 - The ownership ratio: 20%

II. FISCAL YEAR AND ACCOUNTING CURRENCY

1. Fiscal year

The fiscal year of the Company is from 01 January to 31 December annually.

2. Accounting currency unit

The accounting currency unit is Vietnamese Dong (VND) because the Company's transactions are primarily made in VND.

III. ACCOUNTING STANDARDS AND SYSTEM

1. Accounting System

The Company applies the Vietnamese Accounting Standards and System, which were issued together with the Circular No. 99/2025/TT-BTC dated 27 October 2025 as well as other Circulars guiding the implementation of Vietnamese Accounting Standards of the Ministry of Finance in the preparation and presentation of Financial Statements.

2. Statement of the compliance with the Accounting Standards and System

The General Director ensures to follow all the requirements of the Vietnamese Accounting Standards and System, which were issued together with the Circular No. 99/2025/TT-BTC dated 27 October 2025 as well as other Circulars guiding the implementation of Vietnamese Accounting Standards of the Ministry of Finance in the preparation and presentation of Financial Statements.

IV. ACCOUNTING POLICIES

1. Accounting convention

All the Consolidated Financial Statements are prepared on the accrual basis (except for the information related to cash flows).

2. Consolidation bases

The Consolidated Financial Statements include the Financial Statements of the Parent Company and those of its subsidiaries. A subsidiary is an enterprise that is controlled by the Parent Company. The control exists when the Parent Company has the power to directly or indirectly govern the financial and operating policies of the subsidiary to obtain economic benefits from its activities. In determining the control power, the potential voting right arising from options or debt and capital instruments that can be converted into common shares as of the balance sheet date should also be taken into consideration.

The financial performance of subsidiaries, which is bought or sold during the year, are included in the Consolidated Income Statement from the date of acquisition or until the date of selling investments in those subsidiaries.

The Financial Statements of the Parent Company and those of subsidiaries used for consolidation are prepared in the same fiscal year and apply consistently accounting policies to the same types of transactions and events in similar circumstances. In the case that the accounting policy of a subsidiary is different from the accounting policy applied consistently in the Group, the Financial Statements of that subsidiary will be properly adjusted before being used for the preparation of the Consolidated Financial Statements.

Intra-group balances in the Financial Statement and intra-group transactions and unrealized profits resulting from these transactions must be completely eliminated. Unrealized losses resulting from intra-group transactions are also eliminated unless costs cannot be recovered.

Benefits of non-controlling shareholders reflect profit or loss and net assets of subsidiary, which are not held by the Group and presented in a separate item of the Consolidated Income Statement and Consolidated Financial Statement (classified under "Owner's equity"). Benefits of non-controlling shareholders include the values of their non-controlling benefits at the initial date of business combination and those arise within the ranges of changes in owner's equity from the date of business combination. The losses arising in the subsidiaries are attributed equally to the ownership rate of non-controlling shareholders, even if such losses are higher than the interest owned by these shareholders in net assets of the subsidiaries.

In case where subsidiaries raise capital from the owners, if the additional capital contribution rate of the involved parties is not in correspondence with the current capital ownership rate, the difference between the additional capital contribution rate of the Group and the increase of the ownership share in the subsidiaries' net assets is recorded into item "Retained earnings" on the Consolidated Balance Sheet.

3. Foreign currency transactions

Transactions denominated in foreign currency are converted using the actual exchange rate applicable on the date the transaction occurs. Exchange rate differences arising from these transactions are recognized as income or expense in the statement of income.

Assets and liabilities denominated in foreign currency, and foreign currency deposits in banks as of the date of the statement of financial position, are converted using the approximate exchange rate (difference not exceeding +/-1% compared to the average transfer buying/selling rate) of the commercial bank where transactions are regularly conducted as of the date of the statement of financial position. The use of approximate exchange rates does not materially affect the financial statements. Exchange rate differences arising from this conversion are recognized as income or expense in the statement of financial position.

4. Cash and cash equivalents

Cash includes cash on hand and demand deposits in banks. Cash equivalents are short-term investments of which the due dates cannot exceed 3 months from the dates of the investments and the convertibility into cash is easy, and which do not have a lot of risks in the conversion into cash as of the balance sheet date.

5. Financial investments

Investment in associates

The Group's investment in associates is accounted for using the equity method of accounting. An associate is an entity in which the Group has significant influence and which is neither a subsidiary nor a joint venture. The Group generally deems they have significant influence if they have over 20% of the voting rights.

Under the equity method, the investment is carried in the consolidated Financial Statement at cost plus post acquisition changes in the Group's share of net assets of the associates. Goodwill arising on acquisition of the associate is included in the carrying amount of the investment. Goodwill is not amortised and subject to annual review for impairment. The consolidated income statement reflects the share of the post-acquisition results of operation of the associate.

The share of post-acquisition profit (loss) of the associates is presented on face of the consolidated income statement and its share of post-acquisition movements in reserves is recognised in reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. Dividend/profit sharing receivable from associates reduces the carrying amount of the investment.

