 - Q2 2026: **5,352,687,872 VND**

Net Profit After Tax	5,352,687,351	1,360,326,872	3,992,360,479	293%

2. The main reasons for the increase in profit after corporate income tax in Q2 2026 by VND 3.9 billion (up 293% compared to Q2 2025) are as follows:
 - In the second quarter of 2026, the Company recorded net revenue of VND 109 billion, an decrease of VND 27 billion, equivalent to a 19.7% decrease compared to the same period last year. This decline is primarily attributable to the agricultural produce and iron & steel

segments, as the company is establishing an ecosystem to gradually transfer business lines to subsidiaries-leveraging their specific regional characteristics and competitive advantages-while focusing its own operations on high-value-added business segments.

- Cost of goods sold for the period decreased by VND 34.6 billion, or 26.5%, compared to the same period of the prior year. As a result, gross profit increased significantly by VND 7.61 billion, equivalent to an increase of 127% compared to Q2 2025.
- Financial expenses in Q2 2026 increased by VND 1.24 billion, or 43%, compared to the same period of the prior year. In addition, selling expenses decrease 14% and general and administrative expenses increased by VND 1.14 billion, or 86%, compared to Q2 2025. However, the increase in expenses was lower than the increase in gross profit, resulting in an improvement in gross profit margin of 8% and a significant increase in profit after corporate income tax of 293% compared to the same period of the prior year.
- Corporate income tax expense increased by VND 1.14 billion compared to the same period of the prior year, mainly due to higher taxable income.

The above represents the Company's explanation for the changes in its operating results and is provided together with the Company's separate financial statements for the second quarter of 2026.

Sincerely./.
