5. Statement on comparability of information in Financial statement

The financial report has been prepared in a manner ensuring the comparability of data across corresponding financial periods.

II. ACCOUNTING PERIOD AND PRESENTATION CURRENCY**1. Accounting period**

The annual accounting period begins on January 1 and ends on December 31.

2. Presentation Currency

Vietnam Dong (VND) is used as the currency for accounting records.

NOTES TO THE FINANCIAL STATEMENTS*For Second quarter of 2026**Unit: Vietnam Dong***III. ACCOUNTING STANDARDS AND SYSTEM****1. Accounting System**

The Company applies the Vietnamese Accounting Standards and System, which were issued together with the Circular No. 99/2025/TT-BTC dated 27 October 2025 and presentation of the Financial Statements as well as other Circulars guiding implementation of Vietnamese Accounting Standards of the Ministry of Finance.

2. Statement of the compliance with the Accounting Standards and System

We have prepared and presented the financial statements in accordance with Vietnamese accounting standards, the Vietnamese corporate accounting regime and relevant legal regulations. The Financial Statements have been presented honestly and fairly on the financial position, business results and cash flows of the Company.

The selection of data and information required to be presented in the Notes to the financial statements is carried out according to the Materiality principle prescribed in Vietnamese Accounting Standard No. 21 "Presentation of Financial Statements".

IV. ACCOUNTING POLICIES**1. Principles of accounting for Cash and Cash equivalents**

Cash includes cash, non-term bank deposits at banks that have been reconciled and verified at the end of the accounting period.

Cash equivalents includes term deposits and short-term investments with original maturities not exceeding three months from the date of investment, are highly liquid, readily convertible to known amounts of cash and are subject to an insignificant risk of change in value.

2. Principles of accounting for financial investments**Principles of accounting for trading securities**

Trading securities include stocks listed on the stock market; other types of securities and financial instruments held for trading purposes (including securities with a maturity of more than 12 months bought and sold for profit).

Trading securities recognized at cost, including: purchase price and directly related costs such as brokerage fees, transaction fees, and taxes. The original cost of trading securities is determined based on the fair value of the payments at the time the transaction occurs. The time of recording trading securities is the time when the investor has ownership, specifically as follows:

- Listed securities are recorded at the time of order matching (T+0);
- Unlisted securities are recorded at the time of official ownership as prescribed by law.

Provision for impairment of trading securities is made for the portion of the value that may be lost when there is solid evidence that the market value of the securities the Company is holding for trading purposes has decreased compared to the book value. The provision is made based on the market value of trading securities at the time of preparing the financial statements.

Principles of accounting for Investments in an associate

Investments in associates are recorded when the Company holds from 20% to less than 50% of the voting rights of the investees, has significant influence in making decisions on financial and operating policies at these companies.

Investments in subsidiaries, joint ventures and associates are initially recorded at cost and are not adjusted thereafter for changes in the investors' share of the investee's net assets. The cost includes the purchase price and any costs directly attributable to the investment. In the case of investments in non-monetary assets, the cost of the investment is recorded at the fair value of the non-monetary assets at the time of acquisition.

Provision for investment losses in joint ventures and associates is set up when the enterprise receiving the investment capital suffers a loss, leading to the possibility of the Company losing capital or when the value of investments in subsidiaries, joint ventures and associates decreases in value. The basis for setting up provision for investment losses is the consolidated financial statements of the invested company (if this company is the parent company), and the financial statements of the invested company (if this company is an independent enterprise without subsidiaries).

NOTES TO THE FINANCIAL STATEMENTS*For Second quarter of 2026**Unit: Vietnam Dong***2. Principles of accounting for financial investments (continue)****Principles of accounting for Investments in other entities**

An investment in another entity is an investment by the Company in the equity instruments of another entity but does not have control or joint control, and does not have significant influence over the investee.

Investments are recorded at cost, including purchase price and costs directly attributable to the investment. In the case of investments in non-monetary assets, the cost of the investment is recorded at the fair value of the non-monetary assets at the time of acquisition.

