**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR QUARTER II OF 2026**

1. Characteristics of Business operations

1.1. Form of Capital ownership

VINA2 Investment and Construction Joint Stock Company is a joint stock company established under Decision No. 1284/QĐ-BXD dated September 29, 2003, by the Minister of Construction regarding the conversion of the State-owned Construction Company directly under the Vietnam Import-Export and Construction Corporation (now the Vietnam Import-Export and Construction Joint Stock Corporation) into Construction Joint Stock Company No. 2 - Vinaconex 2. The company operates under Business Registration Certificate No. 0100105895 issued by the Hanoi Department of Planning and Investment for the first time on October 24, 2003, and subsequent change certificates. According to Resolution No. 02/VC2/NQ-HDQT dated March 19, 2020, the 2020 Annual General Meeting of Shareholders approved the plan to change the company's name and logo. The company changed its name to VINA2 Investment and Construction Joint Stock Company as per the 29th change of the joint stock company registration certificate dated February 5, 2026.

The consolidated financial statements of the Company include the Company and its subsidiaries, joint ventures.

1.2. Business fields:

Construction, services, and real estate, etc.

1.3. Main business activities of the Company and its subsidiaries, joint ventures:

- Construction of civil, industrial, and road transport works at all levels, bridges, irrigation, postal facilities, foundations, urban infrastructure projects, and industrial zones, electrical transmission lines, and substations up to 110KV; foundation leveling, treatment of weak soil; construction of drainage works; installation of technological and pressure pipes, refrigeration systems;
- Residential development, real estate business;
- Repair, replacement, and installation of machinery and equipment, all types of concrete structures, steel structures, technical systems of construction (elevators, air conditioning, ventilation, drainage);
- Production and trading of construction materials (sand, stone, bricks, tiles, cement, concrete components, ready-mixed concrete, and other types of construction materials used in interior decoration. Business is only permitted when authorized by competent State authorities.
- Consulting, investing, implementing construction investment projects, project planning, consulting tenders, supervising, and project management.

- Import and export of materials, machinery, equipment, spare parts, production materials, consumer goods, production materials, technological lines, automated machinery and equipment, construction materials, means of transport;
- Agent for domestic and foreign companies trading in goods serving production and consumption;
- Real estate management services, real estate consulting.

1.4. Normal operating cycle

The normal operating cycle of the Company and its subsidiaries and joint ventures is within a period of 12 months.

1.5. Company Structure

As of the reporting date, the Company has 2 subsidiaries

Subsidiaries	% interests and voting rights	
	2026	2025
VINA2 Investment and Urban Services Co., Ltd	100%	100%
VINA2 Construction and Mechanical Equipment., JSC	75%	75%

2. Basis of financial reporting

2.1. Declaration of Compliance

The consolidated financial statements are prepared and presented in accordance with the Vietnamese Accounting Standards, the Vietnamese Enterprises Accounting Regime, and the relevant legal regulations pertaining to the preparation and presentation of financial statements.

2.2. Basis of Measurement

The consolidated financial statements, except for the consolidated cash flow statement, are prepared on an accrual basis using the cost principle. The consolidated cash flow statement is prepared using the indirect method.

2.3. Fiscal Year

The fiscal year of the Company and its subsidiaries runs from January 1 to December 31.

2.4. Currency Unit

The accounting currency of the Company and its subsidiaries is the Vietnam Dong (“VND”), which is also the currency used for the purposes of preparing and presenting the consolidated financial statements.

3. Summary of Key accounting policies

The following are the key accounting policies adopted by the Company and its subsidiaries in preparing these consolidated financial statements.

3.1. Consolidation basis

(a) Subsidiaries

Subsidiaries are entities controlled by the Company. The financial statements of subsidiaries are included in the consolidated financial statements from the date control begins until the date control ceases.

(b) Non-controlling interests

Non-controlling interests are determined based on the proportionate ownership of non-controlling shareholders in the net assets of the acquired entity at the acquisition date.

The divestment of the Company in a subsidiary that does not result in the loss of control is accounted for similarly to equity transactions. The difference between the change in the Company's ownership interest in the net assets of the subsidiary and the cash received or paid from the divestment in the subsidiary is recognized in retained earnings within equity.

(c) Loss of control

When control is lost in a subsidiary, the Company ceases to recognize the assets and liabilities of the subsidiary as well as non-controlling interests and other components of equity. Any gains or losses arising from this event are recognized in the consolidated statement of profit or loss. After divesting the remaining interest in the subsidiary (if any), it is recognized at the carrying value of the investment on the parent company's financial statements, adjusted for the proportionate changes in equity since the acquisition if the Company still has significant influence over the investee, or presented at the original cost of the remaining investment if there is no significant influence.

(d) Transactions eliminated on consolidation

Intercompany balances and unrealized income and expenses from intercompany transactions are eliminated in the preparation of the consolidated financial statements.

