MEETING AGENDA

1- OPENING SPEECH BY THE CHAIRMAN OF THE BOARD (Mr. Bui Van My presents).

2- MR. LAM THONG NHUT – DEPUTY DIRECTOR: Report on the situation and results of the implementation of the 2025 production and business plan, as follows:

2.1 Business Environment 2025:

The global geopolitical situation has been volatile, exerting direct impacts on crude oil prices and the cost of raw materials for production and business activities throughout 2025.

The exchange rate of the U.S. dollar increased significantly, from VND 25,000/USD to VND 26,500/USD.

The number of storms and tropical depressions was higher than in 2024, significantly impacting the fisheries and agriculture sectors in the Central and Northern provinces.

The domestic netting industry faced intense competition from low-priced imported products, making the production and consumption of yarn and fishing nets more difficult.

Weather fluctuations affected fishing grounds, leading to changes in demand for materials and fishing gear.

The market for fishing yarns and nets recorded a slight increase in consumption compared with the same period in 2025.

Given the labor-intensive nature of the industry, workforce fluctuations had a considerable impact on the Company's production activities, and recruitment efforts encountered significant challenges.

In 2025, the Company completed the transfer of its factory in Trang Bang Industrial Park, Tay Ninh Province in accordance with the resolutions of the Extraordinary General Meeting of Shareholders in 2024 and 2025. The Company carried out and completed the renovation of two factories there in October 2025, completed the fire protection system in December 2025, relocated part of its machinery and equipment from the Trung My Tay Ward factory to the Trang Bang Industrial Park factory, and gradually organized operations and stabilized production at this facility.

In 2025, the Company continued its production and business operations at existing factories, while also renovating the newly transferred factory and relocating machinery and equipment there, gradually establishing production lines and stabilizing overall operations across the Company.

2.2 Board of Directors and Board of Supervisors Report:

The Board of Directors has held regular meetings in accordance with the Company's Charter.

The Board of Directors has performed its duties in making decisions, setting directions, and policies in line with the Company's operations - ensuring compliance with both the Company's Charter and current laws.

Based on the resolutions approved by the Annual General Meeting of Shareholders in 2025, the Board of Directors has developed plans and policies for implementation in each period, assigning the Company's CEO to carry them out under the supervision and control of the Board of Supervisors.

The Board of Directors has reviewed and approved:

- The Company's quarterly business production plan.
- Quarterly, semi-annual, nine-month, and annual financial reports.
- Investment projects for machinery and equipment – purchases and asset disposals.
- Decision to adjust the unit wage rates for products to align with the company's production and business conditions in 2025..
- Decision to organize and implement matters related to the transfer of land use rights and factory facilities at Trang Bang Industrial Park, including the renovation of facilities, relocation of machinery and equipment, and the organization of production activities in line with the Company's operating conditions at the new location.
- Organizing the Annual General Meeting of Shareholders, reporting, and presenting matters related to production and business activities for approval by the General Meeting of Shareholders.

In 2025, the Board of Directors carefully implemented the resolutions of the General Meeting of Shareholders, organizing and managing activities with the aim of ensuring efficiency and benefits for the Company and its shareholders.
