. 2. APPLICABLE ACCOUNTING SYSTEM AND ACCOUNTING STANDARDS**. 2.1. ACCOUNTING PERIOD AND ACCOUNTING CURRENCY**

The fiscal year of Company According to the calendar year, starting from January 1st to December 31st of each year.
The currency used in accounting records is the Vietnamese Dong (VND).

. 2.2. Applicable accounting system**Accounting system applied**

The company applies the Enterprise Accounting System issued according to Circular No. 99/2025/TT-BTC dated October 27, 2025, by the Ministry of Finance.

Statement of Compliance with Accounting Standards and Accounting System

The company has applied the Vietnamese Accounting Standards and the guidelines issued by the State. The financial statements are prepared and presented in accordance with all the provisions of each standard, circulars guiding the implementation of the standards, and the current Enterprise Accounting System in use.

. 2.3. basis for preparing financial statements

Financial Report are presented based on the historical cost principle.

The company's financial statements are prepared based on the aggregation of transactions and events that occur and are recorded in the accounting books at the dependent accounting units and at the company's office.

In the company's financial statements, internal transactions and balances related to assets, equity, and internal receivables and payables have been fully eliminated.

. 2. Financial tools*Initial recognition***Financial assets**

The company's financial assets include cash, accounts receivable from customers, and other receivables. At the time of initial recognition, financial assets are determined at the purchase price/issue cost plus any other costs directly related to the purchase or issuance of those financial assets

Financial liabilities

The company's financial liabilities include loans, accounts payable to suppliers, other payables, and accrued expenses. At the time of initial recognition, the financial liabilities are determined at the issue price plus any costs directly related to the issuance of those financial liabilities.

Subsequent measurement

Currently, there are no specific regulations regarding the revaluation of financial instruments after initial recognition.

. 2.5. foreign currency operations

Foreign currency transactions in fiscal year Converted to Vietnamese Dong at the actual exchange rate on the transaction
The actual exchange rate for foreign currency transactions: It is the exchange rate specified in the foreign exchange purchase and sale contract between the company and the commercial bank

The actual exchange rate for revaluing foreign currency-denominated monetary items at the financial statement preparation date is determined based on the following principle:

- For items classified as assets: The exchange rate applied is the foreign currency buying rate of the commercial bank where the company frequently conducts transactions.
- For foreign currency deposits: The exchange rate applied is the buying rate of the bank where the company holds the fo
- For items classified as liabilities: The exchange rate applied is the foreign currency selling rate of the commercial bank where the company frequently conducts transactions.

All actual exchange rate differences arising during the year and differences resulting from the revaluation of foreign currency-denominated monetary items at the financial statement preparation date are recognized in the business results of the fiscal year. Among them, the foreign exchange gain from the revaluation of year-end balances of foreign currency-denominated monetary items is not to be used for profit distribution or dividend payment.

. 2.6. Recognition of cash and cash equivalents

Cash includes cash on hand and demand deposits at banks

2.7. Recognition of financial investments

Investments in affiliated companies are initially recognized in the accounting books at cost. After initial recognition, the value of these investments is determined based on cost minus any provisions for impairment of the investment.

Investments in other entities include investments in equity instruments of other entities where there is no control, joint control, or significant influence over the investee. The initial carrying amount of these investments is determined at cost. After initial recognition, the value of these investments is determined based on cost, less any provisions for impairment of the investment.

Provisions for impairment of investments are made at the end of the period as follows:

- For investments in affiliated companies: Provisions for impairment are made when the investee company incurs losses, based on the financial statements of the affiliate at the time the provision is made.
- For long-term investments (not classified as trading securities) and where there is no significant influence over the investee: Provisions for impairment are made based on the financial statements of the investee at the time the provision is made.

2.8. Recognition of receivables

Receivables are tracked in detail according to the maturity of receivables, the debtor, the type of foreign currency receivable, and other factors as per the company's management needs.

Provision for doubtful receivables is made for amounts such as: receivables overdue as per the terms of economic contracts, loan agreements, contract commitments or debt commitments, and receivables that have not yet matured but are difficult to collect. In this case, the provision for overdue receivables is based on the length of the overdue period or an estimate of the potential loss that may occur.