(e) Joint Ventures and associates

Investments in joint ventures and associates are consolidated using the equity method.

3.2. Foreign currency transactions

Transactions in currencies other than VND during the period are converted to VND according to the actual exchange rate on the transaction date.

Assets and liabilities denominated in currencies other than VND are converted to VND based on the average buying and selling exchange rate of the commercial bank where the Company or its subsidiaries regularly conduct transactions as of the end of the accounting period.

All exchange rate differences are recognized in the consolidated income statement.

3.3. Cash and cash equivalents

Cash includes cash on hand and demand deposits. Cash equivalents are short-term, highly liquid investments that can be easily converted into a known amount of cash, carry minimal risk of changes in value, and are used to meet short-term cash commitments rather than for investment purposes or other purposes.

3.4. Investment

(a) Held-to-maturity investments

Held-to-maturity investments are those that the Company's Management Board and subsidiaries intend to and are able to hold until maturity. Held-to-maturity investments include term deposits. These investments are recorded at cost less provisions for bad debts.

(b) Investments in equity of other entities

Investments in equity instruments of other entities are initially recorded at cost, which includes the purchase price and related directly attributable acquisition costs. After initial recognition, these investments are measured at cost less provisions for impairment. Impairment provisions are established when the investee incurs losses, except when such losses were anticipated by the Company or its subsidiaries at the time of the investment decision. Impairment provisions can be reversed when the investee subsequently generates profits to offset previously recognized losses. Such provisions can only be reversed to the extent that the carrying amount of the investment does not exceed it carrying amount had no provision been recognized.

3.5. Accounts receivable

Accounts receivable from customers and other receivables are reflected at original cost less impairment allowances for uncollectible receivables.

3.6. Inventories

Inventories are reported at the lower of cost and net realizable value. The cost of real estate projects is determined using the specific identification method and includes all costs incurred to acquire the inventories in their current location and condition, including land use rights, land development costs, infrastructure costs, and construction costs. The cost of other inventory categories is calculated using the weighted average method, which incorporates all expenditures involved in acquiring the stocks in their current location and condition. Net realizable value is calculated by subtracting the selling price of the inventory from the expected expenses of completing the items and selling them.

The company and its subsidiaries apply the periodic inventory method for inventory accounting.

3.7. Tangible fixed assets

Initial cost

Tangible fixed assets are presented at initial cost less accumulated depreciation. The cost of tangible fixed assets includes purchase price, import taxes, non-refundable purchase taxes, and any direct costs associated with getting the asset to its intended

position and condition for use. Repair, maintenance, and overhaul expenditures incurred after the tangible fixed assets have been put into operation are recorded in the consolidated statement of profit or loss for the period in which they are incurred. In circumstances where it is clearly proved that these expenditures raise the economic advantages predicted to be received from utilizing the tangible fixed assets above the regular operating level as originally evaluated, these costs are capitalized as an extra cost of the tangible fixed assets.

Depreciation

Tangible fixed assets are depreciated using the straight-line method, which is based on their expected useful life. The expected useful life is shown below:

Buildings and architectural structures	: 5 – 25 years
Machinery and equipment	: 7 – 12 years
Transport and transmission vehicles	: 3 – 6 years
Office equipment	: 3 years

3.8. Intangible fixed assets

Land use rights

Land-use rights include:

- Land-use rights assigned by the State with payment for land-use rights; and
- Land-use rights legally transferred.

Land-use rights without a fixed duration are recorded at their initial cost and are not depreciated. Land-use rights having a set term are recorded at their original cost, less accrued depreciation. The initial original cost of land-use rights includes the value of the rights reflected in the purchase price, as well as any directly connected expenditures involved in obtaining the rights.

3.9. Investment properties

Investment properties for rent

Initial cost

Investment properties for rent are presented at initial cost minus accumulated depreciation. The initial cost of investment properties for rent comprises the purchase price, land use rights costs, and other costs directly associated to preparing the asset for its intended function, as assessed by management. Costs incurred after the investment properties for rent has been put into operation, such as repair and maintenance costs, are recognized in the consolidated income statement for the period in which these costs are incurred. In circumstances where it can be clearly demonstrated that these costs increase the economic benefits expected from the investment properties for rent beyond the standard operating level as initially assessed, these costs are capitalized as an extra initial cost of the investment properties for rent.

Depreciation

Investment properties are depreciated using the straight-line method, which is based on their expected useful life. The expected useful life is shown below:

+ Buildings:	30 - 50 years
--------------	---------------

3.10. Basic construction in progress

Basic construction in progress reflects costs of construction that have not been completed. Depreciation is not applied to basic construction in progress during the construction phase.

3.11. Long-term prepaid expenses

Tools and equipment

Tools and equipment are assets owned by the Company and its subsidiaries for use in routine business operations, with an initial cost of less than 30 million VND, and hence do not qualify for classification as fixed assets. The initial cost of tools and equipment is allocated on a straight-line basis over a period of two to three years.