For investments that the Company holds for a long term (not classified as trading securities) and does not have significant influence over the investee, the provision for losses is made as follows:

+ Listed stock investment or fair value of investment is reliably determined, provision is made based on market value of shares.

+ For investments whose fair value cannot be determined at the reporting date, the provision is made based on the loss of the investee. The basis for setting up the provision for loss of investment in other entities is the consolidated financial statements of the invested company (if this company is the parent company), or the financial statements of the invested company (if this company is an independent enterprise without subsidiaries).

3. Principles of accounting for transaction receivables and other receivables**Principles of accounting for receivable: cost less allowance for doubtful receivables.**

The classification of receivables as receivables from customers and other receivables depends on the nature of the transaction or the relationship between the Company and the entities.

Method of establishing provision for doubtful receivables: provision for doubtful receivables is estimated for the lost value of receivables and other investments held to maturity with a similar nature to receivables that are difficult to collect and are overdue, not overdue but may not be collected because the borrower is unable to pay due to bankruptcy, in the process of dissolution, missing, absconding...

Principles of setting up provision for doubtful receivables: According to the Circular 48/2019/TT-BTC dated December 7, 2019 of the Ministry of Finance on "Guidance on the provision and use of provisions for inventory price reduction, loss of financial investments, bad debts and warranty of products, goods, construction works at enterprises"; Circular 34/2011/TT-BTC dated March 14, 2011 and Circular 89/2013/TT-BTC dated June 28, 2013 of the Ministry of Finance on amending Circular 228/2009/TT-BTC.

Material allocation method: based on production norms.

4. Principles of accounting for inventory

Principles of inventory recognition: Inventories are stated at cost (-) less allowance for diminution in value and allowance for obsolete or damaged inventories. The cost of inventories include purchase price, costs of conversion and other directly attributable costs incurred in bringing the inventories to their present location and condition.

The cost of inventories is determined as follows:

- Raw materials, materials, goods: include purchase price, transportation costs and other directly related costs incurred in bringing inventories to their present location and condition.

- Finished products: include costs of raw materials, direct labor and related general manufacturing costs allocated based on the cover price of each type of finished book incurred.

- Work in progress costs: include costs of main raw materials, direct labor and general manufacturing costs incurred during the production process.

NOTES TO THE FINANCIAL STATEMENTS

For Second quarter of 2026

Unit: Vietnam Dong

4. Recognition of principles for inventory (continue)**Inventory valuation method:** Weighted average cost.**Inventory accounting:** Perpetual method.

Method of establishing inventory allowance: Inventory allowance is established when the net realizable value of inventory is less than the cost price. Net realizable value is the estimated selling price less the estimated cost of completion and estimated selling expenses. The amount of inventory allowance is the difference between the cost price of inventory and their net realizable value. Inventory allowance is established for each inventory item whose cost price is greater than its net realizable value.

Method of establishing inventory reduction allowance: According to the Circular No. 228/2009/TT-BTC dated December 7, 2009 of the Ministry of Finance on "Guiding the regime of setting up and using provisions for inventory price reduction, loss of financial investments, bad debts and warranty of products, goods, construction works at enterprises"; Circular No. 34/2011/TT-BTC dated March 14, 2011 and Circular No. 89/2013/TT-BTC dated June 28, 2013 of the Ministry of Finance on amending Circular No. 228/2009/TT-BTC.

5. Principles of accounting for Depreciation (Tangible fixed assets)**5.1 Recognition of principles for Tangible fixed assets**

Tangible fixed assets are stated at cost less (-) accumulated depreciation. Initial cost is all costs that a company must spend to acquire fixed assets up to the time the asset is put into a state of readiness for use as expected. Expenditures incurred after initial recognition are only recorded as an increase in the original cost of fixed assets if it is certain that these costs will increase future economic benefits from the use of such assets. Expenditures that do not satisfy the above conditions are recorded as expenses in the period.

