1.7. Information comparability declaration in Financial statements

The figures presented in the financial statements for the second quarter ended June 30, 2026 are comparable with the corresponding figures YoY.

2. BASIS OF PREPARATION OF FINANCIAL STATEMENTS AND FISCAL YEAR

2.1. Basis of preparation of Financial Statements

The accompanying financial statements are presented in Vietnamese Dong (VND), under the historical cost principle and in accordance with Vietnamese accounting standards, accounting regime for enterprises and legal regulations related to the preparation and presentation of financial statements.

The accompanying financial statements are not intended to present the financial position, Income Statement and cash flows in accordance with accounting principles and practices generally accepted in countries other than Vietnam.

2.2. Going concern assumption

There have been no events which cast significant doubt on the Company's ability to continue as a going concern and the Company has no intention or necessity to cease operations or to reduce the scale of its operations significantly.

2.3. Fiscal year

The fiscal the Company year begins on the first of January and end on the thirty-first of December of each year.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**3.1. Accounting estimates**

The preparation of financial statements in accordance with Vietnamese accounting standards, the Vietnamese corporate accounting regime and legal regulations related to the preparation and presentation of financial statements requires the Board of Directors to make estimates and assumptions that affect the reported amounts of liabilities, assets and the presentation of contingent liabilities and assets at the date of the financial statements as well as the reported amounts of revenue and expenses during the financial year. Although these accounting estimates are made based on the best knowledge of the Board of Management, actual results may differ from these estimates and assumptions.

3.2. Foreign currency transactions

Transactions arising in currencies other than the Company's accounting currency (USD) is accounted for at the actual transaction exchange rate on the date of transaction according to the following principles:

- Transactions giving rise to receivables are accounted for at the purchasing rate of the commercial bank where the Company designates the customer to make payment;
- Transactions giving rise to payables are accounted for at the selling exchange rate of the commercial bank where the Company intends to conduct transactions; and
- Asset purchases or expenses paid immediately in foreign currency (not through accounts payable) are accounted for at the buying rate of the commercial bank where the enterprise makes the payment.

The exchange rate used to re-evaluate the balance of foreign currency monetary items at the end of the fiscal year is determined according to the following principles:

- Monetary items classified as assets are accounted for at the buying exchange rate of the commercial bank where the Company regularly conducts transactions; and
- Monetary items classified as debts are accounted for at the selling exchange rate of the commercial bank where the Company regularly conduct transactions; and

All actual exchange differences arising during the year and differences arising from the revaluation of foreign currency balances at the end of the period are taken to the income statement.

3.3. Cash and cash equivalents

Cash and cash equivalents include cash on hand, demand deposits, short-term, highly liquid investments that are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value.

3.4. Financial investment**Held-to-Maturity Investments**

Held-to-maturity investments include those investments that the Company has the intention and ability to hold until maturity. Held-to-maturity Investments include: Term bank deposits (including treasury bills and promissory notes), bonds, preference shares that the issuer is required to repurchase at a certain time in the future, loans held to maturity for the purpose of earning periodic interest, and other investments held to maturity.

Held-to-maturity investments are recorded from the date of acquisition and are initially measured at cost, including the purchase price and any transaction costs incurred in connection with the purchase of the investments. Interest income from investments held to maturity after the acquisition date is recognized in the Income Statement on an accrual basis. Interest earned before the Company holds is deducted from the cost at the time of purchase.

Held-to-maturity investments are measured at cost less allowance for doubtful receivables.

Provision for doubtful receivables of investments held to maturity is made in accordance with current accounting regulations.

Investment in an associates

Associates are all companies in which the Company has significant influence but not control, generally demonstrated through holding between 20% and 50% of the voting rights in that company.

Investments in associates are initially recognized at cost, which includes purchase price plus any costs directly attributable to the acquisition. Then, The Board of Directors then conducts a review of all investments to record provisions at the end of the FY.

3.5. Receivables

Receivables represent the amounts recoverable from customers or other parties. Receivables are presented at its carrying amount less allowance for doubtful receivables.

Provision for doubtful receivables is made for each doubtful receivables based on the aging analysis of overdue debts or the estimated potential loss, or for receivables where the debtor is unlikely to pay due to liquidation, bankruptcy, or similar difficulties.

