Responsibilities of the Board of Management

The Company's Board of Management is responsible for the preparation of the Interim Consolidated Financial Statement for the First Quarter 2026 to give a true and fair view of the combined financial position, the financial performance and the cash flows of the Company during the year. In order to prepare these Consolidated Financial Statements, the Board of Management must:

- Select appropriate accounting policies and apply them consistently;
- Make judgments and estimates reasonably and prudently;
- State clearly whether the accounting standards applied to the Company are followed or not, and all the material differences from these standards are disclosed and explained in the Combined Financial Statements;
- Prepare the Combined Financial Statements of the Company on the going-concern basis, except for the cases that the going-concern assumption is considered inappropriate;
- Design and implement effectively the internal control system to minimize the risks of material misstatements due to frauds or errors in the preparation and presentation of the Combined Financial Statements.

The Board of Management hereby ensures that all the proper accounting books of the Company have been fully recorded and can fairly reflect the financial position of the Company at any time, and that all the accounting books have been prepared in compliance with the applicable Accounting System. The Board of Management is also responsible for managing the Company's assets and consequently has taken appropriate measures to prevent and detect frauds and other irregularities. The Board of Management hereby commits to the compliance with the aforementioned requirements in preparation of the Interim Consolidated Financial Statement.

Approval of the Interim Consolidated Financial Statement for the First Quarter 2026

The Board of Directors hereby approves the accompanying Combined Financial Statements, which give a true and fair view of the Interim Consolidated Financial Statement for the First Quarter 2026 of the Company, its combined financial performance and its combined cash flows for the fiscal year then ended, in conformity with the Vietnamese Accounting Standards, the Vietnamese Enterprise Accounting System and relevant statutory requirements on the preparation and presentation of Combined Financial Statements.

Notes to the Consolidated Financial Statements (continue)

202/2014/TT-BTC dated 22 December 2014, as well as other circulars issued by the Ministry of Finance guiding the implementation of accounting standards in the preparation and presentation of Consolidated Financial Statements.

The provisions of Circular 99 apply to bookkeeping, preparation and presentation of the Financial Statements for fiscal years commencing on 1 January 2026.

IV. APPLICABLE ACCOUNTING POLICIES

1. Accounting convention

All the Consolidated Financial Statements are prepared on the accrual basis (except for the information related to cash flows).

2. Consolidation bases

The Consolidated Financial Statements include the Combined Financial Statements of the Parent Company and those of its subsidiary. A subsidiary is an enterprise that is controlled by the Parent Company. The control exists when the Parent Company has the power to directly or indirectly govern the financial and operating policies of the subsidiary to obtain economic benefits from its activities. In determining the control power, the potential voting right arising from options or debt and capital instruments that can be converted into common shares as of the balance sheet date should also be taken into consideration.

The financial performance of subsidiary, which is bought or sold during the year, is included in the Consolidated Income Statement from the date of acquisition or until the date of disposing investments in those subsidiary.

The Consolidated Financial Statements of the Parent Company and those of subsidiaries used for consolidation are prepared in the same accounting period and apply consistently accounting policies to the same types of transactions and events in similar circumstances. In the case that the accounting policy of a subsidiary is different from the accounting policy applied consistently in the Group, the Financial Statements of that subsidiary will be properly adjusted before being used for the preparation of the Consolidated Financial Statements.

Intra-group balances in the Balance Sheet and intra-group transactions and unrealized profits resulting from these transactions must be completely eliminated. Unrealized losses resulting from intra-group transactions are also eliminated unless costs cannot be recovered.

Non-controlling interests (NCI) reflect profit or loss and net assets of the subsidiaries, which are not held by the Group and presented in a separate item of the Consolidated Income Statement and the Balance Sheet (classified under owner's equity). Non-controlling interests (NCI) include the values of their non-controlling benefits at the initial date of business combination and those arising within the ranges of changes in owner's equity from the date of business combination. Losses incurred by subsidiaries are allocated to non-controlling interests in proportion to their ownership interests, even if such losses exceed the non-controlling interests' share of the net assets of the subsidiaries.

3. Foreign currency transactions

Transactions denominated in foreign currencies are converted at the exchange rates ruling as of the transaction dates. The balances of monetary items denominated in foreign currencies at the end of the financial year are converted at the exchange rates prevailing on that date.

Foreign exchange differences arising from foreign currency transactions during the year are recognized in financial income or financial expenses. Foreign exchange differences arising from the revaluation of foreign currency-denominated monetary items at the end of the financial year, after netting off increases and decreases, are recognized in financial income or financial expenses.

