4. Corporate structure

The Company has the following branches:

'- Branch of Vinacap Electronic Telecommunication Joint Stock Company at Ha Noi

'- Address: N03T5 Building, Embassy Garden- Xuan Tao- Bac Tu Liem-Ha Noi

Main business activities: Trading.

II - Accounting regime and policies applied at the Company

1. The Company's annual accounting period according to the calendar year starts from January 01st and ends on December 31st every year.

2. The currency used in accounting is Vietnamese Dong (VND)

III- Applicable accounting standards and regimes

1. Applicable accounting regime: The Company applies the Enterprise Accounting Regime issued under Circular No. 99/2025/TT-BTC dated October 27, 2025 of the Ministry of Finance.
2. Declaration on compliance with Accounting Standards and Accounting Regime: The Company has applied Vietnamese Accounting Standards and documents guiding the Standards issued by the State. Financial statements are prepared and presented in accordance with all provisions of each standard, circular guiding the implementation of standards and current accounting regimes

IV- Applicable accounting policies

1. Foreign currency transactions during the fiscal year are converted into Vietnamese Dong at the actual exchange rate on the transaction date. This actual transaction exchange rate is determined according to the following

- When buying and selling foreign currencies: The exchange rate specified in the foreign currency purchase and sale contract between the Company and the Commercial Bank.
- When recording receivables: The buying rate of the Commercial Bank where the Company designates the customer to pay at the time the transaction occurs.
- When recording payables: The selling rate of the Commercial Bank where the Company plans to transact at the time the transaction occurs.

2. The actual transaction exchange rate when re-evaluating foreign currency items at the time of preparing the financial statements is determined according to the following principles:

- For items classified as assets: Apply the foreign currency buying rate of the commercial bank where the Company regularly conducts transactions.
- For foreign currency deposits: Apply the buying rate of the bank where the Company opens a foreign currency account.
- For items classified as liabilities: Apply the foreign currency selling rate of the commercial bank where the Company regularly conducts transactions.

All actual exchange rate differences arising during the year and differences due to re-evaluation of the balance of foreign currency items at the end of the year are recorded in the business results of the fiscal year. In which, the exchange rate difference interest due to re-evaluation of the balance at the end of the period of foreign currency items is not used to distribute profits or pay dividends.

3. Cash and cash equivalents.

Cash includes cash in hand and demand deposits.

Cash equivalents are short-term investments with a recovery period of no more than 03 months from the date of investment, highly liquid, easily convertible into a certain amount of cash and with little risk of conversion into cash.

4. Accounts receivable.

Accounts receivable are monitored in detail by receivable term, receivable entity, original currency and other factors according to the Company's management requirement.

5. Inventories:

"Inventories are initially recorded at cost, including: purchase costs, processing costs and other directly related costs incurred in bringing the inventories to their location and condition at the time of initial recording. After initial recording, at the time of preparing the financial statements, if the net realizable value of the inventories is lower than the original price, the inventories are recorded at the net realizable value.

Inventories are determined by the weighted average method.

Inventories are accounted for by the regular declaration method.

Method of determining the value of unfinished products at the end of the year: determined by the actual unit price for each type of unfinished product. In which, the quantity of unfinished products is determined according to the actual inventory results.

The provision for inventory price reduction established at the end of the year is the difference between the original price of the inventories and the net realizable value.

6. Fixed assets.

Tangible fixed assets are initially recorded at original cost. During use, tangible fixed assets are recorded at original cost, accumulated depreciation and residual value.

Depreciation of fixed assets is calculated using the straight-line method with the estimated time as follows:

- Houses and structures: 20 years
- Machine, equipment: 05-12 year
- Means of transport and transmission: 08 - 10 years

- Equipment and management tools: 05 years

7. Prepaid expenses.

Expenses incurred related to the business performance of many fiscal years are recorded as prepaid expenses to be gradually allocated to the business performance in the following fiscal years.

The calculation and allocation of long-term prepaid expenses into production and business expenses for each fiscal year is based on the nature and extent of each type of expense to select a reasonable allocation method and criteria. Prepaid expenses are gradually allocated into production and business expenses using the straight-line method.

8. Accounts payable.

Payables are monitored by payment term, payable entity, original currency and other factors according to the Company's management requirement.

Loan

The value of the finance lease liability is the total amount payable calculated by the present value of the minimum lease payments or the fair value of the leased asset.