3.6. Inventories

Inventories are measured at the lower of original cost and net realizable value. The original cost of inventories includes direct materials, direct labor and, where applicable, those overheads incurred in bringing the inventories to their present location and condition.

Inventories are valued using the First-In, First-Out (FIFO) method and are accounted for using the perpetual inventory method.

Net realizable value is determined as the estimated selling price less the estimated costs necessary to make the sale.

The Company's inventory impairment provision is made in accordance with current accounting regulations. Accordingly, the Company is allowed to make provisions for obsolete, damaged, or substandard inventories and in cases where the original cost of inventories is higher than their net realizable value at the end of the accounting period.

3.7. Tangible fixed assets

Fixed tangible fixed assets are stated at original cost less accumulated depreciation.

The original cost of tangible fixed assets formed through goods purchase comprises the purchase price and any other costs directly attributable to bringing the assets to working condition for their intended use. For fixed assets formed through capital construction investment via contracting or self-construction and production, the original cost is the final settlement price of the construction project according to the current regulations on investment and construction management, other directly related costs, and registration fees (if any). In cases where a project has been completed and put into use but the final settlement has not yet been approved, the original cost of fixed assets is recorded at a provisional price based on the actual costs incurred to acquire the fixed assets. The provisional initial cost will be adjusted according to the final price approved by the competent authorities.

Depreciation

Depreciation is recognized using the straight-line method based on the estimated useful life, in compliance with the regulations set forth in Circular 45/2013/TT-BTC dated April 25, 2013, as amended and supplemented by Circular 147/2016/TT-BTC dated October 13, 2016, and Circular 28/2017/TT-BTC dated April 12, 2017, guiding the regime for management, use, and depreciation of fixed assets, specifically as follows:

	[Years]
Buildings and structures	05 – 25
Machinery and and equipment	03 – 10
Means of transportation and transmission	04 – 07
Management tools and equipment	04 – 06
Other tangible fixed assets	03 – 15

3.8. Finance lease

The Company recognizes finance leased assets as its own assets at the fair value of the leased asset at the inception of the lease or at the present value of the minimum lease payments, whichever is lower. The corresponding liability to the lessor is recorded on the Balance Sheet as a finance lease liability. Lease payments are split into finance charges and principal repayment to achieve a constant periodic rate of interest on the remaining balance of the lease. Finance lease costs are recognized in the income statement, unless they are directly attributable to qualifying assets, in which case they are capitalized in accordance with the Company's policy on borrowing costs (see below).

A lease is classified as an operating lease when the lessor retains a majority of the rewards and is subject to the risks of ownership of the asset. Operating lease costs are recognized in the Income Statement on a straight-line basis over the lease term. Any upfront payments received or receivable to facilitate the execution of an operating lease are also recognized on a straight-line basis over the lease term.

Finance leased assets are depreciated over their estimated useful lives in the same manner as the Company's own assets. However, if it is not reasonably certain that the lessee will obtain ownership of the asset at the end of the lease term, the leased asset is depreciated over the shorter of the lease term or the asset's useful life:

	[Years]
Machinery and equipment	05 - 10

3.9. Intangible fixed assets

Intangible fixed are stated at cost less accumulated depreciation.

The cost of intangible fixed assets includes all costs incurred by the Company to acquire the fixed assets up to the time the assets are ready for use. Expenditures relating to intangible fixed assets incurred after initial recognition are recognized as expenses in the period in which they are incurred, unless they are associated with a specific intangible fixed asset and result in an increase in the economic benefits derived from the asset.

Depreciation is recognized using the straight-line method based on the estimated useful life, in compliance with the regulations set forth in Circular 45/2013/TT-BTC dated April 25, 2013, as amended and supplemented by Circular 147/2016/TT-BTC dated October 13, 2016, and Circular 28/2017/TT-BTC dated April 12, 2017, guiding the regime for management, use, and depreciation of fixed assets, specifically as follows:

Land use rights with a finite useful life are amortized over the remaining useful life. Land use rights with an indefinite useful life are recognized at cost and are not amortized.

Computer software is amortized over 2-4 years.

When intangible fixed assets are sold or disposed of, their cost and accumulated depreciation are eliminated from the accounts and any gain or loss resulting from their disposal is recognized as income or expense for the period.

