Selected Notes to the Financial Statements

Accounting period from January 1, 2026 to June 30, 2026

I. Characteristics of business operations

1. Forms of capital ownership

Hanoi Civil Construction Investment Joint Stock Company (hereinafter referred to as "the Company"), was established and operates under Business Registration Certificate No. 0103018181 dated July 2, 2007, issued by the Hanoi Department of Planning and Investment. The Company has had 13 amendments to its Business Registration Certificate.

According to the 13th Amendment to the Enterprise Registration Certificate issued by the Hanoi Department of Planning and Investment on August 23, 2023, the Company's charter capital is VND 270,269,070,000 (In words: Two hundred seventy billion, two hundred sixty-nine million, seventy thousand Vietnamese dong)

The Company's shares are registered for trading on the UPCoM market under the ticker symbol XDH

2. Business field

The company operates primarily in the construction and real estate sectors.

3. Business lines

The company operates primarily in the following areas:

- Construction of industrial, civil, and residential buildings;
- Construction of infrastructure projects, road transport projects, and small and medium-sized irrigation projects;
- Construction and installation of power lines and substations up to 35KV;
- Construction and installation of equipment and machinery for projects;

Real estate business, land use rights belonging to the owner, user or lessee;

Company headquarters located at: No. 292 Van Chuong Alley, Kham Thien Street, Van Mieu - Quoc Tu Giam Ward, Hanoi City.

4. Normal production and business cycle

The company's normal production and business cycle lasts for more than 12 months.

5. Staff

The number of employees as of June 30, 2026 is 128.

II. Accounting period, currency used in accounting

1. Accounting period

The Company's accounting period follows the calendar year, beginning on January 1st and ending on December 31st each year.

2. Currency used in accounting

The currency used in accounting is the Vietnamese Dong ("VND"), and accounting is based on the historical cost principle, in accordance with Vietnamese Accounting Standards, the Vietnamese Enterprise Accounting System, and relevant legal regulations concerning the preparation and presentation of financial statements.

III. Applicable Accounting Standards and Regulations

1. Applicable Accounting Standards and Regulations

The company applies Vietnamese Accounting Standards and the Enterprise Accounting System issued under Circular No. 99/2025/TT-BTC dated October 27, 2025, of the Ministry of Finance guiding the Enterprise Accounting System.

2. Statement on Compliance with Accounting Standards and Accounting Regulations

Selected Notes to the Financial Statements

Accounting period from January 1, 2026 to June 30, 2026

The Company's financial statements are prepared and presented in compliance with the requirements of current Vietnamese Accounting Standards and the Vietnamese Enterprise Accounting System, as well as relevant legal regulations concerning the preparation and presentation of financial statements.

IV. Summary of key accounting policies

1. Accounting estimates

The preparation of financial statements in compliance with Vietnamese accounting standards, the Vietnamese corporate accounting system, and relevant legal regulations concerning the preparation and presentation of financial statements requires the Board of Directors to make estimates and assumptions affecting the reported figures on liabilities, assets, and the presentation of contingent liabilities and assets at the financial statement date, as well as the reported figures on revenue and expenses throughout the operating period. Although accounting estimates are made to the best of the Board of Directors' knowledge, actual figures may differ from the estimates and assumptions made.

2. Principles for recognizing cash and cash equivalents

Cash and cash equivalents include cash on hand, demand deposits that are highly liquid, easily convertible into cash, and have low risk associated with fluctuations in value.

3. Accounting principles for financial investments

Investments in equity instruments of other entities.

Investments in equity instruments of other entities reflect investments in equity instruments in which the Company does not have control, joint control, or significant influence over the investee.

Investments in equity instruments of other entities are initially recognized at cost, including the purchase price or capital contribution plus direct costs associated with the investment. Dividends and profits from periods prior to the investment being acquired are accounted for as a reduction in the value of the investment itself. Dividends and profits from periods after the investment is acquired are recognized as revenue. Dividends received in the form of shares are tracked only in terms of the number of additional shares received, not the par value of the received shares.

4. Accounting principles for accounts receivable

Accounts receivable are presented at their book value less any provisions for doubtful accounts.

The classification of receivables is carried out according to the following principles:

Accounts receivable from customers reflect commercial receivables arising from purchase-sale transactions between the Company and buyers who are independent entities from the Company.