When fixed assets are sold or liquidated, the initial cost and accumulated depreciation are written off and any gain or loss arising from the disposal is included in income or expenses for the period.

Purchase of tangible fixed assets

The initial cost of fixed assets includes the purchase price (less (-) trade discounts or rebates), taxes (excluding refundable taxes) and direct costs related to bringing the assets to a state of readiness for use, such as costs of: installation, testing, experts and other directly related costs.

5.2 Principles of accounting for Intangible fixed assets

Intangible fixed assets are recorded at original cost minus (-) accumulated depreciation. The original cost of intangible fixed assets is the total cost that the company must spend to acquire intangible fixed assets up to the time the asset is put into use as expected.

Land use rights

The initial cost of intangible fixed assets, which are land use rights, is the amount paid when receiving the legal transfer of land use rights from another person, compensation costs, site clearance, leveling, registration fees, etc.

5.3 Depreciation method

Fixed assets are depreciated using the straight-line method over their estimated useful lives. The estimated useful life is the period over which the asset is useful for production and business.

The estimated useful lives are as follows:

<i>Buildings and structures</i>	06 - 25 year
<i>Machinery and equipment</i>	06 - 10 years
<i>Motor vehicles</i>	03 years
<i>Other intangible fixed assets: Website</i>	05 years

Land use rights with indefinite term are stated at cost and not amortised.

NOTES TO THE FINANCIAL STATEMENTS*For Second quarter of 2026**Unit: Vietnam Dong***6. Principles of accounting for prepaid expenses**

Prepaid expenses at the Company include actual expenses that have been incurred but are related to the business performance of many accounting periods. The Company's prepaid expenses include the following expenses: Non-deductible input VAT; tools and equipment for use awaiting allocation....

Method of allocating prepaid expenses: Calculating and allocating prepaid expenses to business operating expenses each period according to the straight-line method. Based on the nature and level of each type of expense, the allocation period is as follows: short-term prepaid expenses are allocated within 12 months; long-term prepaid expenses are allocated from 13 months to 36 months (except for land rental expenses).

7. Principles of accounting for liabilities

Liabilities are recorded at cost and not less than the payment obligation.

The Company classifies payables as payables from suppliers or other payables depending on the nature of the transaction or the relationship between the Company and the entities.

Payables are monitored in detail by payment terms, payable entities, primary currency (including revaluation of payables in accordance with the definition of foreign currency monetary items) and other factors according to the Company's management.

At the time of preparing financial statements, the Company immediately records a payable when there is evidence that a loss is likely to occur according to the prudence concept.

8. Principles of accounting for dividends and profits payable

Dividends and profits recognized under securities law.

9. Principles of accounting for loans

The value of loans recorded is the total amount borrowed from banks, organizations, financial companies and other entities (excluding loans in the form of bond issuance or preferred stock issuance with terms requiring the issuer to repurchase at a certain time in the future).

Loans and financial lease liabilities are monitored in detail for each lending entities, each debt agreement and each type of loan.

10. Principles and capitalization of accounting for borrowing costs:

Principles of accounting for borrowing costs: Loan interest and other costs arising directly related to the enterprise's loans are recorded as production and business expenses in the period, unless these costs arise from loans directly related to the business. followed by investment in construction or production of unfinished assets and is included in the value of that asset (capitalized) when the conditions specified in accounting standard No. 16 "Borrowing costs" are met.

11. Principles of accounting for payable expenses

Payable expenses include amounts payable for goods and services that the Company has received from sellers or provided to buyers during the reporting period but the Company has not actually paid due to lack of invoices or insufficient accounting records and documents, recorded in production and business expenses of the reporting period, such as: loan interest expenses; manuscript organization fees, copyright fees; brokerage commission expenses...

12. Principles of accounting for unearned revenue

Unearned revenue is revenue that will be recorded corresponding to the obligation that the Company will have to perform in one or more subsequent accounting periods.