3.10. Construction-in-progress costs

Construction in progress represents the value of assets in the process of installation or construction for business, rental or administrative purposes, or for any other purposes, recorded at original cost, including all costs necessary for new construction or repair, renovation, expansion or technical re-equipment of works such as construction costs, equipment costs, construction investment consulting costs; and other expenses that have not been completed and handed over. Depreciation of these assets, like other fixed assets, will begin when the assets are ready for use.

3.11. Business cooperation contract**Jointly controlled assets**

The Company recognizes in its Financial Statements business cooperation contracts in the form of jointly controlled assets as follows:

- The Company's share in jointly controlled assets is classified according to the nature of the assets.
- The Company's own separately incurred liabilities.
- The portion of the liability arising jointly with other joint venture partners from the operations of the joint venture.
- Income from the sale or use of the portion of products/services shared from joint ventures, together with the portion of expenses incurred and shared from the joint venture's operations.
- The expenses of Company incurred capital contributions to joint ventures.

Fixed assets and investment properties contributed to business cooperation contracts without transferring ownership to the joint ownership of the joint venture parties are not derecognized. In the case where the Company receives contributed assets to a joint venture, these are monitored as assets held in custody and are not recorded as an increase in assets and business capital.

Fixed assets and investment real estate contributed as capital to a business cooperation contract with ownership transfer and in the process of construction of jointly controlled assets are recorded as a decrease in assets in the accounting books and the asset value is recorded in the cost of unfinished basic construction. Upon completion and handover for use of the jointly controlled assets, based on

the value of the assets allocated, the Company recognizes an increase in its own assets in accordance with their intended use.

Jointly Controlled Operations

The Company recognizes the following items in its Financial Statements for business cooperation contracts in the form of jointly controlled operations:

- The value of the property currently under the Company's ownership
- Liabilities borne by the Company
- Revenue shared from the sale of goods or or provision of services of the joint venture;
- Expenses borne by the Company.

3.12. Prepaid expenses

Prepaid expenses include actual expenses that have been incurred but are related to the business performance of many Fiscal years. Prepaid expenses of Company include the following costs:

Tools and Equipment

Tools and equipment put into use are allocated to expenses using the straight-line method with an allocation period not exceeding 36 months

Costs for fixed assets repair

Significant one-off fixed asset repair costs are amortized to expenses using the straight-line method no greater than 36 months.

Prepaid Land Lease

Prepaid land lease represents the land rental fees paid in advance for the land the Company is currently using. Prepaid land rental is allocated to expenses using the straight-line method over the lease term.

3.13. Payables and Accrued Expenses

Payables and accrued expenses are recognized for the amounts to be paid in the future for goods and services received. Accrued expenses are recorded based on reasonable estimates of the amounts payable.

Classification of payables as trade payables, accrued expenses, and other payables is based on the following principles:

- Trade payables reflect commercial payables arising from transactions of purchasing goods, services, assets and the seller is an independent entity from the Company.
- Payable expenses reflect amounts payable for goods and services received from sellers or provided to buyers but not yet paid due to lack of invoices or insufficient accounting records and documents, and amounts payable to employees for leave wages, production and business expenses that must be accrued in advance. When such expenses arise, if there is a difference with the amount deducted, the accountant will record additional expenses or reduce the expenses corresponding to the difference.
- Other payables reflect non-commercial payables unrelated to transactions of purchasing, selling, and providing goods and services.

3.14. Borrowings and Finance Lease Liabilities

Borrowings are tracked for each lender, each loan agreement, and the repayment term of the loans. In the case of foreign currency borrowings, detailed tracking is maintained in the original currency.

3.15. Borrowing Costs

Borrowing costs are recognized as an expense in the period in which they are incurred, except when they are capitalized in accordance with Vietnamese Accounting Standard No. 16 "Borrowing Costs". Accordingly, borrowing costs directly attributable to the acquisition, construction or production of a qualifying asset that necessarily takes a substantial period of time to get ready for its intended use or sale are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Income arising from temporary investment of loans is recorded as a reduction in the original cost of related assets. For separate loans for the construction of fixed assets or investment real estate, interest is capitalized even if the construction period is less than 12 months.

3.16. Unearned revenue

Unearned revenue is revenue received in advance for one or more periods, consisting primarily of rental revenue from business premises. The Company records unearned revenue corresponding to the portion of the obligation that the Company will have to perform in the future. When the revenue recognition conditions are met, unearned revenue will be recorded in the income statement in the fiscal year corresponding to the portion that satisfies the revenue recognition conditions.