The financial statements of the associates are prepared for the same reporting year and use the same accounting policies as the Group. Where necessary, adjustments are made to bring the accounting policies in line with those of the Group.

Held-to-maturity investments

Investments are classified as held-to-maturity investments that the Company intends and is able to hold to maturity. Held-to-maturity investments include term deposits.

Held-to-maturity investments are initially recognized at cost including the purchase cost and other transaction costs. After initial recognition, these investments are recorded at recoverable value. Interest from these held-to-maturity investments after acquisition date is recognized in the profit or loss on the basis of the interest income to be received. Interests arising prior to the Company's acquisition of held-to-maturity investments are recorded as a decrease in the costs as at the acquisition time.

When there are reliable evidences proving that a part or the whole investment cannot be recovered and the loss are reliably determined, the loss is recognized as financial expenses during the year while the investment value is derecognized.

Provision for diminution in value of investments

Provision of the investment is made when there is reliable evidence of the diminution in value of those investments at the balance sheet date. Increases or decreases to the provision balance are recorded as finance expense in the consolidated income statement.

6. Receivables

Receivables are recognized at the carrying amounts.

The classification of receivables as trade receivables and other receivables is made according the following principles:

- Trade receivables reflect receivables concerning the commercial nature arising from purchase and sale transactions between the Company and customers who are independent to the Company.
- Other receivables reflect receivables not concerning the commercial nature and irrelevant to purchase and sale transactions.

Allowance is made for each doubtful debt on the basis of the ages of debts after offsetting against liabilities (if any) or estimated loss as follows:

- As for overdue debts:
 - 30% of the value of debts overdue between more than 6 months and less than 1 year.
 - 50% of the value of debts overdue between 1 year and less than 2 years.
 - 70% of the value of debts overdue between 2 years and less than 3 years.
 - 100% of the value of debts overdue more than 3 years.
- As for doubtful debts: Allowance is made on the basis of the estimated loss.

Increases/(decreases) in the obligatory allowance for doubtful debts as of the balance sheet date are recorded into "General and administration expenses".

7. Prepaid expenses

Prepaid expenses comprise actual expenses arising and relevant to financial performance in several accounting periods.

8. Tangible fixed assets

Tangible fixed assets are determined by their historical costs less accumulated depreciation. Historical costs of tangible fixed assets include all the expenses paid by the Company to bring the asset to its working condition for its intended use. Other expenses arising subsequent to initial recognition are included into historical costs of fixed assets only if it can be clearly demonstrated that the expenditure has resulted in future economic benefits expected to be obtained from the use of these assets. Those which do not meet the above conditions will be recorded into operation costs during the year.

When a tangible fixed asset is sold or disposed, its historical cost and accumulated depreciation are written off, then any gain or loss arising from such disposal is included in the income or the expenses during the year.

Tangible fixed assets are depreciated in accordance with the straight-line method over their estimated useful lives. The depreciation years applied are as follows:

<u>Fixed assets</u>	<u>Years</u>
Buildings and structures	15
Vehicles	06 - 10
Office equipment	03 - 05

9. Intangible fixed assets

Intangible fixed assets are determined by their initial costs less accumulated amortization.

Initial costs of intangible fixed assets include all the costs paid by the Company to bring the asset to its working condition for its intended use. Other costs relevant to intangible fixed assets arising subsequent to initial recognition are included into operation costs during the year only if these costs are associated with a specific intangible fixed asset and result in future economic benefits expected to be obtained from the use of these assets.

When an intangible fixed asset is sold or disposed, its initial costs and accumulated amortization are written off, then any gain or loss arising from such disposal is included in the income or the expenses during the year.

The Company's intangible fixed asset includes computer software. Purchase price of computer software, which is not a part associated with the relevant hardware, will be capitalized. Initial costs of computer software include all the expenses paid by the Company until the date the software is put into use. Computer software is amortized in accordance with the straight-line method from 3 - 10 years.

10. Payables and accrued expenses

Payables and accrued expenses are recorded for the amounts payable in the future associated with the goods and services received. Accrued expenses are recorded based on reasonable estimates for the amounts payable.

The classification of payables as trade payables, accrued expenses, and other payables is made on the basis of following principles:

- Trade payables reflect payables of commercial nature arising from the purchase of goods, services, or assets, of which the seller is an independent entity with the Company.
- Accrued expenses reflect expenses for goods, services received from suppliers or supplied to customers but have not been paid, invoiced or lack of accounting records and supporting documents; pay on leave payable to employees; and accrual of operation expenses.
- Other payables reflect payables of non-commercial nature and irrelevant to purchase, sales of goods or provisions of services.

The payables and accrued expenses are classified as short-term and long-term items in the Consolidated Balance Sheet on the basis of their remaining term as of the balance sheet date.

11. Capital

Capital is recorded according to the actual amounts invested by the members.

12. Profit distribution

Profit after tax is distributed to the members after appropriation for funds under the Charter of the Company as well as legal regulations and approved by the Board of Members.

