REPORT OF THE BOARD OF DIRECTORS (continued)

Legal representative: Mr. Vo Van Phuoc Que

Board of Directors' Responsibility Disclosure for Separate Financial Statements

The Board of Directors is responsible for preparing the Separate financial statements that give a true and fair view of the financial position, results of operations and cash flows of the Company during the period. In preparing the Separate financial statements, the Board of Directors commits to comply with the following requirements:

- Establish and maintain internal controls that the Board of Directors and the Management Board determine are necessary to enable the preparation and presentation of Separate financial statements that are free from material misstatement, whether due to fraud or error;
- Select suitable accounting policies and apply them consistently;
- Make judgements and estimates that are reasonable and prudent;
- State whether the applicable accounting standards have been followed, and whether there are any material departures that need to be disclosed and explained in the Separate Financial Statements;
- Prepare and present the Separate Financial Statements on the basis of compliance with Vietnamese Accounting Standards, Enterprise Accounting Regime and legal regulations related to the preparation and presentation of Separate Financial Statements;
- Prepare the Separate financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Board of Directors of the Company ensures that the accounting records are kept to reflect the financial position of the Company, with a true and fair view at any time and to ensure that the Separate Financial Statements comply with the current regulations of the State. At the same time, it is responsible for ensuring the safety of the Company's assets and taking appropriate measures to prevent and detect fraud and other violations of the Company as at 31 March, 2026, the results of business operations and cash flows for the first quarter of 2026, in accordance with the Accounting Standards, the Vietnamese Enterprise Accounting Regime and comply with the legal regulations related to the preparation and presentation of the Separate Financial Statements.

Other commitments

The Board of Directors is committed to ensuring the Company complies with the Securities Law No. 54/2019/QH14 dated November 26, 2019, the amended Securities Law No. 56/2024/QH15 dated November 29, 2024, and all relevant circulars and decrees guiding its implementation and information disclosure on the securities market.

Can Tho, April 29, 2026

On behalf of the Board of Directors

General Director

Vo Van Phuoc Que

SEPARATE FINANCIAL STATEMENTS

for the first quarter of 2026

Notes to the separate financial statements (continued)

II. FISCAL YEAR, ACCOUNTING CURRENCY USED

1. Fiscal year

The company's fiscal year begins on January 1st and ends on December 31st each year.

2. The currency used in accounting.

The currency used in accounting is the Vietnamese Dong (VND) because most receipts and disbursements are conducted in VND .

III. APPLICABLE ACCOUNTING STANDARDS AND REGULATIONS

1. Applicable accounting standards and regulations

The company applies accounting standards, the Vietnamese Enterprise Accounting System issued under Circular No. 99/2025/TT-BTC dated October 27, 2025, and other circulars guiding the implementation of accounting standards issued by the Ministry of Finance in the preparation and presentation of financial statements.

2. Statement on compliance with Vietnamese accounting standards and accounting regulations

Board of Directors To ensure compliance with accounting standards, the Vietnamese Enterprise Accounting System, issued under Circular No. 99/2025/TT-BTC dated October 27, 2025, and other circulars guiding the implementation of accounting standards issued by the Ministry of Finance, in the preparation of financial statements.

IV. APPLICABLE ACCOUNTING POLICIES

1. Basis for preparing financial statements

Separate financial statements are prepared on an accrual accounting basis (excluding information relating to cash flows).

2. Cash and cash equivalents

Money includes cash on hand and demand deposits.

3. Financial investments

Investments held until maturity

An investment is classified as held to maturity when the Company intends and is able to hold it to maturity. Investments held to maturity include: time deposits (including promissory notes and bills of exchange), bonds, preferred stock that the issuer is obligated to repurchase at a certain point in the future, and loans held to maturity for the purpose of collecting periodic interest, and other investments held to maturity.

Investments held to maturity are initially recognized at cost, including the purchase price and any transaction-related expenses. After initial recognition, these investments are recognized at their recoverable value. Interest income from investments held to maturity after the date of purchase is recognized in the Income Statement on an accrual basis. Interest earned before the Corporation acquires the investment is deducted from the cost at the time of purchase.

