policies, procedures, and control processes related to the margin lending and advance payment for securities sales to customers. The company only conducts margin lending with securities eligible for margin trading according to the Margin Lending Regulations and selectively evaluates them based on the company's stock quality assessment principles. Credit limits are controlled based on the value of collateral, the customer's transaction creditworthiness, and control limit criteria.

Except for the financial accounts for which the company has made provisions, the Board of Directors of the company assesses that the remaining financial assets are not impaired, as these financial assets all have good liquidity.

Liquidity risk

Liquidity risk is the risk that the company will have difficulty fulfilling its financial obligations. Liquidity risk arises when the company may not be able to fulfill its debt obligations when these debts fall due, mainly because assets and liabilities have different maturity dates. The maturity of assets and liabilities represents the remaining time of assets and liabilities from the date of financial statement preparation until payment according to the provisions of the contract or issuance terms. For financial assets recognized at a fair value through profit/loss and financial assets available for sale, maturity is determined based on the liquidity (ability to be bought and sold in the short term) of the asset on the market.

The Company monitors liquidity risk by maintaining a level of cash and cash equivalents and bank loans that the Board of General Directors considers sufficient to meet the company's operations to minimize the impact of cash flow fluctuations.

The company believes that the risk concentration for debt repayment is low. The Company has sufficient access to capital resources and loans due within twelve (12) months may be rolled over with existing lenders.

6. POLICIES ON THE VALUATION OF FINANCIAL ASSETS IN THE LIST OF FINANCIAL ASSETS OF THE COMPANY

None
