NOTES TO FINANCIAL STATEMENTS

Quarter 2/2026

I. Corporate information

1. Ownership structure:

Vinh Long Water Supply Joint Stock Company (hereinafter referred to as the “Company”) is an enterprise established through the equitization of Vinh Long Water Supply One-Member Limited Liability Company under Decision No. 378/QĐ.UBND dated March 13, 2015, by the People's Committee of Vinh Long Province; Decision No. 401/QĐ.UBND dated February 26, 2016, by the People's Committee of Vinh Long Province approving the equitization plan of Vinh Long Water Supply One-Member Limited Liability Company into a joint stock company; and Decision No. 3090/QĐ.UBND dated December 23, 2016, by the People's Committee of Vinh Long Province approving the enterprise value and the amount to be paid to the Fund for Supporting the Rearrangement and Development of Enterprises at the time of officially transitioning to a joint stock company.

The Company operates under the Certificate of Business Registration for a Joint Stock Company, No. 1500174831, issued on May 31, 2016, by the Department of Planning and Investment of Vinh Long Province.

The charter capital of the Company, as per the Business Registration Certificate dated May 31, 2016, is VND 289,000,000,000 (in words: Two hundred eighty-nine billion dong), divided into 28,900,000 shares (each share with a par value of VND 10,000).

English name: Vinh Long Water Supply Joint Stock Company

Abbreviation: VWACO

Stock code: VLW, traded on the UpCOM exchange.

Registered address: No. 02 Hung Dao Vuong Street, Long Chau Ward, Vinh Long Province.

The total number of employees of the Company as of July 30, 2026 was 234 (as of January 1, 2026: 234).

2. Business lines:

The Company operates in the fields of manufacturing, trading, and services.

3. Principal activities:

The principal activities include production and trade of clean water; production and trade of bottled drinking water; construction and installation of infrastructure projects; investment in water supply projects; activities related to water supply projects; and construction consultancy, including design, supervision, and project management of infrastructure works.

4. Normal operating cycle:

The normal operating cycle of the Company is 12 months.

5. Corporate structure:

6. Number of employees as at July 30, 2026: 234 employees

7. Statement on comparability of information in the Financial Statements

In 2026, the Company adopts the accounting regime in accordance with Circular No. 99/2025/TT-BTC dated October 27, 2025 issued by the Ministry of Finance, replacing Circular No. 200/2014/TT-BTC dated December 22, 2014 and its amendments and supplements that were applied in previous years.

The change in accounting regime may result in differences in the principles of recognition, classification, and presentation of certain items in the Financial Statements. However, this change does not have a significant impact on the Financial Statements in terms of direct comparability with the figures of the previous year.

II. Annual accounting period and reporting currency unit

1. Annual accounting period

Annual accounting period of the Company is annually from 01/01 to 31/12 .

This reporting period covers the time from April 1, 2026 to July 30, 2026.

2. Reporting currency unit: VND

III. Summary of accounting standards and system

1. Applicable accounting regime

The Company applies the Vietnamese Enterprise Accounting Regime issued under Circular No. 99/2025/TT-BTC dated October 27, 2025 by the Minister of Finance.

2. Statement of compliance with accounting standards and accounting regime

The Chairman of the Board of Directors and the Board of Management confirm that the Company has complied with the requirements of Vietnamese Accounting Standards and the Vietnamese Enterprise Accounting Regime issued under Circular No. 99/2025/TT-BTC dated October 27, 2025 by the Minister of Finance, as well as the circulars guiding the implementation of such standards and accounting regime issued by the Ministry of Finance in the preparation of the Financial Statements.

IV. Summary of significant accounting policies

Basis of consolidation

The Company's accounting currency is Vietnam Dong (VND), prepared on the historical cost concept, and prepared in accordance with Vietnamese Accounting Standards, the Vietnamese Accounting System for enterprises and the relevant statutory requirements applicable to financial reporting.

Cash and cash equivalents

Cash: Includes Cash on Hand, Cash in Bank (non-term), and Cash in Transit.

Cash on Hand and Cash in Bank are recognized based on the actual receipts and payments.

Cash in Transit: Recognized based on money transfer orders that have not yet received debit notes and payment slips that have not yet received credit notes.

Investments

Held-to-maturity investments

Held-to-maturity investments include term deposits at banks (including types of promissory notes and treasury bills), bonds, preferred shares where the issuer is obligated to repurchase them at a specific point in the future, loans held to maturity with the purpose of earning periodic interest, and other held-to-maturity investments.

Held-to-maturity investments are recorded at cost and are measured at fair value based on the recoverability of the investment.

All investments classified as monetary items denominated in foreign currency will be revalued at the actual exchange rate at the time of preparing the financial statements.

