In 2025, the Company recorded total revenue of VND 49.56 billion, representing an increase of 9.4% compared to 2024 and exceeding the 2025 business plan by 3.3%, demonstrating that business operations continued to maintain stable growth momentum.

Profit before tax reached VND 19.27 billion, an increase of VND 5.92 billion, equivalent to 44.3% growth compared to 2024 and 13.1% above the 2025 business plan.

Profit after tax reached VND 15.65 billion, an increase of VND 5.02 billion, equivalent to 47.3% growth compared to 2024 and 14.9% higher than the 2025 business plan.

3. Analysis and Evaluation of Business Performance by service segment in 2025

3.1 Room Operations

In 2025, the Company served approximately 24,650 room nights, with a total of 16,420 guest arrivals.

The guest source structure continued to diversify, in which corporate guests (COP) accounted for 19.7%, online travel agency bookings (OTA) accounted for 42.9%, travel agent guests (TA) accounted for 20.3%, while walk-in guests and other customer segments accounted for 17.1%

In terms of market composition, the countries with the highest proportion of staying guests included Vietnam (24.43%), China (16.2%), Japan (15.4%), and Germany (6.6%), together with other markets such as South Korea, Singapore, Malaysia, India, and the United States.

Room revenue in 2025 reached VND 31.94 billion, increasing by VND 3.7 billion, equivalent to 13.1% growth compared to 2024 actual results, and exceeding the business plan by VND 2 billion, achieving 106.7% of the planned target. Average occupancy reached 78.5%, while the average room rate was VND 1,296,000.

Room operations continued to grow compared to 2024 and remained the Company's core business segment, contributing 64.4% of total Company revenue.

3.2 Food and Beverage Operations

Revenue from food and beverage operations reached VND 8.2 billion, increasing by VND 619 million, equivalent to 8.2% growth compared to 2024, and exceeding the business plan by VND 14 million, achieving 100.2% of the planned target.

Food and beverage revenue accounted for 17% of the Company's total revenue.

In addition to maintaining effective business performance from banquets, conferences, and in-house guests, the Executive Board proactively developed flexible à la carte business plans to maximize food and beverage service efficiency and diversify revenue streams.

3.3 Other Service Operations

Revenue from conference room rental reached VND 2.1 billion, decreasing by VND 354 million compared to 2024 and achieving 79.5% of the planned target.

The primary reason was that the Hotel only has two small conference rooms (Apricot Room – 128 m² and Lotus Room – 198 m²), with limited capacity and aging facilities affecting competitiveness against competitors in the area. In addition, under the general market context, many enterprises tended to reduce expenses and limit the organization of meetings, conferences, and seminars. Furthermore, the restructuring and streamlining of administrative apparatuses in various organizations also reduced short-term demand for centralized conferences and events.

Revenue from premises leasing reached VND 4.3 billion, decreasing by VND 211 million compared to 2024 and achieving 95.8% of the planned target.

The main reason was that the tenant occupying the leased area on the first floor (approximately 400 m²) terminated the lease agreement and returned the premises effective July 15, 2025. Since then, the Executive Board has been awaiting approval from the Board of Directors regarding the leasing policy; therefore, the premises have not yet been re-leased, directly affecting revenue from this business activity.

Revenue from other services reached VND 872 million, increasing by VND 281 million, equivalent to 47.6% growth compared to 2024, and exceeding the business plan by VND

234 million, achieving 136.8% of the planned target.

Service charge revenue reached VND 2.128 billion, increasing by VND 195 million, equivalent to 10.1% growth compared to 2024, and exceeding the business plan by VND 41 million, achieving 102% of the planned target.

3.4 Financial Activities

Financial income reached VND 7.6 billion, an increase of VND 1.7 billion, or 28%, compared with 2024, and exceeded the 2025 plan by VND 1.7 billion, achieving 127.9% of the annual target. This increase was mainly attributable to the recognition of VND 1.4 billion in dividends received from OCB for 2024, with the remainder primarily generated from bank deposit interest income.