The exchange rate used to convert foreign currency transactions is the actual exchange rate ruling as at the time of these transactions. The actual exchange rates applied to foreign currency transactions are determined as follows:

- For foreign currency trading contracts (including spot contracts): the exchange rate stipulated in the foreign currency trading contracts between the Company and the bank.
- For receivables: the buying rate of the commercial bank where the Company designates customers to make payments at the time of the transaction.
- For payables: the selling rate of the commercial bank where the Company expects to make payments at the time of the transaction.

The exchange rates used to re-evaluate the ending balances of monetary items denominated in foreign currencies at the end of the financial year are determined according to the following principles:

- For foreign currency deposits: the buying rate of the bank where the Company opens its foreign currency accounts.
- For monetary items denominated in foreign currencies classified as other assets: the buying rate of Military Commercial Joint Stock Bank – Saigon Branch (the bank with which the Group frequently conducts transactions).
- For monetary items denominated in foreign currencies classified as liabilities: the selling rate of Military Commercial Joint Stock Bank – Saigon Branch (the bank with which the Group frequently conducts transactions).

4. Cash and cash equivalents

Cash include cash on hand and cash in bank. Cash equivalents are short-term investments of which the due dates do not exceed 03 months from the dates of the investments that are readily convertible into known amounts of cash and that are subject to an insignificant risk of change in value as of the balance sheet date.

5. Financial investments

Investments in Associates Associates

An associate is an entity over which the Company has significant influence but not control over its financial and operating policies. Significant influence is demonstrated by the right

to participate in decisions regarding the financial and operating policies of the investee but not to control these policies.

Investments in associates are accounted for using the equity method. Accordingly, investments in associates are presented in the Consolidated Financial Statements at initial investment cost, adjusted for changes in the Group's share of the associate's net assets after the date of investment. If the Group's share of loss of an associate exceeds or equals the carrying amount of an investment, the investment is then reported at nil (0) value on the Consolidated Financial Statements, except when the Group has obligations to pay on behalf of the associate to satisfy obligations of the associate.

The Financial Statements of the associate are prepared for the same accounting period as the Consolidated Financial Statements of the Group. In the case that the accounting policy of an associate is different from the accounting policy applied consistently in the Group, the Financial Statements of that associate will be properly adjusted before being used for the preparation of the Consolidated Financial Statements.

Unrealized gains and losses arising from transactions with associates are eliminated to the extent attributable to the Group when preparing the Consolidated Interim Financial Statements.

Held-to-maturity investments

An investment is classified as a held-to-maturity investment when the Company has the intention and ability to hold it to maturity. The Company's held-to-maturity investments include term deposits for the purpose of collecting periodical interest.

Held-to-maturity investments are initially recognized at cost including the acquisition cost and other transaction costs. After initial recognition, these investments are recorded at recoverable value. Interest income from these held-to-maturity investments after acquisition date is recognized in the Income Statement on an accrual basis. Interest incurred prior to the Company's acquisition of held-to-maturity investments is deducted into the costs as at the acquisition time.

When there are reliable evidence proving that a part or the whole investment cannot be recovered and the loss are reliably determined, the loss is recognized as financial expenses during the year while the investment value is derecognized.

6. Receivables

Receivables are recognized at the carrying amounts less allowances for doubtful debts.

The classification of receivables as trade receivables and other receivables is made according to the following principles:

- Trade receivables reflect receivables concerning the commercial nature arising from purchase and sale transactions between the Group and customers who are independent to the Group.
- Other receivables reflect receivables not concerning the commercial nature and irrelevant to purchase and sale transactions.

Allowance is made for each doubtful debt on the basis of the ages of debts after offsetting against liabilities (if any) or estimated loss as follows:

- As for overdue debts:
 - 30% of the value of debts overdue between 06 months and less than 01 year.
 - 50% of the value of debts overdue between 01 year and less than 02 years.
 - 70% of the value of debts overdue between 02 years and less than 03 years.
 - 100% of the value of debts overdue more than 03 years.
- As for doubtful debts: Allowance is made on the basis of the estimated loss.

Increases/decreases in the obligatory allowance for doubtful debts as of the balance sheet date are recorded into general and administration expenses.

7. Inventories

Inventories are recognized at the lower of cost or net realizable value.

Cost of inventories is determined as follows:

- For materials and merchandises: Costs comprise costs of purchases and other directly relevant costs incurred in bringing the inventories to their present location and conditions.
- Work-in-process: Costs comprise costs of main materials, labor and other directly relevant costs.

