NOTES TO THE COMBINED FINANCIAL STATEMENTS

For the year ended 30 June 2026

I. OPERATING CHARACTERISTICS

1. Ownership structure

Song Da 3 Joint Stock Company (hereinafter referred to as the 'Company') is a joint-stock company.

2. Business field

The company's business sector is construction.

3. Business operations

The company's business activities include: Construction of hydropower projects, technical infrastructure, ...

4. Normal production cycle

The company's normal business production cycle does not exceed 12 months.

5. Company structure

Subsidiary

The Company only invests in its subsidiary, Song Da 3 - Dak Lo Hydropower Joint Stock Company located at No. 94 Vo Nguyen Giap Street, Group 4, Mang Den Commune, Quang Ngai Province, Vietnam. The main business activities of this subsidiary are production and trade of commercial electricity. At the end of the year, the voting rights and benefits are proportionate to Company's ownership interest in this subsidiary, which is 98,97%.

Units under the parent company without legal status and dependent accounting.

Name of the entity

Song Da 3.06 Branch

Song Da 3.02 Branch

Song Da 3.07 Branch

Branch of Song Da 3 Joint Stock Company in Hanoi.

Executive Board of Pleikrong Hydropower.

II. FISCAL YEAR, CURRENCY USED IN ACCOUNTING

1. Fiscal year

The Company's fiscal year begins on 1 January and ends on 31 December of each year.

2. Currency used in accounting

The unit of currency used in accounting is Viet Nam Dong (VND), as receipts and payments are mainly made by VND

III. APPLICABLE ACCOUNTING STANDARD AND POLICIES

The Company applies the Vietnamese Accounting Standards, the Vietnamese Accounting Regime for Enterprises issued under Circular No. 99/2025/TT-BTC dated 27/10/2025, and the circulars guiding the implementation of accounting standards by the Ministry of Finance in the preparation and presentation of combined financial statements.

IV. THE ACCOUNTING POLICIES APPLIED

1. The basis for preparing the combined financial statements

The Financial Statements are prepared on the basis of accrual accounting (excluding information related to cash flows).

The affiliated equities have their own accounting operations and are accounted for as dependent units. The Financial Statements of the entire company are prepared based on the integration of Financial Statements of the dependent units. Revenue and balances between the affiliated units are eliminated when preparing the combined financial statements.

2. Foreign currency transactions

Foreign currency transactions are converted at the exchange rate on the transaction date. Monetary items denominated in foreign currency at the end of the financial year are revalued at the exchange rate on that date.

Foreign exchange differences arising during the year from foreign currency transactions are recognized in financial income or financial expenses. Exchange differences due to the revaluation of monetary items denominated in foreign currency at the end of the financial year, after offsetting gains and losses, are recognized in financial income or financial expenses.

The exchange rates used for converting foreign currency transactions are the actual transaction rates at the time of the transaction. The actual transaction rate for foreign currency transactions is determined as follows:

· For foreign currency purchase and sale contracts (spot and forward contracts): the rate agreed upon in the contract between the company and the bank.

· For receivables: the buying rate of the foreign currency from the commercial bank designated by the company for customer payment at the time of the transaction.

- For payables: the selling rate of the foreign currency from the commercial bank the company plans to transact with at the time of the transaction.

- For purchases of assets or expenses paid immediately in foreign currency (not through payables accounts): the buying rate of the foreign currency from the commercial bank where the company makes the payment.

The exchange rate used to revalue monetary items denominated in foreign currency at the end of the financial year is determined as follows:

- For foreign currency deposits in banks: the buying rate of the foreign currency from the bank where the company holds the foreign currency account.

- For monetary items classified as other assets: the buying rate of the foreign currency from the bank with which the company regularly transacts.

- For monetary items classified as payables: the selling rate of the foreign currency from the bank with which the company regularly transacts.

3. Cash and cash equivalents

Cash includes cash on hand and demand deposits. Cash equivalents are short-term investments with a maturity of no more than three months from the date of investment, which are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value at the reporting date.

4. Financial Investments

Investments in Subsidiaries

A subsidiary is an entity controlled by the Company. Control is achieved when the Company has the power to govern the financial and operating policies of the investee to obtain economic benefits from its activities.

