Regarding the explanation of fluctuations  
in after-tax profit Q2/2026 compared  
to the same period last year

To: Hanoi Stock Exchange.

IDICO Investment Consulting Joint Stock Company sincerely thanks your organization for your attention and support over the past period.

Based on Circular 96/2020/TT-BTC dated November 16, 2020, of the Ministry of Finance on guiding the disclosure of information on the securities market.

***IDICO Investment Consulting Joint Stock Company explains the reasons for the fluctuation in after-tax profit in the Q2 2026 Business Performance Report, which increased by over 10% compared to the same period last year, as follows:***

Net profit after tax in Q2 2026 reached VND 696,697,924, an increase of VND 78,967,329 (approximately 13%) compared to VND 617,730,595 in Q2 2025. This is mainly due to the following reasons:

- Revenue from service provision in Q2 2026 increased by 8% compared to the same period last year.
- Financial income during the period increased significantly compared to the same period last year, mainly from interest on deposits and benefits received from business cooperation activities, contributing to increased profits during the period and offsetting the increase in management expenses.

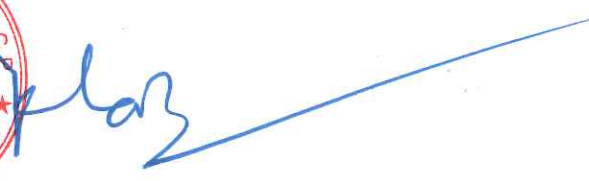

We look forward to your attention and cooperation.