2.9. Recognition of inventories

Inventories are initially recognized at cost, which includes purchase costs, processing costs, and other directly related costs incurred to bring the inventories to their current location and condition at the time of initial recognition. After initial recognition, at the time of preparing the financial statements, if the net realizable value of the inventories is lower than their cost, the inventories are recognized at their net realizable value.

The value of inventories is determined using the weighted average cost method on a monthly basis.

Inventories are accounted for using the perpetual inventory system.

The method for determining the value of work in progress at the end of the year: The costs of unfinished business operations are accumulated based on the actual costs incurred for each type of product that is not yet completed.

Provision for inventory impairment is made at the end of the period based on the difference between the cost of inventory and its net realizable value.

• 2.10. Recognition of Fixed assets

Tangible fixed assets and intangible assets are initially recognized at cost. During their use, tangible fixed assets and intangible assets are recorded at cost, less accumulated depreciation (for tangible assets) or amortization (for intangible assets).

Depreciation of fixed assets is calculated using the straight-line method, with the depreciation period estimated as follows:

- Buildings and structures.	06 - 25 years
- Machinery and equipment	05 - 20 years
- Transport vehicles	06 - 10 years
- Office equipment	03 - 06 years
- Other assets	03 - 10 years
- Management software	05 years

The Clinker production line is depreciated using the units of production method. The monthly depreciation amount is determined by multiplying the number of units produced during the month by the average depreciation rate per unit of product.

• 2.11. Construction in progress

Construction in progress includes fixed assets being purchased and constructed but not yet completed as of the end of the fiscal year and is recorded at cost. This cost includes expenses related to construction, installation of machinery and equipment, and other directly related costs. Construction in progress is only depreciated when these assets are completed and put into use.

• 2.12. lease contract

Operating lease is a type of lease where most of the risks and benefits associated with ownership of the asset belong to the lessor. Lease payments under an operating lease are recorded in the income statement using the straight-line method over the lease term.

• 2.13. Prepaid expenses

Costs incurred related to the results of production and business activities over multiple accounting periods are recorded as prepaid expenses and gradually allocated to the business results in subsequent accounting periods.

The calculation and allocation of long-term prepaid expenses into business production costs for each accounting period are based on the nature and extent of each type of expense to select an appropriate allocation method and criterion. Prepaid expenses are gradually allocated to production costs using the straight-line method.

• 2.14. Recognition of payables

Payables are monitored based on the payment terms, the creditor, the type of foreign currency payable, and other factors as per the company's management needs.

• 2.15. Recognition of borrowings

Loans are monitored by each borrower, loan agreement, and the repayment terms of the loans. In the case of foreign currency loans, detailed tracking is done according to the currency of the loan.

• **2.16. Recognition of borrowing expenses**

Borrowing costs are recognized as production and business expenses in the year they are incurred, except for borrowing costs directly related to the construction or production of construction in progress, which are capitalized as part of the value of the asset when the conditions specified in the Vietnamese Accounting Standard No. 16 "Borrowing Costs" are met. Additionally, for loans specifically used for the construction of fixed assets or investment properties, interest is capitalized even when the construction period is less than 12 months.

• **2.17. Recognition of accrued expenses**

Amounts payable for goods and services received from suppliers or provided to customers during the reporting period, but not yet paid, as well as other payables such as interest expenses on loans payable, are recognized as production and business expenses for the reporting period.

The recognition of accrued expenses into production and business costs during the year is done based on the principle of matching revenue with the expenses incurred in the same year. The accrued expenses will be settled with the actual costs incurred. Any difference between the estimated accrual and the actual expense will be reversed.

• **2.18. Recognition of unrealized revenues**

Unearned revenue includes revenue received in advance from customers for goods that have not yet been delivered.

Unearned revenue is transferred to sales revenue and service income based on the amount determined in accordance with each fiscal year.

• **2.19. Recognition of owners' equity**

The owner's invested capital is recognized based on the actual capital contributed by the owner. The owner's invested

Share premium reflects the difference between the par value, direct costs related to the issuance of shares, and the issue price of the shares (including cases of reissuing treasury shares). It can be a positive premium (if the issue price is higher than the par value and direct costs related to the issuance) or a negative premium (if the issue price is lower than the par value and direct costs related to the issuance).