- Other receivables reflect non-commercial receivables that are not related to purchase or sale transactions.

Provisions for doubtful receivables are set aside for accounts receivable that are overdue as stated in economic contracts, contractual agreements, or debt repayment commitments, which the enterprise has repeatedly demanded but has yet to recover, or accounts receivable that the debtor is unlikely to pay due to liquidation, bankruptcy, or similar difficulties.

Increases or decreases in the balance of provisions for doubtful receivables that need to be set aside at the closing date of the financial statements are recorded as business management expenses.

5. Principles of Inventory Recognition

Inventory is determined on the basis of the lower of cost and net realizable value.

The original cost of inventory includes the purchase cost, processing costs, and other directly related costs incurred (if any) to bring the inventory to its current location and condition.

Selected Notes to the Financial Statements

Accounting period from January 1, 2026 to June 30, 2026

Inventory refers to real estate purchased or constructed for sale in the normal course of the Company's operations, not for lease or appreciation, and is determined on the lower of the cost to bring each item to its current location and condition and its net realizable value. The cost of real estate inventory includes: land use fees and land development costs, construction costs payable to contractors, interest expenses, design consulting fees, land leveling and compensation costs, consulting fees, land transfer tax, general construction management costs, and other related expenses.

Net realizable value is the estimated selling price of inventory in the normal course of business less the estimated costs to complete and the estimated costs necessary for its sale.

Inventory values are calculated using the weighted average method and accounted for using the perpetual inventory method.

6. Principles of recognition and depreciation methods for fixed assets.

6.1 Principles of recognition and depreciation methods for tangible fixed assets.

Tangible fixed assets are recorded at their original cost and are reflected on the Balance Sheet according to the indicators of original cost, accumulated depreciation, and net book value.

The original cost of purchased tangible fixed assets includes the purchase price (minus any trade discounts or price reductions), taxes, and costs directly related to bringing the asset into a ready-to-use condition.

The original cost of self-constructed or self-manufactured tangible fixed assets includes the actual cost of the self-constructed or self-manufactured tangible fixed assets and the installation and commissioning costs.

Expenses incurred after the initial recognition of tangible fixed assets are added to the asset's cost when these expenses are certain to increase future economic benefits. Expenses that do not meet this condition are recognized by the Company as operating expenses in the current period.

The company applies the straight-line depreciation method to tangible fixed assets. Tangible fixed assets are classified into groups of assets with similar characteristics and purposes in the company's production and business operations, including:

<i>Type of fixed asset</i>	<i>Depreciation period (years)</i>
Houses and buildings	05 - 30
Machinery and equipment	03 - 10
Transportation vehicles, transmission equipment	05 - 10
Management equipment and tools	03 - 05
Other assets	04 - 05

The gains and losses arising from the liquidation or sale of assets are the difference between the income from liquidation and the remaining value of the asset, and are recorded in the income statement.

6.2 Principles of recognition and depreciation methods for intangible fixed assets.

Intangible fixed assets are recorded at their original cost and are reflected on the Balance Sheet according to the indicators of original cost, accumulated depreciation, and net book value.

The initial cost of intangible fixed assets includes all costs incurred by the company to acquire the asset up to the point when the asset is ready for use.

Costs related to intangible fixed assets that arise after initial recognition are recognized as production and business expenses in the period unless these costs are directly associated with a specific intangible fixed asset and increase the economic benefits from that asset.

When fixed assets are sold for liquidation, the original cost and accumulated depreciation are written off, and any profit or loss arising from the liquidation is recognized as income or expense in the year.

The Company's intangible fixed assets include the Company's logo and land use rights.

Selected Notes to the Financial Statements

Accounting period from January 1, 2026 to June 30, 2026

The company logo is depreciated using the straight-line method over 5 years. The company logo has already been fully depreciated in previous accounting periods.

Land use rights encompass all actual costs incurred by the Company directly related to the land used, including: money spent to acquire land use rights, costs for compensation, land clearance, land leveling, registration fees, etc. Land use rights without a specified term are not subject to depreciation.