Loans and financial lease liabilities are tracked by each lending entity, each loan agreement and the repayment term of the loans and financial lease liabilities. In case of loans and liabilities in foreign currency, detailed tracking is performed in the original currency.

Loan cost

Borrowing costs are recognized as production and business expenses in the year when incurred, except for borrowing costs directly related to the investment in construction or production of unfinished assets, which are included in the value of that asset (capitalized) when meeting all the conditions specified in Vietnamese Accounting Standard No. 16 "Borrowing costs". In addition, for separate loans for the construction of fixed assets, investment real estate, interest is capitalized even when the construction period is less than 12 months.

11. Costs payable

Payables for goods and services received from sellers or provided to buyers in the reporting year but not actually paid and other payables such as electricity bills, telephone bills, loan costs payable, other payable costs... are recorded in production and business expenses of the reporting year.

The recording of payable expenses into production and business expenses during the year is carried out according to the principle of matching between revenue and expenses incurred during the year. The payable expenses will be settled with the actual expenses incurred. The difference between the provision and the actual expenses will be reversed.

12. Owner's capital.

Owner's equity is recorded at the actual capital contributed by the owner.

Share capital surplus reflects the difference between par value, direct costs related to the issuance of shares and the share issuance price (including cases of re-issuance of treasury shares) and may be a positive surplus. (if the issuance price is higher than par value and direct costs related to the issuance of shares) or negative surplus (if the issuance price is lower than par value and direct costs related to the issuance of shares).

Undistributed profit after tax reflects the business results (profit, loss) after corporate income tax and the situation of profit distribution or loss handling of the Company. In case of paying dividends, profits to owners exceeding the undistributed profit after tax are recorded as a decrease in contributed capital. Undistributed profit after tax can be distributed to investors based on the capital contribution ratio after being approved by the General Meeting of Shareholders and after setting aside funds according to the Company's Charter and the provisions of Vietnamese law.

13. Revenue

Sale Revenue

Sales revenue is recognized when all of the following conditions are complied :

- The significant risks and rewards of ownership of the goods have been transferred to the buyer;
- The company no longer holds the right to manage the goods as the owner of the goods or the right to control the goods;
- Revenue is determined relatively reliably;
- The company has obtained or will obtain economic benefits from the sale transaction;
- The company has obtained or will obtain economic benefits from the sale transaction;

Service revenue

Revenue from providing services is recognized when all of the following conditions are simultaneously satisfied:

- Revenue is determined relatively reliably;
- Ability to obtain economic benefits from the transaction of providing that service;
- Determine the completed work on the date of the Balance Sheet;
- Determine the costs incurred for the transaction and the costs to complete the transaction to provide that service.

The portion of service work completed is determined by the method of assessing completed work.

Financial Revenue

Revenue arising from interest, royalties, dividends, profits shared and other financial revenue is recorded when both (2) of the following conditions are satisfied:

- It is possible to obtain economic benefits from the transaction;
- Revenue is determined relatively certainly.

14. Revenue deductions.

Sales and service revenue deductions arising during the year are returned goods.

Sales returns arising in the same year as the consumption of products, goods and services are adjusted to reduce the revenue of the year in which they arise. In cases where products, goods and services have been consumed in previous years and revenue deductions arise in the following year, revenue reductions are recorded according to the following principle: if they arise before the issuance of the Financial Statements, revenue reductions are recorded on the Financial Statements of the reporting year (previous year), and if they arise after the issuance of the Financial Statements, revenue reductions are recorded in the year in which they arise (next year).

15. Cost of goods sold.

Cost of goods sold in the year is recorded in accordance with the revenue generated in the year and ensures compliance with the principle of prudence. Cases of material loss exceeding the norm, costs exceeding the normal norm, lost inventory after deducting the responsibility of the relevant collective or individual, etc. are fully and promptly recorded in the cost of goods sold in the year.

16. Financial costs

Expenses recorded in financial expenses include:

- Costs or losses related to financial investment activities;
- Loan costs
- Provision for devaluation of trading securities, provision for loss on investment in other entities, loss arising from selling foreign currency, exchange rate loss...
- The above amounts are recorded according to the total amount arising during the year without offsetting against financial revenue.

17. Corporate income tax.

Current corporate income tax expense is determined on the basis of taxable income in the year and corporate income tax rate in the current fiscal year.