4. Analysis and Evaluation of Expense Performance

4.1 Operating Expenses

In 2025, the Company's total operating expenses amounted to VND 32.9 billion, increasing by VND 3.3 billion, equivalent to 11.2% growth compared to 2024 and 5.5% above the planned target. The expense-to-revenue ratio stood at 66.4%. Specifically:

Raw material expenses amounted to VND 3.4 billion. Material consumption was controlled at 41.2%, increasing by 14.1% compared to 2024 due to fluctuations in input prices; however, it remained 0.8% lower than the 2025 plan. The Company proactively maintained an appropriate pricing policy while enhancing service quality to attract guests.

Personnel expenses (including salaries, meal allowances, mandatory insurance contributions, and trade union expenses) amounted to VND 17.6 billion, accounting for 35.6% of total operating expenses. Of which, salary expenses amounted to VND 14.6 billion, equivalent to 29.4% of total revenue. This expense increased by VND 1.9 billion, equivalent to 13.9% growth compared to 2024, mainly because the Company accrued and paid an additional one-month salary pursuant to Board of Directors Resolution No. 01/2026/NQ-HDQT dated February 27, 2026, in recognition of employees' contributions following the Company's overachievement of the 2025 business plan, while also creating motivation for the implementation of the 2026 business plan.

Tools and equipment expenses amounted to VND 670 million, increasing by 11.7% compared to 2024 but only reaching 61% of the planned target.

Purchased service expenses (electricity, water, laundry, and other operating expenses) increased by 16.6% compared to 2024, mainly due to increases in electricity, water, and other input service costs.

Other cash expenses decreased by VND 288 million, equivalent to a decrease of 7.3% compared to 2024.

Although total operating expenses in 2025 increased in line with revenue growth and market fluctuations, such increase remained within a controllable range and aligned with the Company's business expansion strategy. The Company proactively exercised strict control over expenditures, particularly operating and outsourced service expenses, thereby ensuring operational efficiency.

4.2 Fixed Expenses

The Company's fixed expenses mainly consisted of fixed asset depreciation expenses and land rental expenses. In 2025, fixed expenses were recorded at VND 4.9 billion, representing a

decrease of 13.2% compared to the planned target and a decrease of VND 3.3 billion, equivalent to 40% compared to 2024. The main reason was that in 2024, the Company made additional provisional accruals for land rental expenses in accordance with prevailing regulations for the period from 2021 to 2023, totaling VND 2.77 billion, resulting in significantly higher expenses recorded in 2024.

5. Profit

Based on revenue growth and effective cost control, both the Company's accounting profit before tax and profit after tax in 2025 exceeded the planned targets.

Accounting profit before tax reached VND 19.3 billion, increasing by VND 5.9 billion, equivalent to 44.3% growth compared to 2024 actual results, and exceeding the 2025 business plan by VND 2.2 billion, achieving 113.1% of the planned target. The profit before tax margin on total revenue was 38.9%.

Profit after tax reached VND 15.6 billion, increasing by VND 5 billion, equivalent to 47.3% growth compared to 2024, and exceeding the 2025 business plan by VND 2 billion, achieving 114.9% of the planned target.

These results were primarily attributable to growth in operating revenue and financial income, together with effective expense control.

In July 2025, the Company paid VND 8.6 billion to distribute the remaining 2024 dividend to shareholders in accordance with Resolution No. 01/NQ-DHDCD2025 dated June 19, 2025.

6. Profit Distribution Plan for 2025

Based on the business performance results for 2025, the Company proposes the following profit distribution plan for 2025:

PART 2. BUSINESS PLAN FOR 2026

I. GENERAL SITUATION

According to forecasts by the United Nations World Tourism Organization (UN Tourism), the global tourism industry is expected to continue its stable recovery momentum in

2026, with international tourist arrivals projected to increase by approximately 3%–4% compared to 2025.