The distribution of profits to the members is made with consideration toward non-cash items in the retained earnings that may affect cash flows and payment of profit such as profit due to revaluation of assets contributed as investment capital, profit due to revaluation of monetary items, financial instruments and other non-cash items.

Profit is recorded as payables upon approval of the Board of Members.

13. Recognition of sales and income

Sales of service provision

Sales of service provision shall be recognized when all of the following conditions are satisfied:

- The amount of sales can be measured reliably. When the contract stipulates that the buyer is entitled to return the services provided under specific conditions, sales is recognized only when these specific conditions are no longer existed and the buyer is not entitled to return the services provided.
- The Company received or shall probably receive the economic benefits associated with the provision of services.
- The stage of completion of the transaction at the end of reporting period can be measured reliably.
- The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

In the case that the services are provided in several accounting periods, the determination of sales is done on the basis of the volume of work done as of the balance sheet date.

Interest

Interest is recorded, based on the term and the actual interest rate applied in each particular period.

14. Revenue deductions

Revenue deductions only include service discounts arising in the same period of service provision, which are adjusted to reduce revenue in the arising period.

In case the service has been provided in previous years, but service discounts only arise this year, revenue is recorded as a reduction according to the following principles:

- If the service discount arises before the issuance of the Financial Statement: record a reduction in revenue on the Financial Statement of this year.

- If the service discount arises after the issuance of the Financial Statement: record a reduction in revenue on the Financial Statement of the following year.

15. Borrowing costs

Borrowing costs are interests and other costs that the Company directly incurs in connection with the borrowing.

Borrowing costs are recorded as an expense when it is incurred. In case the borrowing costs are directly attributable to the construction or the production of an asset in progress, which takes a substantial period of time (over 12 months) to get ready for intended use or sales of the asset, these costs will be included in the cost of that asset. To the extent that the borrowings are especially for the purpose of construction of fixed assets and investment properties, the borrowing cost is eligible for capitalization even if construction period is under 12 months. Incomes arisen from provisional investments as loans are recognized as a decrease in the costs of relevant assets.

In the event that general borrowings are partly used for the acquisition, construction or production of an asset in progress, the costs eligible for capitalization will be determined by applying the capitalization rate to average accumulated expenditure on construction or production of that asset. The capitalization rate is computed at the weighted average interest rate of the borrowings not yet paid during the period, except for particular borrowings serving the purpose of obtaining a specific asset.

16. Expenses

Expenses are those that result in outflows of the economic benefits and are recorded at the time of transactions or when incurrence of the transaction is reliable regardless of whether payment for expenses is made or not.

Expenses and their corresponding revenues are simultaneously recognized in accordance with matching principle. In the event that matching principle conflicts with prudence principle, expenses are recognized based on the nature and regulations of accounting standards in order to guarantee that transactions can be fairly and truly reflected.

17. Corporate income tax

Corporate income tax includes current income tax and deferred income tax.

Current income tax

Current income tax is the tax amount computed based on the taxable income. Taxable income is different from accounting profit due to the adjustments of temporary differences between tax and accounting figures, non-deductible expenses as well as those of non-taxable income and losses brought forward.

Deferred income tax

Deferred income tax is the amount of corporate income tax payable or refundable due to temporary differences between book values of assets and liabilities serving the preparation of the Consolidated Financial Statements and the values for tax purposes. Deferred income tax liabilities are recognized for all the temporary taxable differences. Deferred income tax assets are recorded only when there is an assurance on the availability of taxable income in the future against which the temporarily deductible differences can be used.

Carrying values of deferred corporate income tax assets are considered as of the balance sheet date and will be reduced to the rate that ensures enough taxable income against which the benefits from part of or all of the deferred income tax can be used. Deferred corporate income tax assets, which have not been recorded before, are considered as of the balance sheet date and are recorded when there is certainly enough taxable income to use these unrecognized deferred corporate income tax assets.

Deferred income tax assets and deferred income tax liabilities are determined at the estimated rate to be applied in the year when the assets are recovered or the liabilities are settled based on the effective tax rates as of the balance sheet date. Deferred income tax is recognized in the Income Statement. In the case that deferred income tax is related to the items of the owner's equity, corporate income tax will be included in the owner's equity.

The Company shall offset deferred tax assets and deferred tax liabilities if:

- The Company has the legal right to offset current income tax assets against current income tax liabilities; and
- Deferred income tax assets and deferred income tax liabilities are relevant to corporate income tax which is under the management of one tax authority either:
 - Of the same subject to corporate income tax; or
 - The Company has intention to pay current income tax liabilities and current income tax assets on a net basis or recover tax assets and settle tax liability simultaneously in each future period to the extent that the majority of deferred income tax liabilities or deferred income tax assets are paid or recovered.

18. Related parties

A party is considered a related party of the Company in case that party is able to control the Company or to cause material effects on the financial decisions as well as the operations of the Company. A party is also considered a related party of the Company in case that party is under the same control or is subject to the same material effects.

Considering the relationship of related parties, the nature of relationship is focused more than its legal form.