Unearned revenue includes amounts paid by customers in advance for one or more accounting periods for leasing assets.

The method of allocating unearned revenue according to the matching concept with the obligations that the Company will have to perform in one or more subsequent accounting periods.

NOTES TO THE FINANCIAL STATEMENTS

For Second quarter of 2026

Unit: Vietnam Dong

13. Principles of accounting for owner's equity

Principles of accounting for owner's equity

Principles of accounting for owner's capital: Business capital is formed from the amount of money that shareholders have contributed to buy shares, stocks, or is supplemented from after-tax profits according to the Resolution of the General Meeting of Shareholders. Business capital is recorded according to the actual capital contributed in cash or assets calculated at the par value of the shares or capital mobilized to expand the scale of the company's operations.

Principles of accounting for undistributed earnings

Undistributed profit after tax is recorded as the profit (or loss) from the Company's business results after deducting (-) corporate income tax expenses of the current period and adjustments due to retroactive application of changes in accounting policies, retroactive adjustment of material errors of previous years.

Profit distribution is based on the Company's charter and approved by the annual General Meeting of Shareholders.

14. Principles of accounting for treasury stock

Equity instruments repurchased by the Company (treasury shares) are recorded at historical cost and deducted from equity. The Company does not recognize gains/(losses) on purchase, sale, issue or cancellation of its equity instruments. When re-issuing, the difference between the re-issue price and the book price of treasury shares is recorded in the item "Share premium".

15. Principles of accounting for revenue

Principles of accounting for revenue from sales

Sales revenue is recognized when the following five conditions are simultaneously satisfied: 1. The enterprise has transferred the majority of risks and benefits associated with ownership of the product or goods to the buyer; 2. The enterprise no longer holds the right to manage the goods as the owner of the goods or the right to control the goods; 3. Revenue is determined relatively reliably. When the contract stipulates that the buyer has the right to return the purchased products or goods under specific conditions, the enterprise is only allowed to recognize revenue when those specific conditions no longer exist and the buyer is not entitled to return the products or goods (except in the case of return in the form of exchange for other goods or services); 4. The enterprise has or will receive economic benefits from the sales transaction; 5. The costs related to the sales transaction can be determined.

If the contract outcome cannot be reliably determined, revenue will be recognized only to the recoverable extent of the recognized costs.

Principles and method of accounting for revenue from financial activities

Revenue from financial activities is recognized and simultaneously satisfies the two conditions for revenue recognition specified in Vietnam Accounting Standard No. 14 - Revenue and other income, including: recognized bank deposit interest based on the bank's monthly deposit interest notice and exchange rate difference interest.

When it is impossible to recover an amount that was previously recorded in revenue, the potentially irrecoverable or uncertainly recoverable amount must be accounted for in expenses incurred in the period, without recording a decrease in revenue.

16. Principles and method of accounting for cost of goods sold

Cost of goods sold reflects the cost of manufactured products sold during the year.

Cost of goods sold is recorded at the time the transaction occurs or when it is relatively certain that it will occur in the future, regardless of whether the money has been paid or not. Cost of goods sold and revenue are recorded simultaneously according to the matching principle.

NOTES TO THE FINANCIAL STATEMENTS

For Second quarter of 2026

Unit: Vietnam Dong

17. Principles and method of accounting for financial expenses

Financial expenses include: Interest expense; provision for investment depreciation; payment discounts, deferred sales interest.

Financial expenses are recorded in detail for each expense when actually incurred during the period and are reliably determined when there is sufficient evidence of these expenses.

18. Principles of accounting for selling expenses, administration expenses

Selling costs reflect actual costs incurred in the process of selling products, goods, and providing services, including costs of offering, introducing products, advertising products, and sales commissions. , costs of storage, packaging, loading and unloading, transportation, fuel, depreciation of transports...