7. Principles of recognition and depreciation methods for investment properties.

Principles for recognizing investment properties

The Company's investment properties are the right to use land, buildings, parts of buildings, or infrastructure owned by the Company and used for the purpose of generating rental income. Investment properties are presented at their original cost less accumulated depreciation. The original cost of an investment property is the total cost incurred by the Company or the fair value of the amounts given in exchange for acquiring the investment property up to the time of purchase or completion of construction.

Costs related to investment properties that arise after initial recognition are recognized as expenses, unless these costs are likely to cause the investment property to generate more future economic benefits than initially assessed, in which case they are added to the original cost.

When an investment property is sold, the original cost and accumulated depreciation are written off, and any resulting gains or losses are accounted for as income or expenses in the period.

The conversion of owner-occupied or inventory real estate to investment real estate only occurs when the owner ceases to use the property and begins leasing it to another party or upon completion of the construction phase. The conversion of investment real estate to owner-occupied or inventory real estate only occurs when the owner begins to use the property or begins to develop it for sale. The conversion of investment real estate to owner-occupied or inventory real estate does not alter the original cost or residual value of the property at the date of conversion.

Methods of depreciation for investment properties

The Company's investment properties are leased infrastructure assets that are depreciated using the straight-line method over an estimated useful life of 20 to 30 years.

8. Principles for recognizing and allocating prepaid expenses.

Prepaid expenses include actual expenses incurred but related to the business results of multiple accounting periods. The Company's prepaid expenses include provisional corporate income tax payments based on payment schedules and asset repair costs.

The provisional corporate income tax is recorded based on the amount of tax payable to the State budget related to the provisional payments made according to the progress of the projects that the Company is implementing. This amount will be recorded as current corporate income tax expense in the accounting period when the Project is completed.

One-time, large-value asset repair costs are allocated to expenses using the straight-line method over three years.

9. Accounting principles for liabilities

Liabilities are amounts payable to suppliers and other parties. Liabilities include accounts payable to vendors and other payables. Liabilities cannot be recorded lower than the actual payment obligations.

The classification of liabilities is carried out according to the following principles:

- Accounts payable to suppliers include commercial liabilities arising from transactions involving the purchase of goods, services, or assets, where the seller is an independent entity from the buyer.

Selected Notes to the Financial Statements

Accounting period from January 1, 2026 to June 30, 2026

- Other payables include non-commercial payables that are not related to transactions involving the purchase, sale, or provision of goods or services.

Accounts payable are tracked in detail by individual payer and payment due date.

10. Loan recording principles

Loans are recorded on the basis of receipts, bank documents, promissory notes, and loan agreements.

Loans are tracked by individual borrower and loan term.

11. Principles for recognizing payable expenses

The company's payable expenses include provisions for infrastructure costs and construction costs, which are actual expenses incurred during the reporting period but not yet paid due to the lack of invoices or insufficient accounting documents, and are recorded as production and business expenses of the reporting period; and payables not yet incurred due to the goods or services not yet recorded, but are pre-calculated into production and business expenses of this period to ensure that when they actually arise, they do not cause sudden spikes in production and business expenses.

The company only accrues costs in advance to provisionally calculate the cost of goods sold for completed items that have been determined to have been sold during the period. These accrued costs are those included in the investment and construction budget but for which there is insufficient documentation for volume verification. The amount of accrued costs is provisionally calculated to correspond to the cost of goods sold based on the total estimated cost of the project that has been determined to have been sold.

12. Principles for recognizing unearned revenue

The Company's unearned revenue includes revenue received in advance from real estate business and revenue received in advance from leasing premises.

The Company's unearned real estate revenue is recognized based on the amount collected according to the schedule stipulated in the Contract and for which invoices have been issued to customers purchasing homes.

Revenue from leasing premises recognized in advance for multiple accounting periods and payments from customers according to the schedule stipulated in the Contract are recognized based on the amount collected and invoices issued. The allocation for revenue recognition is based on the actual lease period of the contract.

13. Principles of recognizing equity

Owner's equity is recorded based on the actual amount of capital contributed by the shareholders.

Undistributed after-tax profit is the profit (earnings) from the business's operations after deducting the corporate income tax expense for the current year and adjustments due to retrospective application of changes in accounting policies and retrospective adjustments due to material errors from previous years.