EUROPE VIETNAM INTERNATIONAL FERTILIZER JOINT STOCK COMPANY

Address: National Highway 1A, Long An B Hamlet, Dong Phuoc Commune, Can Tho City, Vietnam

SEPARATE FINANCIAL STATEMENTS

for the first quarter of 2026

Notes to the separate financial statements (continued)

When there is conclusive evidence that part or all of the investment may be unrecoverable and the amount of loss can be reliably determined, the loss is recognized as a financial expense in the year and directly deducted from the investment value.

Investments in subsidiaries

Subsidiary company

A subsidiary is a business under the control of a parent company. Control is achieved when the parent company has the ability to control the financial and operational policies of the investee business in order to obtain economic benefits from its activities.

4. Trade receivables and other receivables

Accounts receivable are presented at their book value less any provisions for doubtful accounts.

The classification of receivables into accounts receivable from customers and other receivables is done according to the following principle :

- Accounts receivable from customers reflect commercial receivables arising from purchase-sale transactions between the company and buyers that are independent entities from the parent company , including receivables for export sales consigned to other entities.
- Other receivables reflect non-commercial receivables that are not related to purchase or sale transactions.

Provisions for doubtful receivables are established for each doubtful receivable based on the age of the overdue debt or the projected potential loss, specifically as follows:

- For accounts receivable that are overdue for payment:
 - 30% of the value for accounts receivable that are overdue from 6 months to less than 1 year.
 - 50% of the value for accounts receivable that are overdue from 1 year to less than 2 years.
 - 70% of the value for accounts receivable that are overdue for 2 years to less than 3 years.
 - 100% of the value for accounts receivable outstanding for 3 years or more.
- For accounts receivable that are not yet overdue but are unlikely to be collected: a provision should be made based on the projected loss.

5. Inventory

Inventory is recorded at the lower of its original cost and its net realizable value.

The original cost of inventory is determined as follows:

- Raw materials and goods: include the purchase cost and other directly related costs incurred to bring the inventory to its current location and condition.
- Finished product: includes the cost of raw materials, direct labor, and related manufacturing overhead costs, allocated based on normal operating levels/land use rights costs, direct costs, and related overhead costs incurred during the investment and construction of the finished real estate product .

SEPARATE FINANCIAL STATEMENTS

for the first quarter of 2026

Notes to the separate financial statements (continued)

- Work- in-progress production costs: only include the cost of main raw materials (or other cost elements as appropriate).

Net realizable value is the estimated selling price of inventory in the normal course of business less the estimated costs to complete and the estimated costs necessary for its sale.

Inventory values are calculated using the weighted average method and accounted for using the perpetual inventory method.

6. Deferred costs

Deferred expenses include actual expenses incurred but related to the business results of multiple accounting periods. The company's deferred expenses include the following costs. Deferred expenses recognize actual expenses incurred but related to the business results of multiple accounting periods, and the transfer of these expenses to the cost of goods sold in subsequent accounting periods.

Tools and equipment

Tools and equipment already in use are allocated to costs using the straight-line method, with an allocation period of no more than 3 years.

Land lease costs

The value of the land use rights for a one-time lease payment at plot number 288, map sheet number 25, Long An B Hamlet, Cai Tac Town, Chau Thanh A District, Hau Giang Province (now Long An B Hamlet, Dong Phuoc Commune, Can Tho City, Vietnam). The land lease cost is gradually allocated to expenses over a period of 50 years.

7. Tangible fixed assets

Tangible fixed assets are represented at their original cost less accumulated depreciation. The original cost of a tangible fixed asset includes all expenses incurred by the company to acquire the asset up to the point it is ready for use. Expenses incurred after initial recognition are only added to the original cost of the fixed asset if these expenses are certain to increase future economic benefits from the use of the asset. Expenses that do not meet this condition are recognized as production and business expenses for the period.