Associate

Investments in associates and joint ventures: Investments in associates and joint ventures, where the Company has significant influence, are presented using the cost method.

Profit distributions received by the Company from the cumulative profits of associates after the Company gains control are recognized in the Company's profit or loss for the year. Other distributions are treated as a recovery of investment and are deducted from the investment's carrying amount.

Accounts receivable

Receivables are stated in according to the receivable term, debtor, type of foreign currency to be received, and other factors based on the Company's management purposes.

Receivables include trade receivables and other receivables, recognized under the following principles:

- Trade receivables include receivables of a commercial nature arising from purchase-sale transactions between the Company and buyers (independent entities from the seller, including receivables between parent companies and subsidiaries). Trade receivables are recognized in accordance with revenue standards regarding the recognition timing, based on the invoice and related documents.
- Other receivables include non-commercial receivables.

Receivables are classified as Current and Non-current in the Balance Sheet based on the remaining term of the receivables as of the reporting date.

Inventories

Inventory is measured at historical cost. In cases where the cost of inventory exceeds its net realizable value, it is measured at net realizable value. The cost of inventory includes direct material costs, direct labour costs, and allocated overhead costs, if any, incurred to bring the inventory to its current location and condition. The net realizable value is determined as the estimated selling price less the costs of completion and the marketing, selling, and distribution expenses incurred. Inventory is recognized by using the perpetual inventory method and is measured in the weighted average cost method.

The provision for inventory decreases in value is recognized in accordance with the current accounting standards. Accordingly, the Company sets up provisions for obsolete, damaged, or low-quality inventory if the actual value of the inventory is higher than its net realizable value at the end of the accounting period.

Tangible fixed assets and depreciation

The Company manages, utilizes, and depreciates fixed assets in accordance with the guidelines under Circular No. 45/2013/TT-BTC issued on April 25, 2013, and Circular No. 147/2016/TT-BTC issued on October 13, 2016, by the Ministry of Finance.

Accounting principles:

Tangible fixed assets:

Tangible fixed assets are recognized at cost and presented at historical cost less accumulated depreciation. The historical cost of fixed assets includes all expenses incurred by the Company to acquire the fixed assets up to the point when they are available for use.

When fixed assets are sold or disposed of, their original cost and accumulated depreciation are written off. Any resulting gain or loss from the disposal is recognized in other income or other expenses for the period.

Intangible fixed assets:

Land use rights: This includes all actual costs incurred by the Company directly related to the land area in use, such as payments for acquiring land use rights, compensation costs, site clearance, land leveling, registration fees, etc.

Depreciation

Depreciation is computed on a straight-line basis over the estimated useful lives of tangible fixed assets. The estimated useful lives are as follows:

<u>Asset Group</u>	<u>Depreciation Period (Years)</u>
Buildings and structures	5-50 years
Machinery and equipment	5-15 years
Motor vehicles and transmission	6-30 years
Office equipment	3-8 years

Intangible fixed assets related to land use rights with a defined term are amortized using the straight-line method based on the effective duration of the land use rights certificate. Intangible fixed assets related to land use rights without a defined term are recognized at cost and are not amortized.

Intangible fixed assets related to computer software are amortized over 4 years.

Fixed assets with fully depreciated values that are revalued upward due to enterprise valuation for equitization purposes will start being depreciated from the time the enterprise is issued the business registration certificate for conversion into a joint-stock company. The depreciation period for these fixed assets ranges from 3 to 5 years.

Accounting principles for prepaid expenses

Prepaid expenses represent actual costs incurred that relate to the operating results of multiple accounting periods and are allocated to operating expenses in subsequent periods.

Prepaid expenses are initially recognized at cost and are classified as short-term or long-term on the Balance Sheet based on the prepayment period of each contract.

Other long-term prepaid expenses related to tools and equipment are initially recognized at cost and are amortized using the straight-line method over a period not exceeding three years.

Trade and other payables

Payables are presented based on the repayment term, creditor, type of currency payable, and other factors according to the Company's management purposes.

Payables include trade payables, loan payables, and other payables. These liabilities are determined with virtual certainty regarding value and timing and are recognized at no less than the obligation to be paid. They are classified as follows:

Trade payables: Includes payables of a commercial nature arising from the purchase of goods, services, or assets between the Company and the seller (independent entities from the Company, including payables between parent companies and subsidiaries). This also includes payables related to imports through entrusted representatives (in entrusted import transactions).

Other payables: Includes non-commercial payables that are unrelated to transactions involving the purchase, sale, or supply of goods and services.

Accounting principles for dividends and profit payable

Dividends and profit payable are used to reflect the amounts of dividends and profits payable (in cash or non-cash assets) and the status of settlement of dividends and profits payable in cash to the company's shareholders or capital contributors.