Stock-out costs are determined in accordance with the weighted average method and recorded in line with the perpetual method.

Net realizable value is the estimated selling price of inventories in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

Allowance for devaluation of inventories is recognized for each type of inventories when their costs are higher than their net realizable values. Increases/decreases in the obligatory allowance for devaluation of inventories as of the balance sheet date are recorded into costs of sales.

8. Prepaid expenses

Prepaid expenses comprise actual expenses incurred and relevant to financial performance in several accounting periods. Prepaid expenses of the Group mainly include expenses of tools, expenses of fixed asset repairs, and insurance premiums. These prepaid expenses are allocated over the prepayment period or period in which corresponding benefits are realized.

Tools

Expenses of tools being put into use are allocated into costs in accordance with the straight-line method for the maximum period of 03 years.

Expenses of fixed asset repairs

Expenses of fixed asset repairs incurred once with high value are allocated into costs in accordance with the straight-line method in 03 years.

Insurance premiums

Insurance premiums are allocated into costs in accordance with the straight-line method over the allocation period corresponding to the term of insurance policies.

9. Tangible fixed assets

Tangible fixed assets are presented at cost less accumulated depreciation. Historical costs of tangible fixed assets comprise all costs incurred by the Group to acquire the assets up to the time when they are brought to the condition necessary for their intended use. Subsequent costs are added to historical costs of fixed assets only if it is probable that future economic benefits associated with the asset will flow to the Group. Subsequent costs that do not meet the above conditions will be recognized as operation costs during the year.

Upon disposal or liquidation of a tangible fixed asset, its cost and accumulated depreciation are derecognized, then any gain or loss resulting from such disposal is included in the income or the expenses during the year.

Tangible fixed assets are depreciated in accordance with the straight-line method over their estimated useful lives. The depreciation years applied are as follows:

<u>Fixed assets</u>	<u>Years</u>
Machinery and equipment	03
Vehicles	05–10

10. Payables and accrued expenses

Payables and accrued expenses are recorded for the amounts payable in the future associated with the goods and services received. Accrued expenses are recorded based on reasonable estimates for the amounts payable.

The classification of payables into trade payables, accrued expenses and other payables is carried out according to the following principles:

- Trade payables reflect amounts payable of a commercial nature arising from transactions for purchase of goods, services and assets with suppliers that are independent from the Group.
- Accrued expenses reflect expenses for goods, services received from suppliers or supplied to customers but have not been paid due to lack of invoices or insufficient accounting records and supporting documents; pay on leave payable to employees; and accrual of operation expenses.
- Other payables reflect amounts payable of a non-commercial nature, not relating to transactions for purchase and sale or provision of goods and services.

Payables and accrued expenses are classified as short-term and long-term items in the Balance Sheet on the basis of their remaining term as of the balance sheet date.

11. Owner's equity

Owner's capital

The owner's capital is recorded according to the actual amounts invested by shareholders of the Parent Company.

Share premiums

Share premiums are recorded in accordance with the difference between the issuance price and face value upon the IPO, additional issue or the difference between the re-issuance price and carrying value of treasury shares and the equity component of convertible bonds upon maturity date. Expenses directly related to the additional issue of shares and the re-issuance of treasury shares are recorded as a decrease in share premiums.

12. Profit distribution

Profit after tax is distributed to the shareholders after appropriation for funds under the Charter of the Company as well as legal regulations and approved by the General Meeting of Shareholders of the Parent Company.

The distribution of profits to the shareholders is made with consideration toward non-cash items in the retained earnings that may affect cash flows and payment of dividends such as profit due to revaluation of assets contributed as investment capital, profit due to revaluation of monetary items, financial instruments and other non-cash items.

Dividend is recorded as a payable when it is approved by the General Meeting of Shareholders of the Parent Company and notification of dividend payment by the Board of Directors.

13. Recognition of revenue and income

Revenue from sales of merchandise

Revenue from sales of merchandises shall be recognized when all of the following conditions are satisfied:

- The Group transfers most of risks and benefits incident to the ownership of merchandise to customers.
- The Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the merchandise sold.
- The amount of sales can be measured reliably. When the contracts stipulate that buyers have the right to return merchandise purchased under specific conditions, sales are recorded only when those specific conditions are no longer exist and buyers retains no right to return merchandise (except for the case that such returns are in exchange for other goods or services).
- The Group received or shall probably receive the economic benefits associated with sale transactions.
- The cost incurred or to be incurred in respect of the sale transaction can be measured reliably.