When tangible fixed assets are sold or liquidated, the original cost and accumulated depreciation are written off, and any gains or losses arising from the liquidation are recognized as income or expenses in the year.

Tangible fixed assets are depreciated using the straight-line method based on their estimated useful life. The number of years/depreciation rate for different types of tangible fixed assets is as follows:

<u>Fixed assets</u>	<u>No. 5</u>
Houses, buildings	05 – 25
Machinery and equipment	05 – 15
Transportation and transmission	05 – 10

8. Fixed assets under finance lease

A lease is classified as a finance lease if the majority of the risks and benefits associated with ownership of the asset belong to the lessee. A finance leased fixed asset is expressed at its original cost less accumulated depreciation. The original cost of a finance leased fixed asset is

EUROPE VIETNAM INTERNATIONAL FERTILIZER JOINT STOCK COMPANY

SEPARATE FINANCIAL STATEMENTS

for the first quarter of 2026

Notes to the separate financial statements (continued)

the lower of the fair value of the leased asset at the commencement of the lease and the present value of the minimum lease payments. The discount rate used to calculate the present value of the minimum lease payments for the lease is the implicit interest rate in the lease contract or the interest rate stated in the contract. If the implicit interest rate in the lease contract cannot be determined, the borrowing interest rate at the commencement of the lease shall be used.

Fixed assets under finance leases are depreciated using the straight-line method based on their estimated useful life. In cases where it is uncertain whether the business will acquire ownership of the asset at the end of the lease term, the fixed asset will be depreciated over the shorter of the lease term and the estimated useful life. The number of depreciation years for different types of fixed assets under finance leases is as follows:

<u>Type of fixed asset</u>	<u>No. 5</u>
Machinery and equipment	15
Transportation and transmission	10

9. Investment properties

Investment properties are land use rights, buildings, parts of buildings, or infrastructure owned or leased by an enterprise , used for the purpose of generating rental income or anticipating appreciation. Investment properties are valued at their original cost less accumulated depreciation. The original cost of an investment property is the total cost incurred by the enterprise or the fair value of the amounts offered in exchange for acquiring the investment property up to the time of purchase or completion of construction.

Costs related to investment properties that arise after initial recognition are recognized as expenses, unless these costs are likely to cause the investment property to generate more future economic benefits than initially assessed, in which case they are added to the original cost.

When an investment property is sold, the original cost and accumulated depreciation are written off, and any resulting gains or losses are accounted for as income or expenses in that year.

The conversion of owner-occupied or inventory real estate to investment real estate only occurs when the owner ceases to use the property and begins leasing it to another party or upon completion of the construction phase. The conversion of investment real estate to owner-occupied or inventory real estate only occurs when the owner begins to use the property or begins to develop it for sale. The conversion of investment real estate to owner-occupied or inventory real estate does not alter the original cost or residual value of the property at the date of conversion.

Investment properties used for rental purposes are depreciated using the straight-line method based on their estimated useful life. The number of depreciation years for investment properties is as follows:

<u>Type of fixed asset</u>	<u>No. 5</u>
Houses and buildings	25

EUROPE VIETNAM INTERNATIONAL FERTILIZER JOINT STOCK COMPANY

SEPARATE FINANCIAL STATEMENTS

for the first quarter of 2026

Notes to the separate financial statements (continued)

10. Construction in progress costs

Construction in progress costs reflect the costs directly related (including relevant interest expenses in accordance with the company 's accounting policy) to assets under construction and machinery and equipment being installed. These assets are recorded at their original cost and are not depreciated. This is to serve the purposes of production, leasing , and management , as well as the costs associated with ongoing repairs to fixed assets.

11. Liabilities and payables

Liabilities and accrued expenses are recognized for amounts due in the future relating to goods and services received. Accrued expenses are recognized based on reasonable estimates of the amounts due.