Domestically, Vietnam's tourism industry targets welcoming approximately 25 million international visitors and serving 150 million domestic tourists, with total tourism revenue estimated at around VND 1.125 quadrillion. At the same time, the Vietnam National Authority of Tourism will coordinate with local authorities and enterprises to review the tourism potential and advantages of localities following administrative mergers, gradually improving tourism planning and developing products suitable for the new context.

These planned targets indicate that the tourism industry is expected to maintain a positive growth trend, creating favorable conditions for the Company's business operations in 2026. However, the market still presents numerous challenges, particularly increasing competitive pressure, rising input costs, and increasingly demanding requirements regarding product and service quality.

II. DEVELOPMENT OF THE 2026 BUSINESS PLAN

1. Business Targets for 2026

Based on a comprehensive assessment of the market context and the outlook for the tourism industry, the 2026 business plan has been developed on a prudent basis, closely aligned with actual market developments while ensuring feasibility and operational efficiency. Accordingly, the Company will focus its growth strategy on its core business segments, including accommodation, food and beverage services, and conference services, with projected growth of approximately 7% compared to 2025. However, due to the anticipated decline in revenue from leasing activities, the Company's total revenue is expected to increase by approximately 4%. This orientation reflects a prudent yet proactive approach, balancing growth objectives with risk management amid ongoing market uncertainties.

The Company sets out the following business targets for 2026:

2. Detailed Business Plan for 2026 by service segment

2.1 Accommodation Services

Accommodation revenue in 2026 is projected to reach VND 34.18 billion, an increase of 7% (equivalent to VND 2.24 billion) compared to 2025. This growth target is developed based on a comprehensive assessment of the Hotel's actual operating capacity and current market conditions.

With the current scale of 86 guestrooms, the Hotel has maintained a high occupancy level for many years. The average occupancy rate for 2026 is expected to reach 79%, which is considered relatively high within the hospitality industry. In peak periods, occupancy frequently exceeds 90%, indicating limited room for further growth in the number of room nights sold.

In addition, several facility items of the Hotel, particularly the ceiling-mounted air-conditioning system installed since 2014, have shown signs of deterioration. Although inspection and maintenance are conducted regularly, the frequency of technical issues has increased, while repair time is prolonged due to dependence on imported spare parts. The temporary suspension of guestrooms for repairs not only directly impacts revenue but also creates pressure in arranging accommodations for large groups.

As the Hotel is unable to expand room capacity and certain infrastructure limitations remain, the Hotel will focus on improving operational efficiency through flexible pricing policies by period, optimizing customer mix, and enhancing service quality. At the same time, the workforce will continue efforts to improve service standards in order to ensure customer satisfaction and maintain a reasonable average room rate to maximize revenue.

Accordingly, the 7% accommodation revenue growth target for 2026 reflects the Hotel's proactive efforts and determination to maintain operational efficiency and sustainable business development.

2.2 Food and Beverage Revenue

Food and beverage ("F&B") revenue for 2026 is projected at VND 8.8 billion, an increase of 7% (equivalent to VND 573 million) compared to 2025. The projected revenue structure is as follows:

Breakfast revenue from in-house guests: VND 3.2 billion (up 7% compared to 2025).

Projected revenue from Alacarte restaurant services is VND 2.1 billion, representing a 7% increase compared to the actual results achieved in 2025.

Projected revenue from banquet and conference services is VND 3.4 billion, representing a 7% increase compared to the actual results achieved in 2025.

For breakfast services for in-house guests, the projected 7% growth is based on expectations of maintaining and improving occupancy levels while enhancing service quality to increase guest satisfaction.

Regarding Alacarte dining services, the Hotel currently operates only one restaurant located on the 9th floor with fixed serving capacity. During peak periods, the restaurant's capacity is already approaching its operational limit. Therefore, revenue growth is expected to

come not from expansion of seating capacity but mainly from optimizing existing operations. Accordingly, the Hotel aims to increase table turnover, improve average spending per bill, enhance food and service quality, and maximize the use of both in-house and walk-in customers. This is also one of the key measures to improve operational efficiency under limited service infrastructure conditions..