3.17. Equity

Owner's equity is recorded at the actual capital contributed by shareholders.

3.18. Profit Distribution

Profit after corporate income tax is distributed to shareholders after setting aside funds according to the Company's Charter as well as legal regulations and approved by the General Meeting of Shareholders.

The distribution of profits to shareholders takes into account non-monetary items in undistributed profits after tax that may affect cash flow and the ability to pay dividends such as interest on revaluation of contributed assets, interest on revaluation of monetary items, financial instruments and other non-monetary items.

Dividends are recognized as liabilities when approved by the General Meeting of Shareholders, and the list of shareholders entitled to receive the dividend is finalized.

The company sets aside the following funds:

Reward and welfare funds

The Reward and Welfare Fund is appropriated from the Company's profit after corporate income tax according to the plan of the Board of Directors and approved by the General Meeting of Shareholders. The fund is presented as a liability on the balance sheet. The fund is used for rewards, material incentives, serving public welfare needs, improving and enhancing the material and spiritual life of workers.

Fund for investment and development

The Fund for investment and development is appropriated from the Company's profit after corporate income tax according to the plan of the Board of Directors and approved by the General Meeting of

Shareholders. The fund is presented as a liability on the balance sheet and is used for investment in expanding production and business scale or in-depth investment of the enterprise.

3.19. Revenue and income recognition

Revenue from sales of goods and finished products

Revenue from the sale of goods and finished products is recognized when all of the following conditions are simultaneously satisfied:

- The company has transferred most of the risks and benefits associated with ownership of the product or goods to the buyer.
- The company no longer holds the right to manage the goods as the owner of the goods or the right to control the goods.
- Revenue is determined relatively reliably.
- The company has received or will receive economic benefits from the sales transaction.
- The costs related to the sales transaction can be determined.

Revenue from providing services

Revenue from service transactions is recognized when the outcome of such transactions can be reliably estimated. When services are performed over multiple periods, revenue is recognized in the period in which the services are rendered, based on the stage of completion of the transaction at the end of the fiscal year. The outcome of a service transaction is determined when all of the following conditions are satisfied:

- Revenue is determined relatively reliably.
- It is possible to obtain economic benefits from the service provision transaction.
- Determined the completed works as of the end of the fiscal year
- The costs incurred for the transaction and the costs to complete the service provision transaction can be determined

Processing revenue

Revenue from processing activities for materials and goods is the actual processing fee earned, excluding the value of the materials and goods received for processing.

Financial income

Interest

Interest is recognized on an accrual basis, determined by the balances of the deposit and loan accounts and the effective interest rate for each period.

3.20. Cost of goods sold and services rendered

Cost of goods sold includes the cost of products, goods and services provided during the year and is recorded in accordance with revenue consumed during the year. For direct material costs that exceed normal levels, labor costs, and fixed general production costs that are not allocated to the value of products in stock, accountants must immediately calculate it into cost of goods sold (after deducting compensation, if any) even when the products and goods have not been determined to be consumed.

3.21. Financial expenses

Financial expenses reflect financial operating expenses incurred during the fiscal year, mainly including provisions for devaluation of trading securities; provisions for losses on investments in other entities; time value of cash flows discounted from provisions; borrowing costs; losses incurred when selling foreign currencies and exchange rate losses.

3.22. Selling expenses

Selling expenses reflect costs incurred in the process of selling goods, and providing services.

3.23. Administration expenses

Administration expenses reflect actual costs incurred in the general management process of the Company, mainly including costs for salaries of management staff; social insurance, health insurance, union fees, unemployment insurance of management staff; office materials costs; depreciation costs; taxes, fees and charges; provision costs; outsourced services and other costs.

3.24. Tax

Corporate income tax represents the sum of current tax liabilities.

Current tax payable is based on taxable income for the year. Taxable income differs from profit before tax as reported in the Income Statement because it excludes items of income or expense that are deductible in other years (including losses carried forward, if any) and further excludes items that are not taxable or deductible.

The determination of the Company's income tax is based on current tax regulations. However, these regulations change from time to time and the final determination of corporate income tax depends on the results of the examination by the competent tax authority.

Other taxes are applied according to current tax laws in Vietnam.

3.25. Stakeholders

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control or common significant influence.

In considering related party relationships, the substance of the relationship is given more emphasis than the legal form.