The classification of payables into accounts payable to suppliers, accrued expenses, and other payables is done according to the following principle:

- Accounts payable to suppliers reflect commercial liabilities arising from transactions involving the purchase of goods, services, and assets from independent entities such as companies , including liabilities incurred when importing through consignees.
- Accrued expenses reflect amounts payable for goods and services received from sellers or provided to buyers but not yet paid due to the lack of invoices or insufficient accounting records, as well as amounts payable to employees for vacation pay and production and business expenses that must be accrued in advance.
- Other payables reflect non-commercial liabilities that are not related to transactions involving the purchase, sale, or provision of goods or services.

12. Equity

Owner's equity contribution

Owner's equity is recorded based on the actual amount of capital contributed by the shareholders.

Other owner's equity

Other capital is formed by supplementing income from business operations, revaluation of assets, and the remaining fair value of assets received as gifts, donations, or sponsorships, after deducting any applicable taxes (if any) related to these assets.

13. Profit distribution

Profits after corporate income tax are distributed to shareholders after provisions for funds have been set aside in accordance with the company's charter and legal regulations, and after approval by the General Meeting of Shareholders.

The distribution of profits to shareholders takes into account non-monetary items within undistributed after-tax profits that may affect cash flow and dividend payment capacity, such as: Interest from the revaluation of assets contributed as capital, interest from the revaluation of monetary items, financial instruments, and other non-monetary items.

Other funds

Funds are established and used in accordance with the Company's Articles of Association and the resolutions approved annually by the General Meeting of Shareholders.

Address: National Highway 1A, Long An B Hamlet, Dong Phuoc Commune, Can Tho City, Vietnam

SEPARATE FINANCIAL STATEMENTS

for the first quarter of 2026

Notes to the separate financial statements (continued)

Dividends are recognized as liabilities when approved by the General Meeting of Shareholders.

14. Record revenue and income

Revenue from the sale of goods and finished products.

Revenue from the sale of goods and finished products is recognized when the following conditions are simultaneously met:

- The company has transferred most of the risks and benefits associated with ownership of the product or goods to the buyer.
- The company no longer holds the right to manage the goods as the owner or the right to control the goods.
- Revenue figures are determined with relative certainty. When a contract stipulates that the buyer has the right to return the purchased product or goods under specific conditions, revenue is only recognized when those specific conditions no longer exist and the buyer no longer has the right to return the product or goods (except in cases where the customer has the right to return the goods in exchange for other goods or services).
- The company has obtained or will obtain economic benefits from the sale transaction.
- Identify the costs associated with the sales transaction.

Revenue from providing services

Revenue from a service transaction is recognized when the outcome of that transaction can be reliably determined. If the service is performed over multiple periods, revenue recognized in the period is based on the portion of work completed as of the end of the accounting period. The outcome of a service transaction is determined when all of the following conditions are met:

- Revenue is determined with relative certainty. When the contract stipulates that the buyer has the right to return the purchased service under specific conditions, revenue is only recognized when those specific conditions no longer exist and the buyer no longer has the right to return the service provided.
- There is potential to obtain economic benefits from the transaction of providing that service.
- Determine the portion of work completed by the end of the fiscal year.
- Identify the costs incurred for the transaction and the costs to complete the transaction for providing that service.

Interest

Interest is recognized on an accrual basis, determined by the balances of deposit accounts and the effective interest rate for each period.

Dividends and profit sharing

Dividends and distributed profits are recognized when the company is entitled to receive dividends or profits from capital contributions. Dividends received in the form of shares are only tracked by the increased number of shares, not the value of the shares received/recorded at par value.

EUROPE VIETNAM INTERNATIONAL FERTILIZER JOINT STOCK COMPANY

Address: National Highway 1A, Long An B Hamlet, Dong Phuoc Commune, Can Tho City, Vietnam

SEPARATE FINANCIAL STATEMENTS

for the first quarter of 2026

Notes to the separate financial statements (continued)

15. Cost of goods sold

The cost of goods sold during the year is recorded in accordance with the revenue generated during the period and in compliance with the prudence principle.