Profits after corporate income tax are distributed to shareholders after provisions for funds have been set aside in accordance with the Company's Articles of Association and legal regulations, and after approval by the General Meeting of Shareholders.

The distribution of profits to shareholders takes into account non-monetary items within undistributed after-tax profits that may affect cash flow and dividend payment capacity, such as gains from the revaluation of contributed assets, gains from the revaluation of monetary items, and other non-monetary financial instruments.

Dividends are recognized as liabilities when approved by the General Meeting of Shareholders.

14. Principles and methods for recognizing revenue and income.

Selected Notes to the Financial Statements

Accounting period from January 1, 2026 to June 30, 2026

The company's revenue includes revenue from construction, revenue from renting construction equipment, land rental, revenue from real estate transfers, and revenue from interest on bank deposits.

The Company's construction revenue is recorded in accordance with the Company's accounting policy regarding construction contracts.

Construction revenue

When the outcome of contract performance can be reliably estimated:

- For construction contracts that stipulate that the contractor is paid according to the planned progress, revenue and related expenses are recognized corresponding to the portion of work completed, as determined by the Company itself on the closing date for financial reporting.
- For construction contracts that stipulate that the contractor is paid based on the value of the work performed, revenue and related expenses are recognized corresponding to the portion of work completed as confirmed by the client and reflected in the issued invoice.

Increases or decreases in construction volume, compensation payments, and other income are only recognized as revenue when agreed upon with the customer.

When the outcome of a construction contract cannot be reliably estimated, then:

- Revenue is only recognized up to the extent of the contract costs incurred that are relatively certain to be repaid.
- Contract costs are only recognized as expenses when they have been incurred.

The difference between the cumulative revenue of the construction contract as recorded and the cumulative amount recorded on the payment invoice according to the planned progress of the contract is recognized as a receivable or payable according to the planned progress of the construction contracts.

Real estate sales revenue

Revenue from the sale of real estate in which the Company is the investor is recognized when all five (5) of the following conditions are simultaneously met:

- The property has been fully completed and handed over to the buyer, and the business has transferred the risks and benefits associated with ownership of the property to the buyer;
- The business no longer holds the right to manage the real estate as the property owner or the right to control the real estate;
- Revenue figures are relatively certain;
- The company has obtained or will obtain economic benefits from the sale of the real estate;
- Determine the costs associated with a real estate sale transaction.

Revenue from providing services

Revenue from service provision transactions is recognized when the outcome of that transaction can be reliably determined. In the case of service provision transactions relating to multiple periods, revenue is recognized in the period based on the results of the work completed as of the closing date of the financial statements for that period. The outcome of a service provision transaction is determined when all four (4) conditions are met:

- Revenue is determined with relative certainty; when the contract stipulates that the buyer has the right to return the purchased service under specific conditions, revenue is only recognized when those specific conditions no longer exist and the buyer no longer has the right to return the service provided;

There is the potential to obtain economic benefits from the transaction of providing that service;

- To determine the portion of work completed as of the financial statement closing date; and
- Identify the costs incurred for the transaction and the costs to complete the transaction for providing that service.

Selected Notes to the Financial Statements

Accounting period from January 1, 2026 to June 30, 2026

Interest income

Interest is recognized on an accrual basis, determined by the balances of deposit accounts and the effective interest rate for each period.

15. Tax obligations

Value Added Tax (VAT)

The company applies the declaration and calculation of VAT according to the guidelines of current tax law.

Corporate income tax

Corporate income tax represents the total value of taxes currently payable.

The current tax payable is calculated based on taxable income for the year. Taxable income differs from net profit presented in the Statement of Income because taxable income excludes taxable or deductible income or expenses from other years (including carry-forward losses, if any) and also excludes non-taxable or non-deductible items.

The company applies a corporate income tax rate of 20% on taxable profits.

The determination of a company's corporate income tax is based on current tax regulations.

However, these regulations change from time to time, and the final determination of corporate income tax depends on the results of an audit by the competent tax authority.

Other taxes

Other taxes and fees are declared and paid by businesses to the local tax authorities in accordance with current tax laws in Vietnam.