Treasury shares are shares issued by the company and repurchased by the company. These shares are not canceled and will be reissued within the time frame stipulated by securities law. Treasury shares are recorded at the actual repurchase cost and presented on the Balance Sheet as a reduction in the Owner's Equity. The cost of treasury shares when reissued or used for dividend payment, bonuses, etc., is calculated using the weighted average cost method.

Undistributed after-tax profit reflects the business results (profits or losses) after corporate income tax and the company's profit distribution or loss treatment situation. In cases of dividend payments or profits distributed to the owners beyond the undistributed after-tax profit, such amounts are recorded as a reduction in the capital contribution. Undistributed after-tax profit can be distributed to investors based on their capital contribution ratio, after approval by the General Meeting of Shareholders and after allocating funds according to the company's charter and the regulations of Vietnamese law.

The company allocates the following funds from the net profit after corporate income tax based on the proposal of the Board of Directors and approval by the shareholders at the Annual General Meeting:

- Development Investment Fund: This fund is allocated to support the expansion of the company's operations or for deep investment activities.
- Reward and welfare fund and Executive Board reward fund: This fund is allocated for rewarding and providing material incentives, contributing to the overall benefit and improving welfare for employees. It is presented as a liability on the Balance Sheet.

Dividends payable to shareholders are recognized as a liability on the company's Balance Sheet after the Board of Directors announces the dividend declaration and the Vietnam Securities Depository announces the dividend entitlement date.

• 2.20. Recognition of revenue

Sales revenue.

Sales revenue is recognized when the following conditions are met simultaneously:

- The majority of the risks and rewards associated with ownership of the product or goods have been transferred to the
- The company no longer retains control over the goods as the owner or has the authority to manage the goods.
- The revenue can be reliably measured.
- The company has received or will receive economic benefits from the sales transaction.
- The costs related to the sales transaction can be reliably determined.

Financial revenue.

Revenue from interest, royalties, dividends, profits from shareholding, and other financial activities is recognized when

- It is probable that economic benefits will be obtained from the transaction.
- Revenue figures are determined with relative certainty.

• 2.21. Recognition of revenue deductions

Deductions from revenue from goods sold and services provided during the year include: trade discounts and returned goods.

Trade discounts and returned goods arising in the same period as the consumption of products, goods, and services are adjusted to reduce the revenue of the period in which they occur. In cases where the products, goods, or services were consumed in previous periods and revenue deductions arise in subsequent periods, the revenue adjustments follow these principles: If the adjustments occur before the issuance of the Financial Report, they are recorded as a reduction in revenue on the Financial Report of the reporting period (previous period). If the adjustments arise after the issuance of the Financial Report, they are recorded as a reduction in revenue in the period in which they occur (subsequent period).

. 2.22. Recognition of cost of goods sold

The cost of goods sold during the year is recognized in alignment with the revenue generated during the year and adheres to the principle of prudence. Cases of material or goods losses exceeding standard allowances, costs exceeding normal thresholds, or inventory losses (after deducting the liability of relevant individuals or groups) are fully and promptly recorded in the cost of goods sold for the year.

. 2.23. Recognition of financial expenses

Expenses recognized as financial expenses include:

- Expenses or losses related to financial investment activities;
- Borrowing costs;

The above expenses are recognized based on the total amount incurred during the period and are not offset against

. 2.24. corporate income tax**a) Current corporate income tax (CIT) expense**

Current corporate income tax (CIT) expense is determined based on taxable income for the period and the applicable CIT rate for the current financial year.

b) The current year's corporate income tax (CIT) rate

The company is subject to a corporate income tax rate of 20% for its business activities that generate taxable income Accounting period from January 1, 2026 to June 30, 2026.

. 2.25. profit per share

Basic earnings per share are calculated by dividing the profit or loss after tax attributable to common shareholders of the company (adjusted for appropriations to the Bonus and Welfare Fund and the Executive Bonus Fund) by the weighted average number of common shares outstanding during the year.