Accounting principles for accrued expenses

Accrued expenses represent costs that have been incurred but not yet paid, which are recognized in the operating expenses of the period to ensure that actual payments, when made, do not cause significant fluctuations in operating expenses, in accordance with the matching principle between revenue and expenses.

Accounting principles for provisions payable

Provisions for liabilities are recognized when the Company has a present obligation as a result of a past event, and it is probable that the Company will be required to settle that obligation. Provisions are measured based on the estimates of the Board of Management regarding the expenditures required to settle such obligations at the end of the reporting period.

Periodic repair and maintenance expenses of fixed assets

The accrual of periodic repair and maintenance expenses for fixed assets is based on the repair and maintenance plan. If the actual repair and maintenance costs exceed the accrued amount, the difference is fully recognized as an expense. If the actual costs are lower than the accrued amount, the difference is recognized as a reduction in expenses.

Loans and finance lease

Includes loans and finance lease liabilities, excluding loans in the form of bond issuance or preferred shares with provisions requiring the issuer to repurchase them at a specific point in the future.

The Company presents loans and finance lease liabilities in detail for each creditor and classifies them as short-term or long-term based on the repayment term.

Costs directly related to loans are recognized as financial expenses, except for costs arising from loans specifically intended for investment, construction, or production of assets under construction, which are capitalized in accordance with the Accounting Standard on Borrowing Costs.

Borrowing costs

Borrowing costs are recognised as an expense in the year in which they are incurred, except being capitalized in accordance with the Accounting Standard on Borrowing Costs.

Owner's equity

Owner's equity is recognized based on the actual contributed capital by the owners.

Undistributed profits are determined based on profits after corporate income tax and the Company's profit distribution or loss handling.

Equity funds are allocated in accordance with the provisions of the Company's Charter.

Revenue and other income

For manufacturing and trading enterprises:

Revenue from sales is recognized when all five (5) of the following conditions are simultaneously satisfied:

1. The Company has transferred the majority of risks and rewards associated with ownership of the product or goods to the buyer;
2. The Company no longer retains control over the goods or the right to manage them as the owner;
3. Revenue can be measured reliably;
4. The Company is likely to receive economic benefits from the sales transaction;
5. The costs related to the sales transaction can be determined.

Construction contracts

Revenue and costs of construction contracts are recognized in two cases:

- a) If the construction contract stipulates that the Company is paid based on planned progress, and the contract results can be reliably estimated, then the revenue and costs related to the contract are recognized corresponding to the work completed as determined by the Company at the date of preparing the financial statements. This is done regardless of whether the planned progress invoice has been issued or not, or the amount stated in the invoice.
- b) If the construction contract stipulates that the Company is paid based on the value of work performed, and the contract results can be reliably estimated and confirmed by the customer, then the revenue and costs related to the contract are recognized corresponding to the work completed and confirmed by the customer during the period as reflected in the issued invoice.

If the contract results cannot be reliably estimated, and the Company is able to recover the incurred contract costs, then the contract revenue is recognized only to the extent of the costs incurred that are likely to be

recoverable. In such cases, the income is not recognized, even if the total contract costs may exceed the total contract revenue. For interest, dividends, profit distributed, and other income: Revenue is recognized when the Company is likely to receive economic benefits from these activities, and the amount can be measured reliably.

Cost of goods sold

Includes the cost of goods sold for products, goods, and services recognized in accordance with the revenue recognized during the period.

Financial expenses

Borrowing costs: Recognized monthly based on the loan amount, loan interest rate, and the actual number of borrowing days.

Exchange rate loss: Recognized when there is a difference between the actual exchange rate and the book exchange rate, and when a loss arises from the revaluation of monetary items denominated in foreign currency.

Taxation

Corporate income tax expense (or corporate income tax income): This is the total of current income tax expense and deferred income tax expense (or current income tax income and deferred income tax income) used to determine profit or loss for a period.

- *Current corporate income tax expense:* This is the corporate income tax payable calculated on taxable income for the year at the current corporate income tax rate. The taxable income differs from accounting profit due to adjustments for differences between accounting profit and taxable income under current tax policies.
- *Deferred corporate income tax expense:* This is the amount of corporate income tax payable in the future arising from: Recognition of deferred income tax liabilities during the year; Reversal of deferred income tax assets previously recognized in prior years; Non-recognition of deferred income tax assets or deferred income tax liabilities arising from transactions recognized directly in equity.

The Company is obligated to pay corporate income tax at a tax rate of 20% on taxable income.

Related parties

Entities or individuals are considered related parties if they own more than 10% of the voting shares or capital contribution of the Company; are insiders or related persons of insiders; or are organizations or individuals that have a direct or indirect control relationship with, are controlled by, or are under common control with the Company.