For direct material costs exceeding normal consumption levels, labor costs, and fixed manufacturing overhead costs not allocated to the value of goods in inventory, accountants must immediately include them in the cost of goods sold (after deducting any compensation, if any), even if the products or goods have not yet been identified as sold.

16. Borrowing costs

Borrowing costs include interest on loans and other expenses directly related to the loans.

Borrowing costs are recognized as expenses when incurred. However, if borrowing costs are directly related to the investment in construction or production of assets under construction that require a sufficiently long period (over 12 months) to be put into use for their intended purpose or sold, these borrowing costs are capitalized. For loans specifically used for the construction of fixed assets or investment properties, interest is capitalized even if the construction period is less than 12 months. Income arising from temporary investments in loans is recorded as a reduction in the original cost of the related asset.

For general loans used for the purpose of investing in or producing assets under construction, the capitalized borrowing cost is determined by the capitalization rate of the weighted average cumulative cost incurred for the investment in construction or production of that asset. The capitalization rate is calculated based on the weighted average interest rate of outstanding loans during the year, excluding specific loans used for the creation of a particular asset.

17. Selling expenses and administrative expenses

Selling expenses reflect the actual costs incurred in the process of selling products, goods, or providing services, including costs of offering products, introducing products, advertising products, sales commissions, product warranty costs (excluding construction activities), storage, packaging, and transportation costs, etc.

Business management expenses reflect the general management costs of a business, including: salaries for management staff (wages, allowances, etc.); social insurance, health insurance, union fees, and unemployment insurance for management staff; office supplies, tools, and depreciation of fixed assets used for business management; land rent and business license tax; provisions for doubtful receivables; outsourced services (electricity, water, telephone, fax, property insurance, fire insurance, etc.); and other cash expenses (entertainment, customer conferences, etc.).

18. Corporate income tax

Corporate income tax expense includes both current corporate income tax and deferred corporate income tax.

Current income tax

Current income tax is the tax calculated based on taxable income. The difference between taxable income and accounting profit is due to adjustments for temporary differences between tax and accounting, non-deductible expenses, as well as adjustments for non-taxable income and losses carried forward.

SEPARATE FINANCIAL STATEMENTS

for the first quarter of 2026

Notes to the separate financial statements (continued)

Businesses are entitled to preferential corporate income tax rates due to operating in disadvantaged areas, specifically as follows:

- *A tax rate of 10% will be applied for 15 years, starting from 2014 (the first year revenue was generated).*
- *100% exemption from corporate income tax for 4 years starting from 2017 (for taxable income generated).*
- *A 50% reduction in corporate income tax for the next 9 years starting from 2021.*

19. Financial instruments

Financial assets

Classification of financial assets

The company classifies financial assets into groups: financial assets recognized at fair value through the Statement of Income, investments held to maturity, loans and receivables, and financial assets available for sale. The classification of these financial assets depends on the nature and purpose of the asset and is determined at the time of initial recognition.

Financial assets are recognized at fair value through the Statement of Income.

Financial assets are classified as fair value in the Statement of Income if they are held for trading or are classified as fair value in the Statement of Income at the time of initial recognition.

Financial assets are classified as securities held for trading purposes if:

- Purchased or created primarily for the purpose of short-term resale;
- The company intends to hold the shares for the purpose of short-term profit;
- Derivative financial instruments (excluding derivative financial instruments identified as a financial guarantee contract or an effective hedging instrument).

Investments held until maturity

Investments held to maturity are non-derivative financial assets with fixed or determinable payments and a fixed maturity date that the Company intends and is able to hold to maturity.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments and are not listed on the market.

Financial assets available for sale

Financial assets available for sale are non-derivative financial assets that are identified as available for sale or are not classified as financial assets recognized at fair value through the Statement of Income, investments held to maturity, or loans and receivables.

The initial book value of a financial asset.

Financial assets are recognized on the date of purchase and cease to be recognized on the date of sale. At the time of initial recognition, the financial asset is determined by the purchase price/issuance cost plus other expenses directly related to the purchase and issuance of that financial asset.

