6.2 Explanation of the net profit after tax for the Second quarter of 2026 recording a loss, and changing by more than 10% compared to the same period last year

The Company recorded a net loss in Q2 2026; however, the loss decreased by 19.42% compared to the same period last year. The main reasons are as follows:

- Due to the impact of the global economic slowdown and complex geopolitical developments, consumption demand has been unstable. In addition, the Company continued to face pressure from high-cost inventories, while selling prices were not sufficient to cover the cost of goods sold. As a result, cost of goods sold increased by 60.89%, exceeding the revenue growth rate of 41.59%, leading to a negative gross profit for the period.
- During the period, the Company proactively reduced operating expenses, including financial expenses, selling expenses, and general and administrative expenses, compared to the same period last year.
- Furthermore, in Q2 2025, the Company incurred a significant amount of other expenses (approximately VND 3 billion), whereas such expenses were not incurred or were insignificant in the current period.

As a result, despite the negative gross profit, the Company's net loss in Q2 2026 improved compared to the same period last year.