Initial Recognition

Investments in subsidiaries are initially recognized at cost, which includes the purchase price or contributed capital plus any directly attributable investment costs. For investments made with non-monetary assets, the investment is recorded at the fair value of the non-monetary assets at the time of the transaction.

Dividends and profits from periods before the investment acquisition are accounted for as a reduction in the value of the investment. Dividends and profits from periods after the acquisition are recognized as income. Dividends received in the form of shares are tracked as an increase in the number of shares but are not recorded as a value of the received shares.

Provision for Impairment of Investments in Subsidiaries

Provisions for impairment of investments in subsidiaries are made when a subsidiary incurs losses, with the provision amount equal to the difference between the actual investment capital of the parties in the subsidiary and the actual equity multiplied by the Company's ownership percentage in the subsidiary. If the subsidiary prepares combined financial statements, these statements are used as the basis for determining the provision for impairment.

Any increase or decrease in the provision for impairment of investments in subsidiaries at the end of the financial year is recognized in financial expenses.

Investments in Equity Instruments of Other Entities

Investments in equity instruments of other entities include investments in equity instruments where the Company does not have control, joint control, or significant influence over the investee.

Investments in equity instruments of other entities are initially recognized at cost, which includes the purchase price or contributed capital plus any directly attributable investment costs. Dividends and profits from periods before the investment acquisition are accounted for as a reduction in the value of the investment. Dividends and profits from periods after the acquisition are recognized as income. Dividends received in the form of shares are tracked as an increase in the number of shares but are not recorded as a value of the received shares.

Provisions for impairment of investments in equity instruments of other entities are made as follows:

- For listed shares or investments with reliably determinable fair values, provisions are made based on the market value of the shares.

- For investments without a determinable fair value at the reporting date, provisions are based on the investee's losses, with the provision amount equal to the difference between the actual investment capital of the owners and the equity at the end of the financial year multiplied by the Company's ownership percentage in the investee's total contributed capital.

Any increase or decrease in the provision for impairment of investments in equity instruments of other entities at the end of the financial year is recognized in financial expenses.

5. Receivables

Receivables are presented at their carrying amount, net of any allowance for doubtful debts.

6. Inventories

Inventories are recognized at the lower of cost and net realizable value.

The cost of inventories is calculated using the weighted average method and accounted for on a perpetual inventory system.

7. Prepaid Expenses

Prepaid expenses include actual expenses incurred that relate to the business operations over multiple financial years. The Company's prepaid expenses primarily consist of tools and supplies, transportation and installation costs for grinding stations, and other related expenses. These prepaid expenses are allocated over the prepayment period or the period during which the related economic benefits are realized.

Expenses for Tools and Supplies

Tools and supplies in use are amortized on a straight-line basis over a period not exceeding 36 months.

Transportation and Installation Costs for Grinding Stations

Transportation and installation costs for grinding stations are amortized on a straight-line basis over a period not exceeding 36 months.

Repair Costs for Machinery and Equipment

Repair costs for machinery and equipment are allocated on a straight-line basis over a period not exceeding 36 months.

Prepaid Land Lease

Prepaid land lease represents the amount paid for the land used by the Company. The prepaid land lease is allocated on a straight-line basis over the lease period.

Other Expenses

Other expenses include fuel costs, insurance costs, and minor repair costs, which are allocated over their estimated useful life.

8. Tangible Fixed Assets

Tangible fixed assets are shown at historical cost, less accumulated depreciation. The historical cost of tangible fixed assets includes all costs incurred by the Company to bring the asset to its current condition and location for use. Subsequent expenditures are only capitalized if they increase the future economic benefits expected from the use of the asset. Costs that do not meet these criteria are recognized as business expenses in the year they are incurred.

When tangible fixed assets are sold or disposed of, their historical cost and accumulated depreciation are written off, and any resulting gains or losses are recognized in income or expenses for the year.

Tangible fixed assets are depreciated on a straight-line basis over their estimated useful lives. The depreciation periods for various types of tangible fixed assets are as follows:

<u>Fixed Assets</u>	<u>Useful lives (years)</u>
Buildings and Structures	25
Machinery and Equipment	03-10
Transport and Transmission Vehicles	05-10
Management Equipment and Tools	03-07
Other Fixed Assets	03-07

9. Intangible Fixed Assets

Intangible fixed assets are presented at cost less accumulated amortization.