16. Department Report

segment is a distinguishable component of the Company involved in providing related products or services (segment by business area), or in providing products or services within a specific economic environment (segment by geographic area) where the segment has different economic risks and benefits from other business segments. The Board of Directors believes that the Company's core business is construction and real estate trading and operates primarily within a segment by geographic area in Vietnam. Therefore, the Company does not present segment reports by business area and by geographic area as required by Vietnamese Accounting Standard 28 - Segment Reporting.

Selected Notes to the Financial Statements

Accounting period from January 1, 2026 to June 30, 2026

The company has filed a lawsuit against Hanoi Bridge and Road Construction and Investment Joint Stock Company (hereinafter referred to as "Bridge and Road Company") with the Hoan Kiem District People's Court, Hanoi City, requesting the Court to resolve the following: (i) Compel Bridge and Road Company to continue fulfilling its capital contribution obligations under the signed Investment and Business Cooperation Agreement and its appendices; (ii) In the event that Bridge and Road Company fails to fulfill its capital contribution and interest payment obligations, the company requests the Court to rule on: Reducing Bridge and Road Company's capital contribution ratio; Redistributing the area in square meters of commercial service floor space and parking spaces corresponding to Bridge and Road Company's actual capital contribution ratio; Compelling Bridge and Road Company to return all profits and interest earned from exploiting the areas received since 2019 exceeding its entitled ratio.

On November 6, 2024, the Hoan Kiem District People's Court, Hanoi City, issued judgment No. 46/2024KDTM-ST regarding a dispute over a business investment cooperation contract. The court decided:

- Approving the Company's lawsuit against the Bridge and Road Construction Company regarding the "Dispute over Investment and Business Cooperation Contract" concerning the redistribution of profits from the E4 Yen Hoa apartment project, Yen Hoa Ward, Cau Giay District, Hanoi City.

- The total capital contribution value of the E4 Yen Hoa apartment project is determined to be VND 116.19 billion, with the specific capital contribution amounts and percentages for each party as follows:

The Bridge and Road Construction Company contributed VND 7.2 billion, representing 6.26% of the total capital.

The company has contributed VND 108.9 billion, representing 93.74% of the total capital.

Dividing the commercial service floor area and car parking spaces at the E4 Yen Hoa Apartment project according to the capital contribution ratio, specifically:

- + The Bridge and Road Construction Company is entitled to a profit share based on its capital contribution of 6.26%, equivalent to the value of commercial floor space and underground parking lots, which is VND 157 billion x 6.26% = VND 9.8 billion.

- + The Road and Bridge Construction Company is required to return to the Company the commercial service floor areas of the entire CT3 building and the car parking spaces in basement levels B1 and B2.

- + The company is entitled to profits in proportion to its capital contribution of 93.74%, equivalent to commercial floor space and underground parking lots with a monetary value of VND 157 billion x 93.74% = VND 147.9 billion.

After receiving back the commercial service floor space from the Bridge and Road Construction Company, the Company is responsible for continuing to sign contracts with the individuals and organizations currently leasing the space, ensuring the rights, obligations, and lease terms of the lessees as stipulated in the lease contracts signed with the Bridge and Road Construction Company.

- The Road and Bridge Construction Company is ordered to reimburse the other company the excess profit from parking services that the Road and Bridge Construction Company received, amounting to VND 261.2 million, which exceeded its entitled profit margin.

- The Bridge and Road Construction Company must pay the first-instance commercial court fees amounting to

- The company received a refund of the advance payment of court fees totaling VND 128.39 million.

On November 18, 2024, the Bridge and Road Construction Company filed an appeal against the entire judgment of the Hoan Kiem District People's Court. On January 20, 2025, the Hanoi City People's Court issued Notice No. 55/2025/TBTL - VA regarding the acceptance of the appellate case.

On June 25, 2025, the Hanoi City People's Court issued judgment No. 160/2025/KDTM-PT regarding a dispute over a business investment cooperation contract. The court decided to uphold the first-instance commercial judgment No. 46/2024/KDTM-ST dated November 6, 2024, of the Hoan Kiem District People's Court, Hanoi City. As of the date of this report, the Company and Hanoi Bridge and Road Construction and Investment Joint Stock Company have not yet reached an agreement on the contents of the court's ruling; therefore, the Q2/2026 financial report does not reflect any adjustments related to the court's rulings in the aforementioned judgments.