Administration expenses reflect the general management costs of the enterprise, including salaries for employees of the enterprise management department (salaries, wages, allowances, etc.); social insurance, health insurance, union fees, unemployment insurance for enterprise management staff; expenses for office materials, labor tools, depreciation of fixed assets used for business management; land rent, business license tax; provision for doubtful receivables; outsourced services (electricity, water, telephone, fax, property insurance, fire and explosion insurance, etc.); other cash expenses (reception, customer conferences, etc.).

Sales expenses and administration expenses that have been recorded are not considered deductible expenses when calculating corporate income tax according to the provisions of the Tax Law, but if there are complete invoices and documents, expenses cannot be recorded as a decrease. accountant but only adjusts in CIT finalization to increase the amount of CIT payable.

19. Nguyên tắc và phương pháp ghi nhận chi phí thuế TNDN hiện hành

Corporate income tax expense includes current corporate income tax expense incurred during the year as a basis for determining the Company's after-tax business results in the current fiscal year.

Current corporate income tax expense: is the amount of corporate income tax payable (or recoverable) calculated on taxable income and the corporate income tax rate of the current year according to the current Corporate Income Tax Law. In 2024, the current corporate income tax rate is 20%.

Taxes payable to The State budget will be specifically settled with the tax authority. The difference between the tax payable according to the books and the settlement audit data will be adjusted when there is an official settlement with the tax authority.

20. Principles of accounting for earnings per share

Basic earnings per share is calculated by dividing the profit or loss attributable to the Company's shareholders, after deducting the Bonus and Welfare Fund made available during the period, by the weighted average number of common shares outstanding during the period.

Diluted earnings per share are calculated by dividing the after-tax profit or loss attributable to shareholders owning the Company's common shares (after adjusting for dividends on convertible preferred shares) by the weighted average number of ordinary shares outstanding during the period and the weighted average number of common shares that would be issued on conversion of all the dilutive potential common shares into common shares.

21. Financial instruments

Record initial value

Financial assets

According to Circular No. 210/2009/TT-BTC dated 6 November 2009 ("Circular 210"), financial assets are classified appropriately, for notes to the financial statements. The formation of financial assets is recorded at fair value through the Income Statement, loans and receivables, held-to-maturity investments and available financial assets to sell. The Company decides to classify these financial assets at the time of initial recognition.

NOTES TO THE FINANCIAL STATEMENTS*For Second quarter of 2026**Unit: Vietnam Dong***21. Financial instruments (continue)**

At initial recognition, financial assets are measured at cost plus directly attributable transaction costs.

The Company's financial assets include cash, receivables from customers and other receivables.

Financial liabilities

Financial liabilities within the scope of Circular 210, for notes to the financial statements, are classified appropriately into financial liabilities recognized through the Income Statement, financial liabilities determined at allocated value. The Company determines the classification of financial liabilities at the time of initial recognition.

All financial liabilities are initially recognized at cost plus directly related transaction costs.

The Company's financial liabilities include accounts payable to suppliers, payable expenses, other payables, short-term and long-term loans.

Value after initial recording

There is currently no requirement to re-determine the value of financial instruments after initial recognition.

Clearing of financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the financial statements if, and only if, the entity has a legal rights to offset the amounts recognition and intend to settle on a net basis, or liquidate the assets and settle the liabilities simultaneously.

22. Related parties

Related parties are enterprises and individuals that directly or indirectly through one or more intermediaries, control, or are controlled by, or are under control by the Company. Associated parties, individuals owning, directly or indirectly, an interest in the voting power of the Company that gives them significant influence over the Company, key management positions such as the Board of Directors, the Board of Management, family's members of these individuals or associated parties or companies associated with these individuals also constitute related parties. When considering each relationship between related parties, it is important to pay attention to the nature of the relationship, not the legal form.

23. Principles of presenting assets, revenue, and business results by department

Business departments include business segments and geographical segments.

A business segment is a distinguishable component of the Company that is engaged in providing an individual product or service or a group of related products or services and that is subject to risks and returns that are different from those of other business segments.

