

*Re: Explaining the difference of
more than 10% on PAT from the
year-ago period*

Dear: - State Securities Commission of Vietnam
 - Hanoi Stock Exchange

Based on the business performance results for the year 2026, Petrolimex Saigon Transportation and Service Joint Stock Company (PSC) records profit after tax: 5.065.788.697 VND, a difference of more than 10% on PAT from the year-ago period due to:

- Improved retail operations compared to the same period last year, contributing to higher revenue and improved profit margins.
- Higher retail sales volume and transportation volume, resulting in increased revenue and more efficient utilization of transportation capacity and operational resources.
- Effective cost control and cost-saving measures, particularly in selling, administrative, and operating expenses, which enhanced overall business efficiency and contributed to the increase in profit after tax.

Above figures are the reasons making the difference on net profit comparing to the same period the year, more than 10%.