Financial liabilities

The company classifies financial liabilities into groups: financial liabilities recognized at fair value through the Income Statement, and financial liabilities determined at amortized value.

EUROPE VIETNAM INTERNATIONAL FERTILIZER JOINT STOCK COMPANY

Address: National Highway 1A, Long An B Hamlet, Dong Phuoc Commune, Can Tho City, Vietnam

SEPARATE FINANCIAL STATEMENTS

for the first quarter of 2026

Notes to the separate financial statements (continued)

The classification of financial liabilities depends on the nature and purpose of the financial liability and is determined at the time of initial recognition.

Financial liabilities are recognized at fair value through the Statement of Income.

Financial liabilities are classified as fair value in the Statement of Income if they are held for trading or are classified as fair value in the Statement of Income at the time of initial recognition.

Financial liabilities are classified as securities held for trading purposes if:

- Released or created primarily for short-term acquisition purposes;
- The company intends to hold the shares for the purpose of short-term profit;
- Derivative financial instruments (excluding derivative financial instruments identified as a financial guarantee contract or an effective hedging instrument).

Financial liabilities are determined by their amortized value.

Financial liabilities are determined at their amortized value, which is calculated by subtracting principal repayments from the initial recognized value of the financial liability, plus or minus accrued amortizations calculated using the effective interest method of the difference between the initial recognized value and the maturity value, minus any reductions (directly or through the use of a reserve account) due to impairment or uncollectibility.

The effective interest rate method is a method for calculating the amortized value of a financial liability or group of financial liabilities and allocating interest income or interest expense over the relevant period. The effective interest rate is the discount rate applied to estimated future cash flows to be paid or received over the expected life of the financial instrument, or shorter, if necessary, back to the net present value of the financial liability.

The initial book value of financial liabilities.

At the time of initial recognition, financial liabilities are determined by the issue price plus any costs directly related to the issuance of that financial debt.

Equity instruments

An equity instrument is a contract that demonstrates the remaining interest in the company's assets after deducting all obligations.

20. Information by department

The fertilizer production and business activities in the Can Tho area primarily generate revenue and profit for the Company, while other revenue streams account for a small proportion of the Company's total revenue. Therefore, the Company's Board of Directors believes that the Company operates within a single business unit, namely the fertilizer business in a specific geographical area. Consequently, no further information on this unit is required.

21. Stakeholders

Parties are considered related if one party has the ability to control or exert significant influence over the other party in making decisions regarding financial and operational policies. Parties are also considered related if they are subject to common control or significant common influence.

When considering the relationship between the parties involved, the nature of the relationship is given more emphasis than its legal form.

Transactions with related parties during the period are presented in Note VII.1.

The company's tax returns will be subject to audit by the tax authorities. Because the application of tax laws and regulations to various types of transactions can be interpreted in different ways, the tax amounts presented in the financial statements may be subject to change at the discretion of the tax authorities.

Value Added Tax

The company pays value-added tax using the deduction method, with the tax rates varying depending on the type of service as follows:

Fertilizer business	5%
Other activities	10%

Corporate income tax

Businesses are entitled to preferential corporate income tax rates due to operating in disadvantaged areas, specifically:

- A preferential tax rate of 10% for a period of 15 years starting from 2014.
- 100% exemption from corporate income tax for 4 years starting from 2017 (for taxable income generated).
- A 50% reduction in corporate income tax for the next 9 years starting from 2021.

Other types of taxes

The company declares and submits the required documents.

The fair value of financial assets and financial liabilities is reflected in the value at which the financial instrument could be converted in an existing transaction between parties who have full knowledge and willingness to transact.