A geographical segment is a distinguishable component of the Company that is engaged in providing products or services within a particular economic environment and that is subject to risks and returns that are different from those of components operating in other economic environments.

For management purposes, a company with nationwide business operations should present its main segment reports by business sector.

24. Other accounting principles and methods

VAT: The Company pays VAT using the deduction method. VAT rates are 10%, 5% and non-taxable for each type of item according to current regulations.

Other taxes and fees are implemented according to current regulations on taxes and fees of the State.

13. Objectives and policies for financial risk management

The main risks from financial instruments include market risk, credit risk and liquidity risk.

The Board of General Directors reviews and applies management policies for the above risks as follows:

13.1 Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate with changes in market prices. There are three types of market risk: interest rate risk, currency risk and other price risk, such as stock price risk. Financial instruments affected by market risk include deposits, available-for-sale investments, loans and debts.

The sensitivity analyses presented below relate to the Company's financial position as at 30/06/2026 compared to the same period last year.

These sensitivity analyses have been prepared on the basis that the value of net debt, the ratio of fixed-rate debt to floating-rate debt and the correlation ratio between foreign currency-denominated financial instruments are constant.

When calculating the sensitivity analysis, the Board of Management assumes that the sensitivity of the available-for-sale debt instruments on the balance sheet and related items in the income statement is affected by changes in relevant market risk assumptions. This analysis is based on the Company's financial assets and financial liabilities held as at 30/06/2026 compared to the same period in the previous year.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Market risks due to changes in the Company's interest rates are mainly related to the Company's loans, debt, and cash.

The Company manages interest rate risk by analyzing the competitive situation in the market to obtain interest rates that are beneficial for the Company's purposes and remain within its risk management limits.

NOTES TO THE FINANCIAL STATEMENTS

For Second quarter of 2026

Unit: Vietnam Dong

13.1 Market risk (continue)

Interest rate sensitivity

The sensitivity of the Company's loans and liabilities, cash to reasonably possible changes in interest rates is presented as follows.

With the assumption that other variables remain unchanged, fluctuations in interest rates on loans and debt with floating interest rates affect the Company's pre-tax profit as follows:

	Increase/ Decrease basis point	Impact on pre-tax profit
This year		
VND	+100	356.106.485
VND	-100	(356.106.485)
Last year		
VND	+100	325.797.228
VND	-100	(325.797.228)

The basis point increases/decreases used for the interest rate sensitivity analysis are assumed based on current observable market conditions, which indicate that volatility is not significantly higher than in previous periods.

Raw material costs (mainly roll paper, cardboard) and printing costs are two costs that account for a large proportion of total production costs. Therefore, changes in the prices of raw materials as well as services will greatly affect the cost of finished products. The Company believes that the risk of raw material prices and printing costs in production and business activities is high. In order to ensure the stability of finished product prices, the Company's production management department regularly monitors fluctuations in raw material prices as well as printing costs and proposes solutions to the General Director. Reserve raw materials as well as appropriate production and business plans.

Price risk of trading securities

Trading securities held by the Company are affected by market risks arising from uncertainty regarding the future value of trading securities. The Company manages price risk by establishing investment limits. The Board of Directors of the Company also reviews and approves investment decisions in trading securities.

At the end of this accounting period, the fair value of the Company's investments in trading securities is VND 4.673.250.000 (VND 4.637.250.000 as of Jan 01, 2026). If the price of these shares decreases by 10%, the Company's pre-tax profit will decrease by approximately VND 423.714.500. If the price of these shares increases by 10%, the Company's pre-tax profit will increase by approximately VND 423.714.500.

13.2 Credit risk

Credit risk is the risk that a party to a financial instrument or customer contract will not fulfill its obligations, leading to financial loss. The Company has credit risk from its production and business activities (mainly for accounts receivable from customers) and from its financial activities, including bank deposits, foreign exchange operations and other financial instruments.