For banquet and conference services, the Company will continue focusing on domestic corporate customers, business travelers, and MICE clients, while maintaining relationships with existing corporate customers and expanding new customer sources. However, banquet and conference operations are facing increasing competition from professional convention centers and newly established hotels with advantages in larger spaces, modern facilities, and flexible designs. In addition, many businesses are increasingly optimizing event-related expenses by shifting from large-scale banquets to tea breaks, light refreshments, smaller meetings, and online conferences.

In this context, to achieve the targeted 7% growth in F&B revenue, the Company plans to develop flexible service packages tailored to customer needs and budgets, while strengthening marketing activities, customer care, and service quality enhancement.

As a 3-star hotel with fixed service infrastructure, the 7% growth target for F&B revenue reflects not only expectations for revenue growth but also the Company's efforts to optimize operational efficiency, improve service quality, and maintain competitiveness amid increasingly intense competition and changing customer spending behaviors.

2.3 Conference Room Rental Services

Revenue from conference room rental services in 2026 is projected at VND 2.3 billion, an increase of 7% (equivalent to VND 151 million) compared to 2025. This target is established in the context where the Company's conference and event business faces numerous challenges from both internal limitations and changing market trends.

Regarding scale and infrastructure limitations, the Hotel currently has only two small meeting rooms, namely Apricot Room (128 m²) and Lotus Room (198 m²). With this capacity, the Hotel has limited ability to attract large-scale events and lacks competitive advantages in seating capacity compared to convention centers or hotels with larger meeting facilities.

In addition, market trends are changing significantly. Under pressure to optimize costs, many businesses are reducing expenses for in-person events by switching to online meetings or minimizing banquet services. Furthermore, changes in State management policies and stricter regulations on multi-level marketing activities in key areas have significantly affected this previously stable customer segment, as many companies have relocated their operations to suburban areas for greater convenience and cost savings.

In response, to achieve the 7% growth target for conference room rental services, the Hotel plans to proactively adjust its customer base by focusing on internal training sessions and specialized seminars for enterprises, while increasing efforts to approach small and medium-sized enterprises to expand the customer base.

2.4 Premises Leasing

Revenue from premises leasing in 2026 is projected at VND 3.1 billion, representing a decrease of VND 1.1 billion compared to 2025. This lower revenue target is established objectively based on actual infrastructure conditions and current developments in the leasing market. Specifically:

The ground-floor space with an area of 183 m², currently leased to Royal Viet Nam Trading and Service Company Limited, is expected to continue stable operations and provide a stable revenue source throughout 2026, serving as the foundation for the Company's leasing revenue.

Regarding the first-floor space, since the previous tenant terminated the lease agreement in July 2025, the area has remained vacant and is awaiting policy approval from the Board of Directors tri.

Currently, the first-floor facilities have shown signs of deterioration, particularly the technical systems and fire prevention and fighting systems, which no longer fully comply with current standards. This has become the greatest obstacle in attracting large and professional tenants.

In the context of oversupply in the leasing market, identifying suitable tenants requires careful evaluation and due diligence to ensure reputation, operational safety, and long-term stability for the Hotel's operations. To ensure the feasibility of the 2026 leasing revenue plan, the Company expects to begin recognizing revenue from a new tenant from the fourth quarter of 2026, following the implementation roadmap below:

Phase 1: Await approval of leasing policy from the Board of Directors and commence the search for suitable tenants.

Phase 2: Support tenants during construction and fit-out periods, including a proposed rent-free period during renovation to enhance attractiveness amid current market conditions.

Phase 3: Officially commence operations and rental collection.

Therefore, the planned reduction of VND 1.1 billion in leasing revenue compared to the previous year does not reflect passivity in business operations, but rather a prudent evaluation process and a strategic orientation toward selecting reputable and capable long-term partners to ensure sustainable operational efficiency in subsequent periods.

2.5 Other Services

Revenue from other services in 2026 is projected at VND 934 million, representing an increase of 7% compared to 2025.