The company uses the following methods and assumptions to estimate fair value:

- The fair value of cash and cash equivalents, accounts receivable, loans, other receivables, borrowings, accounts payable to suppliers, and other short-term payables is equivalent to the book value (less provision for estimated uncollectible amounts) of these items due to their short maturity.
- The fair value of loans, accounts receivable, other receivables, borrowings, accounts payable, and other long-term payables, as well as investments held to maturity that are not listed on the stock market and have no published trading price by three securities firms, is estimated by discounting cash flows at interest rates applicable to liabilities with similar characteristics and remaining maturities.

4. Credit risk

Credit risk is the risk that one party to a contract will be unable to fulfill its obligations, resulting in financial losses for the Company.

The company has credit risks from its business operations (primarily with respect to accounts receivable from customers) and financing activities (bank deposits, loans, and other financial instruments).

Accounts receivable from customers

The company minimizes credit risk by only transacting with financially sound entities, requiring letters of credit for first-time transacting entities or those with unverified financial information, and employing accounts receivable staff to regularly monitor and collect outstanding debts. Based on this approach, and because the company's receivables relate to numerous different clients, credit risk is not concentrated on any single customer.

EUROPE VIETNAM INTERNATIONAL FERTILIZER JOINT STOCK COMPANY

Address: National Highway 1A, Long An B Hamlet, Dong Phuoc Commune, Can Tho City, Vietnam

SEPARATE FINANCIAL STATEMENTS

for the first quarter of 2026

Notes to the separate financial statements (continued)**Bank deposits**

The majority of the Company's bank deposits are held in large, reputable banks in Vietnam. The Company perceives the concentration of credit risk associated with these bank deposits to be low.

5. Liquidity risk

Liquidity risk is the risk that a company will have difficulty meeting its financial obligations due to a lack of funds.

The Board of Directors bears ultimate responsibility for liquidity risk management. The Company's liquidity risk primarily arises from the fact that its financial assets and financial liabilities have mismatched maturity dates.

The company manages liquidity risk by maintaining an appropriate level of cash and cash equivalents and borrowings that the Board of Directors deems sufficient to meet the company's operating needs, thereby minimizing the impact of cash flow fluctuations.

The payment terms for financial liabilities are based on the following undiscounted contractual payments:

	One year or less	Over 1 year to 5 years	Over 5 years	Add
Ending balance				
Loans and debts	85,106,214,685	177,733,335	8,280,314,098	93,564,262,118
Payment to the seller	19,906,423,370	-	-	19,906,423,370
Other payables	695,459,465	-	-	695,459,465
Add	105,708,097,520	177,733,335	8,280,314,098	114,166,144,953
Beginning balance				
Loans and debts	83,860,696,683	246,533,335	9,373,674,098	93,480,904,116
Payment to the seller	18,465,821,495	-	-	18,465,821,495
Other payables	973,676,327	-	-	973,676,327
Add	103,300,194,505	246,533,335	9,373,674,098	112,920,401,938

The company believes that the concentration of risk associated with debt repayment is low. The company is able to repay its debts as they fall due from cash flow from operating activities and proceeds from maturing financial assets.

6. Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices. Market risk includes three types: foreign exchange risk, interest rate risk, and other price risks.

The sensitivity analyses presented below are based on the assumption that the net debt values and the ratio of fixed-rate to variable-rate debt remain constant.

Foreign exchange risk

Foreign exchange risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in exchange rates.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate in response to changes in market interest rates.

The company's interest rate risk is primarily related to cash and loans.

SEPARATE FINANCIAL STATEMENTS

for the first quarter of 2026

Notes to the separate financial statements (continued)

The company manages interest rate risk by analyzing market conditions to obtain the most favorable interest rates while remaining within its risk management limits.

Other price risks

Another price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate with changes in market prices other than changes in interest rates and exchange rates .

7. Events occurring after the accounting closing date for the preparation of financial statements.

The Company's Board of Directors affirms that no events have occurred after March 31, 2026 , up to the time of this report that have not been reviewed, adjusted, or disclosed in the separate financial statements.

8. Comparative data

The comparative figures are the audited separate financial statements for the fiscal year ended December 31, 2025, and the separate financial statements for the first quarter of 2025.
