Pursuant to the provisions of Circular No. 96/2020/TT-BTC dated 16 November 2020 of the Ministry of Finance on information disclosure in the securities market, Tasco Joint Stock Company hereby provides an explanation for the variance in profit after tax as reported in the Separate Financial Statements and Consolidated Financial Statements for the second quarter of 2026 compared with the second quarter of 2025, as follows:

1. According to the consolidated financial statements for the second quarter of 2026, the Company recorded net revenue of VND 10,955 billion, equivalent to 133% of the same period last year, and profit after corporate income tax of VND 270 billion, equivalent to 358% of the same period last year. These results reflect the positive growth momentum of the Company's core business segments, in which automotive distribution and services, and insurance, continued to serve as the main growth drivers. In addition, the consolidation of DNP from December 2025 added contributions from the clean water and manufacturing segments, helping expand revenue scale and drive consolidated profit growth during the period.

Excluding the effects of goodwill amortization and the amortization of the revaluation of assets, the consolidated profit after tax for the first six months of 2026 would reach VND 585.5 billion.

2. According to the separate financial statements, the Parent Company recorded revenue of VND 87.91 billion and profit after corporate income tax of VND 29.37 billion in the second quarter of 2026, equivalent to 553% of the same period last year. This result was mainly attributable to the recognition of investment returns from subsidiaries through financial income.

The above is Tasco Joint Stock Company's explanation of the variance in profit after corporate income tax reported in the Statement of Profit or Loss for the second quarter of 2026 compared with the second quarter of 2025.

We sincerely thank you./.