Revenue from provisions of services

Revenue from provisions of services shall be recognized when all of the following conditions are satisfied:

- The amount of revenue can be measured reliably. When the contract stipulates that the buyer is entitled to return the services provided under specific conditions, the revenue is recognized only when these specific conditions are no longer existed and the buyer is not entitled to return the services provided.
- The Group received or shall probably receive the economic benefits associated with the provision of services.

- The stage of completion of the transaction at the end of reporting period can be measured reliably.
- The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

In the case that the services are provided in several accounting periods, the determination of revenue is done on the basis of the volume of work done as of the balance sheet date.

Interest

Interest is recorded, based on the term and the actual interest rate applied in each particular period.

14. Borrowing costs

Borrowing costs are interests and other costs that the Group directly incurs in connection with the borrowing.

Borrowing costs are recorded as an expense when it is incurred. In case the borrowing costs are directly attributable to the construction or the production of an asset in progress, which takes a substantial period of time (over 12 months) to get ready for intended use or sales of the asset, these costs will be included in the cost of that asset. To the extent that the borrowings are especially for the purpose of construction of fixed assets and investment properties, the borrowing cost is eligible for capitalization even if construction period is under 12 months. Incomes arisen from provisional investments as loans are recognized as a decrease in the costs of relevant assets.

In the event that general borrowings are partly used for the acquisition, construction or production of an asset in progress, the costs eligible for capitalization will be determined by applying the capitalization rate to average accumulated expenditure on construction or production of that asset. The capitalization rate is computed at the weighted average interest rate of the borrowings not yet paid during the year, except for particular borrowings serving the purpose of obtaining a specific asset.

15. Expenses

Expenses are those that result in outflows of the economic benefits and are recorded at the time of transactions or when incurrence of the transaction is reliable regardless of whether payment for expenses is made or not.

Expenses and their corresponding revenues are simultaneously recognized in accordance with matching principle. In the event that matching principle conflicts with prudence principle, expenses are recognized based on the nature and regulations of accounting standards in order to guarantee that transactions can be fairly and truly reflected.

16. Corporate income tax

Corporate income tax includes current income tax and deferred income tax.

Current income tax

Current income tax is the tax amount computed based on the assessable income. The assessable income is different from accounting profit due to the adjustments of temporary

differences between tax and accounting figures, non-deductible expenses as well as those of non-taxable income and losses brought forward.

Deferred income tax

Deferred income tax is the amount of corporate income tax payable or refundable due to temporary differences between book values of assets and liabilities serving the preparation of the Financial Statements and the values for tax purposes. Deferred income tax liabilities are recognized for all the temporary taxable differences. Deferred income tax assets are recorded only when there is an assurance on the availability of assessable income in the future against which the temporarily deductible differences can be used.

Carrying values of deferred corporate income tax assets are considered as of the balance sheet date and will be reduced to the rate that ensures enough assessable income against which the benefits from part of or all of the deferred income tax can be used. Deferred corporate income tax assets, which have not been recorded before, are considered as of the balance sheet date and are recorded when there is certainly enough assessable income to use these unrecognized deferred corporate income tax assets.

Deferred income tax assets and deferred income tax liabilities are determined at the estimated rate to be applied in the year when the assets are recovered or the liabilities are settled based on the effective tax rates as of the balance sheet date. Deferred income tax is recognized in the Income Statement. In the case that deferred income tax is related to the items of the owner's capital, corporate income tax will be included in the owner's capital.

The Group shall offset deferred tax assets and deferred tax liabilities if:

- The Group has the legal right to offset current income tax assets against current income tax liabilities; and
- Deferred income tax assets and deferred income tax liabilities are relevant to corporate income tax which is under the management of one tax authority either:
 - Of the same subject to corporate income tax; or
 - The Group has intention to pay current income tax liabilities and current income tax assets on a net basis or recover tax assets and settle tax liability simultaneously in each future period to the extent that the majority of deferred income tax liabilities or deferred income tax assets are paid or recovered.

17. Related parties

A party is considered a related party of the Group in case that party is able to control the Group or to cause material effects on the financial decisions as well as the operations of the Group. A party is also considered a related party of the Group in case that party is under the same control or is subject to the same material effects.

Considering the relationship of related parties, the nature of relationship is focused more than its legal form.

18. Segment reporting

A business segment is a distinguishable component of the Group that is engaged in manufacturing or providing products or services and that is subject to risks and returns that are different from those of other business segments.
