Accrued interest (for debt securities with interest payment in arrears) and deferred interest (for debt securities with interest payment in advance) are recognized in a separate account. Discount/premium, which is the difference between the cost and the amount being the par value plus (+) accrued interest (if any) or minus (-) deferred interest (if any) is also recognized in a separate account.

In subsequent periods, these securities are continuously recorded at par value, and the discount/premium (if any) is amortized to the separate income statement on a straight-line basis over the remaining term of securities. 8. Principles and Methods for Recognizing Corporate Income Tax and Deferred Tax Expenses:

Corporate income tax expense represents the sum of the current corporate income tax expense and deferred tax.

The current corporate income tax expense is based on taxable profit for the period. Taxable profit differs from profit before tax as reported in the interim separate statement of profit or loss because it excludes items of income or expense that are taxable or deductible in other periods (including loss carried forward, if any) and it further excludes items that are never taxable or deductible.

Deferred tax is recognized on temporary differences between carrying amounts of assets and liabilities in the interim separate financial statements and the corresponding tax bases.

Deferred tax liabilities are generally recognized for all taxable temporary differences, unless they occurred from the initial recognition of an asset or liability of a transaction which has no impact on accounting profit or taxable profit/(loss) at the transaction date. Deferred tax assets are recognized to the extent that it is probable that taxable profit will be available against which deductible temporary differences can be utilized.

Deferred tax is calculated at the tax rates that are expected to apply in the year when the liability is settled or the asset is realized. Deferred tax is charged or credited to interim separate statement of profit or loss, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same tax authority and the Bank intends to settle its current tax assets and liabilities on a net basis.

The determination of the current corporate income tax expense is based on the current interpretation of tax regulations. However, these regulations are subject to periodic variation and their ultimate determination depends on the results of the tax authorities' examinations.

Other taxes are paid in accordance with the prevailing tax laws in Vietnam.

9. Accounting of borrowings, issued debt securities, equity instruments

- Principle of recognizing borrowing costs: Borrowings are presented in accordance with the accounting standard "borrowing cost"

- Issued bonds (valuable papers) are presented at the Separate Statement of financial position by net value (determined by Par value of Valuable papers (-) Discount of valuable papers (+) Premium amount of valuable papers. Accrued interest are calculated by straight-line basis.

10. Equity

10.1 Ordinary shares

Ordinary shares are classified as equity.

10.2 Share premium

On receipt of capital from shareholders, the difference between the issuance price and the par value of the shares is recorded as share premium in equity. Direct costs related to the issuance of ordinary shares are recognized as a deduction from the share premium.

10.3 Treasury stock

On redemption of issued shares, the total amount of payment including direct costs related to the redemption, after deduction of taxes, is recognized as treasury shares and stated as a decrease in owners' equity.

10.4 Reserves and uses of funds from profits after tax

Reserves are used for specific purposes and deducted from the Bank's profit after tax, based on the prescribed ratios in the following order:

- Chartered capital supplementary reserve: 10% of after-tax profits shall be allocated, as stipulated in the Law on Credit Institutions No. 32/2024/QH15 issued by the National Assembly on January 18, 2024. The balance of the Reserve Fund for Supplementary Charter Capital shall not exceed the bank's charter capital;

22. RISK MANAGEMENT POLICIES RELATED TO FINANCIAL INSTRUMENTS

On 29 November 2019, the Governor of the State Bank of Vietnam signed Decision No. 2505/QĐ-NHNN, which recognizes the Joint Stock Commercial Bank for Investment and Development of Vietnam to implement Circular No. 41/2016/TT- NHNN dated 30 December 2016 ahead of time, starting from 01 December 2019. In addition to implementing to meet the SBV's requirements on Risk Management ("RM"), with the support of consulting units, the Bank also always actively researches and develops risk management to meet the requirements of internal management and follow good practices in the world.

Market risk management, the interest rate of bank book, and liquidity are centrally managed at the head office with the organizational structure set up according to the model of 3 defense lines. The Bank has issued a complete system of policies, regulations and professional guidance manuals.

Portfolios with market risk exposures are subject to mark-to-market or mark-to-model valuations on a daily basis. The Bank has developed market risk measurement tools including position, actual and expected gains and loss, sensitivity indicators (BPV, duration, etc.); Value at risk (VaR); Endurance test (Stress test) and capital requirements for market risks. Data sources and market risk measurement models are reviewed, hypothesis testing of VaR models and testing of market risk tolerance are also conducted regularly. A limit system is set up and monitored to control daily market risk, including quantitative limits (position, stop-loss, BPV, VaR) and qualitative limit (product, currency, term, etc.). The minimum required capital for market risk is determined by methods regulated by the SBV in accordance with Circular No. 41/2016/TT-NHNN dated 30 December 2016.

In order to manage credit risk, the Bank has issued and implemented internal credit policies and procedures. The Bank manages liquidity risk on the principle of ensuring the compliance with the regulations of the State Bank in the activities of credit institutions, maintaining the appropriate size and quality of highly liquid assets to ensure payment safety at all times. The measurement of liquidity risk is done through the cash flow method (liquidity gap) and the index method (including the set of indicators prescribed by the State Bank and the internal indicators); liquidity resistance test is done every 6 months. The bank has set up a limit system/warning threshold corresponding to the indicators.

Banking book interest rate risk is measured by assessing the impact on the Bank's net interest income (NII) and economic value of equity (EVE). Accordingly, the Bank establishes limits/warning thresholds of interest rate repricing gap, changes in net interest income, duration gap and fluctuations in economic value of equity to control potential impacts of banking book interest rate risk. At the same time, the Bank performs a capital endurance test against banking book interest rate risk with a method based on the advice from consultants.

The Bank has implemented application programs to automate the measurement, monitoring, and reporting of market risks, the interest rate of bank books and liquidity. The internal reporting system on market risk management, bank book interest rates, and liquidity is implemented daily, quarterly and irregularly in accordance with the regulations of the State Bank, meeting the requirements of internal management.

Thực hiện theo quy định trên, Ngân hàng TMCP Đầu tư và Phát triển Việt Nam (BIDV) giải trình biến động lợi nhuận như sau: “Lợi nhuận sau thuế riêng lẻ và Lợi nhuận sau thuế hợp nhất Quý 1 năm 2026 tăng so với cùng kỳ năm trước do ngân hàng gia tăng thu nhập thuần từ lãi, thu dịch vụ rỗng và đẩy mạnh hoạt động thu nợ đã xử lý rủi ro”.¹

In compliance with the above regulation, Joint Stock Commercial Bank for Investment and Development of Vietnam, JSC. provides the following explanation for the profit fluctuations: “The separate after-tax profit and consolidated after-tax profit for Quarter I year 2026 increased, compared to the previous year driven by the Bank’s growth in net interest income, net income from services and strengthened the recovery of written-off debts.”¹