The cost of intangible fixed assets includes all costs incurred by the Company to acquire the asset and bring it into a state where it is ready for use. Costs related to intangible fixed assets incurred after initial recognition are recognized as expenses in the period unless these costs are directly associated with a specific intangible asset and increase the economic benefits from using the asset.

10. Construction in Progress

Construction in progress reflects direct costs (including interest expenses related to construction) for assets that are in the process of construction, installation of machinery, and equipment. These assets are recognized at cost and are not depreciated.

11. Payables and Accrued Expenses

Payables and accrued expenses are recognized for amounts to be paid in the future related to goods and services received. Accrued expenses are recognized based on reasonable estimates of the amounts to be paid.

12. Owner's equity

Owner's Contributions

Owner's contributions are recognized at the actual amount contributed by shareholders.

Share Premium

Share premium is recognized as the difference between the issue price and the nominal value of shares at initial issuance or subsequent issues, as well as the difference between the reissue price and the carrying value of treasury shares and convertible bonds at maturity. Direct costs related to the issuance of additional shares or the reissue of treasury shares are deducted from share premium.

13. Profit Distribution

After-tax profits are distributed to shareholders after provisions for reserves are made according to the Company's bylaws and legal regulations, as approved by the General Shareholders' Meeting.

Profit distribution considers non-cash items within retained earnings that may affect cash flows and dividend payments, such as revaluation gains on assets contributed as capital, currency translation adjustments, financial instruments, and other non-cash items.

Dividends are recognized as payables once approved by the General Shareholders' Meeting.

14. Revenue and Income Recognition

Revenue from Sale of Goods and Products

Revenue from Service Provision

For services provided over multiple periods, revenue is recognized based on the proportion of work completed by the end of the financial year.

Interest Income

Interest income is recognized on an accrual basis based on time and the effective interest rate for each period.

Dividends and Profit Sharing

Dividends and profit sharing are recognized when the Company has the right to receive dividends or profit from investments. Dividends received in shares are tracked only as an increase in the number of shares, not the value of the received shares.

15. Construction Contracts

A construction contract is an agreement to build an asset or a group of related assets that are closely interdependent in terms of design, technology, function, or basic purpose.

16. Revenue Deductions

Revenue deductions are amounts that reduce revenue, recognized in the same period as the revenue is recorded.

17. Borrowing Costs

Borrowing costs include interest on loans and other costs directly related to borrowing.

18. Expenses

Expenses are amounts that decrease economic benefits and are recognized when the transaction occurs or when it is reasonably certain that an expense will occur in the future, regardless of whether payment has been made.

Expenses and related revenues must be recognized simultaneously according to the matching principle. If the matching principle conflicts with the prudence principle, expenses are recognized according to the nature and requirements of accounting standards to ensure a true and fair reflection of the transaction.

19. Corporate Income Tax

The corporate income tax expense includes both current income tax and deferred income tax.

Current Income Tax

Current income tax is calculated based on taxable income. Taxable income may differ from accounting profit due to adjustments for temporary differences between tax and accounting, disallowed expenses, and adjustments for non-taxable income or carried-forward losses.

Deferred Income Tax

Deferred income tax is a tax liability that will be payable in the future or a tax asset that will be refunded, arising from temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and their tax bases. Deferred tax liabilities are recognized for all taxable temporary differences. Deferred tax assets are recognized only when it is certain that there will be future taxable profits to use the temporary differences.

20. Related Parties

Entities or individuals are considered related parties if one party can control or exert significant influence over the other in making financial and operating decisions. Related parties can also include those that share joint control or significant common influence.

21. Segment

A business segment is a distinguishable part involved in the production or provision of products or services, with risks and economic benefits different from those of other business segments.

A geographic segment is a distinguishable part engaged in the production or provision of products or services within a specific economic environment, with risks and economic benefits distinct from those of business segments in other economic environments.

Segment information is prepared and presented in accordance with the accounting policies applied to the preparation and presentation of the Company's combined financial statements.