. 2.26. Related parties

Parties are considered related if they have the ability to control or significantly influence the other party in making financial and operational policy decisions. The related parties of the Company include:

- Enterprises that directly or indirectly, through one or more intermediaries, have control over the Company, are controlled by the Company, or are under common control with the Company, including the parent company, subsidiaries, and associates;
- Individuals who directly or indirectly hold voting rights in the Company and have significant influence over the Company, key management personnel of the Company, and close family members of these individuals;
- Enterprises in which the individuals mentioned above directly or indirectly hold a significant portion of voting rights or have significant influence over these enterprises.

When considering each related party relationship for the preparation and presentation of the Financial Report, the Company focuses on the substance of the relationship rather than the legal form of the relationship.

. 2.27. Divisional information

The Company's main business activity is the production and trading of cement, primarily conducted within the territory of Vietnam. Therefore, the Company does not present segment reports by business field or geographical area.

Financial assets and financial liabilities have not been revalued at fair value as of the end of the fiscal year, as required by Circular No. 210/2009/TT-BTC and current regulations. These regulations require the presentation of financial statements and disclosures regarding financial instruments but do not provide equivalent guidance for the revaluation and recognition of the fair value of financial assets and financial liabilities, except for the provisions for bad debts, which have been detailed in the relevant disclosures.

Financial risk management

The financial risks of the Company include market risk, credit risk, and liquidity risk. The Company has developed a control system to ensure a reasonable balance between the costs of arising risks and the costs of risk management. The Board of General Directors of the Company is responsible for monitoring the risk management process to ensure a reasonable balance between risk and risk control.

Market risk

The business operations of the Company will primarily be exposed to risks arising from changes in exchange rates and int

Exchange rate risk:

The Company is exposed to exchange rate risk because the fair value of future cash flows of a financial instrument will fluctuate with changes in foreign exchange rates when the Company's loans, revenues, and expenses are denominated in currencies other than the Vietnamese đồng.

Interest rate risk:

The Company is exposed to interest rate risk because the fair value of future cash flows of a financial instrument will fluctuate with changes in market interest rates when the Company has deposits, with or without maturity, loans, and interest-bearing debts with floating interest rates. The Company manages interest rate risk by analyzing the competitive landscape in the market to secure favorable interest rates for its purposes.

Rủi ro tín dụng

Credit risk is the risk that a party involved in a financial instrument or contract will be unable to fulfill its obligations, resulting in a financial loss for the Company. The Company faces credit risks from its business operations (mainly from accounts receivable from customers) and financial activities (including bank deposits and other financial instruments).

	Up to 1 year	Over 1 year to 5 years	Over 5 years	Total
	VND	VND	VND	VND

Accounts receivable, other receivables	19.716.067.165	465.000.000	-	20.181.067.165
	19.776.056.997	465.000.000	-	20.241.056.997

Liquidity risk

Liquidity risk is the risk that the Company will face difficulties in fulfilling its financial obligations due to a lack of capital. The Company's liquidity risk mainly arises from the mismatch in the maturity dates of its financial assets and financial liabilities.

The payment terms of financial liabilities are based on the expected payments under the contract (on the basis of principal cash flows) as follows:

	Từ 1 năm trở xuống	Trên 1 năm đến 5 năm	Trên 5 năm	Cộng
	VND	VND	VND	VND
As of 30/06/2026				
Loans and debts	218.149.493.374	21.750.000.000	-	239.899.493.374
Accounts payable, other payables	274.386.248.488	-	-	274.386.248.488
Accrued expenses	75.886.033.921	-	-	75.886.033.921
	568.421.775.783	21.750.000.000	-	590.171.775.783
As of 01/01/2026				
Loans and debts	212.395.332.174	27.500.000.000	-	239.895.332.174
Accounts payable, other payables	273.858.428.113	-	-	273.858.428.113
Accrued expenses	74.788.862.179	-	-	74.788.862.179
	561.042.622.466	27.500.000.000	-	588.542.622.466

The Company believes that the level of concentration risk regarding debt repayment is manageable. The Company has the ability to settle its maturing debts from cash flows generated by its business operations and proceeds from maturing