Receivables from customers

The Company minimizes credit risk by only dealing with counterparties with good financial capacity. The Company regularly monitors receivables closely to urge collection. On this basis, the Company's receivables are related to many different customers, so credit risk is not concentrated on a certain customer.

NOTES TO THE FINANCIAL STATEMENTS

For Second quarter of 2026

Unit: Vietnam Dong

13.2 Credit risk (continue)**Receivables from customers (continue)**

	<u>30/06/2026</u>	<u>01/01/2026</u>
Not expired and not reduced in value	220.119.989.652	110.676.293.799
Overdue from 6 months to less than 1 year	714.961.780	-
Overdue from 1 year to less than 2 years	-	-
Overdue from 2 year to less than 3 years	28.845.601	115.673.861
Overdue for more than 3 years	893.367.590	818.539.328
Total	<u>221.757.164.623</u>	<u>111.610.506.988</u>

The Company's credit risk level is mainly affected by the unique characteristics of each customer:

The Company regularly monitors outstanding customer receivables. For large customers, the Company reviews each customer's credit quality at the reporting date for deterioration. The Company seeks to maintain tight control over outstanding receivables and staff credit controls to minimize credit risk.

Cash in bank

The Company mainly maintains deposits with reputable large banks in Vietnam. The Company considers that the concentration of credit risk from bank deposits is low.

13.3 Liquidity risk

Liquidity risk is the risk that the Company will have difficulty fulfilling its financial obligations due to lack of capital. The Company's liquidity risk arises mainly from the fact that financial assets and financial liabilities have different maturities.

The Company monitors liquidity risk by maintaining a level of cash and cash equivalents and bank loans that the Board of General Directors considers sufficient to meet the Company's operations and to minimize the impact of cash flow fluctuations.

NOTES TO THE FINANCIAL STATEMENTS*For Second quarter of 2026**Unit: Vietnam Dong***13.3 Liquidity risk (continue)**

Loans and finance leases	0	0	-
Total	86.252.224.444	0	86.252.224.444

The Company uses the following methods and assumptions to estimate fair value:

The fair value of cash and short-term deposits, receivables from customers, payables to suppliers and other short-term liabilities is equivalent to the carrying amount of these items because these instruments have short maturities.

The fair value of listed securities and financial debt instruments is determined at market value. For unlisted securities investments that are frequently traded, the fair value is determined as the average price provided by three independent securities companies at the end of the financial year.

The fair value of securities and financial investments whose fair value cannot be determined with certainty due to the lack of a highly liquid market for these securities and financial investments is presented at book value.

Except for the items mentioned above, the fair value of financial assets and financial liabilities has not been officially evaluated and determined as of June 30, 2026 and January 1, 2026. However, Board of General Directors assesses that the fair value of these financial assets and financial liabilities does not differ materially from the carrying value at the end of the financial period.

NOTES TO THE FINANCIAL STATEMENTS

For Second quarter of 2026

Unit: Vietnam Dong

14. Financial assets and financial liabilities

The table below presents the book value and the fair value of the financial instruments presented in the Company's financial statements.

NOTES TO THE FINANCIAL STATEMENTS

For Second quarter of 2026

Unit: Vietnam Dong

3. Presentation of assets, revenue, and business results by department

Business segments include business segments and geographical segments.

A business segment is a distinguishable component of the Company that is engaged in providing an individual product or service or a group of related products or services and that is subject to risks and returns that are different from those of other business segments.

A geographical segment is a distinguishable component of the Company that is engaged in providing products or services within a particular economic environment and that is subject to risks and returns that are different from those of components operating in other economic environments.

The Company's main activities are publishing and selling textbooks, textbook supplements, reference books, calendars and selling educational support tools. The Company does not have any branches, so the Company only presents segment reports by business sector, not by geographical area.

4. Comparative information

Comparative figures are taken from the Financial Statement of the fiscal year Q2/2025

5. Information on ongoing operations

There is no indication that the Company's production and business activities are not continuous.