This revenue mainly consists of utility charges (electricity and water) collected from leased premises and laundry services provided to hotel guests.

2.6 Service Charge Revenue

Service charge revenue for 2026 is planned at VND 2.3 billion.

2.7 Financial Income

Financial income for 2026 is projected at approximately VND 7.2 billion. Although this amount is VND 406 million lower than the actual result of 2025, the lower target reflects the application of prudent accounting principles and excludes extraordinary, non-recurring income. Specifically:

In 2025, financial income increased significantly due to the recognition of accumulated dividends from OCB Bank for the period from 2019 to 2023, totaling VND 1.4 billion. This was a one-time income item accumulated over several years and does not reflect the recurring trend of annual financial operations.

For 2026, the Hotel's financial income plan is primarily based on stable income from bank deposit interest. The exclusion of extraordinary or uncertain income items from the plan aims to

ensure prudence, transparency, and financial discipline in financial management. Therefore, the projected decline in financial income compared to the previous year does not indicate a deterioration in financial performance, but rather reflects normalization after a year of extraordinary income recognition, thereby ensuring that the financial plan aligns with actual operating conditions.

3. Expenses

Total operating expenses for 2026 are projected at VND 34.1 billion, representing an increase of 3.6% (equivalent to approximately VND 1.2 billion) compared to 2025. This increase is considered reasonable and necessary, as it is developed in line with revenue growth targets and objective market fluctuations. The core business segments of accommodation and F&B are both projected to grow by 7%, resulting in corresponding increases in direct operating costs and cost of sales.

3.1 Raw Material Costs

Raw material costs are projected at VND 3.7 billion, an increase of VND 303 million or 9% compared to 2025.

The ratio of raw material costs to F&B revenue is expected to reach 42%, an increase of 1.8% compared to 2025, primarily due to rising input material prices while the Company maintains stable pricing policies and continues improving F&B service quality to attract customers.

3.2 Labor Costs

Labor costs are projected at VND 17.5 billion, decreasing by VND 83 million or 0.5% compared to 2025. Of this amount, salary expenses are estimated at VND 14.5 billion, down VND 112 million or 0.5% compared to 2025. The salary expense ratio to total revenue in 2026 is estimated at 28%, lower than that of 2025. The salary structure remains aligned with current labor market conditions to ensure stable human resources for the effective implementation of the 2026 business plan.

3.3 Auxiliary Material Costs

Auxiliary material costs are projected at VND 680 million, increasing by VND 50 million or 8.9% compared to 2025.

The ratio of auxiliary material costs to total operating revenue is estimated at 1.3%, equivalent to the level recorded in 2025.

3.4 Tools and Equipment Costs

Tools and equipment costs are projected at approximately VND 800 million, an increase of VND 129 million or 19.3% compared to 2025. These expenses mainly relate to upgrading guestroom facilities and replacing equipment and tools that have exceeded their useful life, including water heaters, televisions, face towels, bath towels (used since 2017–2018), bed linens (used since 2015), and refrigerators (used since 2009). Such replacements are necessary to maintain service quality and enhance guest experience. This is also an important condition for maintaining the average room rate at over VND 1.3 million per room per night.

3.5 Outsourced Service Costs

Outsourced service costs are projected at VND 5.1 billion, increasing by VND 311 million or 6.5% compared to 2025. The increase is mainly attributable to high occupancy levels, resulting in higher recurring operating costs such as electricity, water, in-room amenities,

laundry, and housekeeping expenses, together with fluctuations in market prices.

3.6 Other Cash Expenses

Other cash expenses for 2026 are projected at VND 4 billion, increasing by VND 348 million or 9.5% compared to 2025. These expenses include decoration, repairs, office supplies, sales commissions, transportation, uniforms, employee outings, insurance, and related items.

Sales commission expenses are expected to increase due to the growing proportion of bookings through online travel agencies (OTAs). In the context of rapidly changing travel trends toward online booking platforms, expanding OTA channels is considered necessary to broaden market reach and maintain stable occupancy rates. Accordingly, such commissions are regarded as essential investments supporting room revenue growth objectives.

