Bim Son, July 20, 2026

Regarding the explanation for the 91% increase in net profit after tax in Q2/2026 compared to the same period in 2025.

Dear:

- State Securities Commission
- Hanoi Stock Exchange

In the second quarter of 2026, Vicem Bim Son Packaging Joint Stock Company maintained stable production and business operations. Net profit after tax for the period reached VND 0,79 million, equivalent to 191% compared to the same period in 2025 (a 91% increase).

The main reasons for the 91% increase in net profit after tax in the second quarter of 2026 compared to the same period in 2025 are:

The volume of packaging shells sold in the second quarter of 2026 reached 13,938 million shells, equivalent to 97% compared to the same period in 2025, although the volume of packaging shells sold decreased by 3% compared to the same period in 2025. However, the average selling price of products in the second quarter of 2026 increased by 6-7% compared to the same period in 2025.

Best regards!