In addition, as the Hotel's facilities have shown signs of deterioration after a long period of operation, the Company plans to proactively increase the maintenance budget for technical infrastructure, prioritizing maintenance of the ceiling-mounted air-conditioning system and other core operational equipment. This approach is intended to minimize operational disruptions and reduce emergency repair costs, which are generally significantly higher than routine maintenance expenses.

Apart from internal factors, market input costs in 2026 are also forecast to remain volatile due to natural disasters, global economic fluctuations, and geopolitical conflicts. Consequently, prices of food, beverages, and other input materials are expected to rise, along with increases in labor and outsourced technical maintenance and transportation costs. In this context, the projected 3.6% increase in total operating expenses is considered appropriate and consistent with actual market conditions, while ensuring sufficient resources for maintaining service quality, stable operations, and supporting revenue growth targets for 2026..

Although total operating expenses are expected to increase by 3.6%, this growth remains lower than the projected 7% growth rate of the Hotel's core business activities. This demonstrates the Hotel's continued effective control over fixed expenses, while ensuring that expenditures are prudently planned and closely aligned with actual operational needs, focusing on necessary items to maintain 3-star hotel service standards, protect brand image and reputation, and sustain competitiveness in the market. As a result, the 2026 expense plan both ensures adequate resources for stable operations and maintains the Hotel's financial efficiency and profitability objectives.

3.7 Land Rental Expense

The land rental expense for 2026 has been developed based on Appendix 1 and Appendix 3 issued together with Decision No. 79/2024/QĐ-UBND dated October 21, 2024 of the People's Committee of Ho Chi Minh City regarding the land price framework applicable within the City.

At the time of preparing the business plan, the competent State authorities had not yet issued an official notice regarding the applicable land rental unit price for the Hotel for the period from October 8, 2021 to December 31, 2025 and subsequent years. Accordingly, the Hotel does not yet have sufficient legal basis to reassess or adjust the land rental unit price in the 2026 financial plan.

Based on the principles of prudence, legal compliance, and consistency in planning assumptions, the Hotel has temporarily prepared the 2026 land rental expense plan using the currently applied rental rate, as follows:

NO.	DESCRIPTION	UNIT	VALUE	NOTES
1	Land price on Dong Du Street	VND	327.900.000	Decision No. 79/2024/QĐ-UBND
2	Percentage rate for rental calculation (Area 1)	%	1,5	
3	Location coefficient (single frontage)	Coefficient	1	
4	Land area	m ²	594	
5	Annual land rental unit price	VND/m ² /year	4.918.500	(5) = (1)*(2)*(3)
6	Estimated annual land rental expense	VND/year	2.921.589.000	(6) = (4) *(5)

However, the land rental expense may be subject to adjustment upon issuance of the official land rental rate determination by the competent State authorities for the aforementioned period. In such event, all related adjustments will be implemented in accordance with applicable regulations and directives issued by the relevant authorities. The Hotel will continue to closely monitor all relevant legal documents and official guidance, and will proactively update and revise its financial plan upon receipt of official notifications to ensure transparency and full legal compliance.

4. Profit Plan

Profit before tax for 2026 is projected at VND 19.75 billion, representing an increase of VND 485 million compared to the actual results of 2025, equivalent to 102.5%. This result reflects substantive growth generated from the Hotel's core business operations, particularly accommodation, food & beverage, and conference room rental services. It also demonstrates that the Hotel's profitability is primarily driven by its core operating activities rather than passive income sources such as rental income from leased premises.

The projected profit before tax margin is estimated at 38.3% of total revenue, including estimated depreciation expenses of VND 2.1 billion and estimated land rental expenses of VND 2.9 billion, equivalent to the level recorded in 2025.

5. Proposed Profit Distribution Plan for 2026

Based on the projected business performance for 2026, the proposed profit distribution plan is as follows:

Unit: VND