Scaffolding and formwork cost

Scaffolding and formwork costs show the value of scaffolding, formwork, tools, equipment, materials, and supplies used in construction projects that are expected to bring economic advantages for the Company for at least a year. These costs are classified as long-term prepaid expenses and are distributed in the income statement on a straight-line basis over three years.

3.12. Trade and other payables

Trade payables and other payables represent at initial cost.

3.13. Provisions

A provision is recognized if, as a result of a previous event, the company and its subsidiaries have a current legal obligation or constructive obligation that can be reasonably estimated and is likely to result in an outflow of economic benefits in the future to settle the liabilities arising from that obligation. The provision is calculated by discounting the estimated future cash flows to be paid using a pre-tax discount rate that reflects the market's current appraisal of the time value of money and the unique risks of the liability.

3.14. Warranty costs

The provision for warranty costs is largely related to products sold and services provided during the accounting period. The provision is created based on estimations derived from past statistical data on warranty costs associated with similar goods and services.

3.15. Provisions for severance allowance

According to the Labor Code of Vietnam, when an employee has worked for the company for 12 months or more ("eligible employee") and voluntarily terminates their employment contract, the employer must pay severance compensation to that employee based on the years worked and the salary at the time of termination. On August 14, 2003, the Ministry of Finance issued Circular No. 82/2003/TT-TC ("Circular 82") guiding the establishment, management, use, and accounting of the reserve fund for severance pay at enterprises. Accordingly, the reserve fund for severance pay is used to cover severance compensation and is established at a rate of

1%-3% of the payroll used as the basis for social insurance contributions of the enterprise. Before January 1, 2009, the company established a reserve for severance payments in accordance with the provisions of Circular 82.

According to the Law on Social Insurance, beginning January 1, 2009, the Company and its employees must contribute to the unemployment insurance fund maintained by Vietnam Social Insurance. With the adoption of the unemployment insurance scheme, the Company is not compelled to give severance compensation for employees hired after January 1, 2009. The provision for severance pays payable to eligible employees will be determined based on the number of years of service of the employees calculated up to December 31, 2008, and their average salary in the six months prior to the termination of employment.

On October 24, 2012, the Ministry of Finance issued Circular No. 180/2012/TT-BTC ("Circular 180") guiding the financial treatment of severance allowances for employees in enterprises. Circular 180 stipulates that when preparing the financial statements for 2012, if the provision fund for severance allowances of the enterprise (Account 351 – Provision Fund for Severance Allowances) has a balance, the enterprise must reverse this balance into other income accounts for the year 2012 and must not carry this balance over to the following year. The General Director of the Company believes that Circular 180 also applies to provisions for termination allowances. Therefore, the Company has reversed the amount of the termination allowance provision as of December 31, 2012, into other income accounts for the fiscal year ended December.

3.16. Share capital

(a) Common stock

Common stock is recorded at par value. Directly related issuance costs, net of tax effects, are deducted from additional paid-in capital.

(b) Share repurchase and reissuance of common stock (treasury stock)

When repurchasing shares that have been recognized as equity, the value of the payment, including directly related costs, minus taxes, is deducted from equity. The repurchased shares are classified as treasury stock in the equity section. When treasury stock is later sold (reissued), the cost basis of the reissued shares is determined using the weighted average method. The difference between the value received and the cost basis of the reissued stock is presented in additional paid-in capital.

3.17. Tax

Corporate income tax is calculated based on the consolidated profits or losses of the period, including current income tax and deferred income tax. Corporate income tax is recognized in the consolidated income statement, unless income tax on specific items is directly recognized in equity, in which case the income taxes are likewise recognized directly in equity.

Current income tax is the tax expected to be paid based on taxable income for the period, using tax rates that are in force at the end of the accounting period, and any adjustments to tax payable related to prior periods/years.

Deferred income tax is calculated using the balance sheet method for temporary differences between the carrying amount for financial reporting purposes and the tax base of assets and liabilities. The value of deferred income tax is recognized based on the expected manner of collection or settlement of the carrying amount of assets and liabilities, using tax rates that are effective or substantively enacted at the end of the accounting period.

Deferred tax assets are only recognized to the extent that it is probable that there will be sufficient taxable profits in the future to utilize these deferred tax assets. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefits will be realized.

Other taxes are applied in accordance with the existing tax regulations in Vietnam.

3.18. Revenue and other income

(a) Revenue from real estate sales

Revenue from real estate sales is recognized in the income statement when the following conditions are simultaneously met:

- + The real estate has been fully completed and delivered to the buyer, and the Company has transferred the risks and benefits associated with the ownership rights of the real estate to the buyer;
- + The Company no longer holds management rights to the real estate as the owner or control over the real estate;
- + Revenue is relatively certain;
- + The Company has received or will receive economic benefits from the transaction of selling the real estate; and
- + The costs related to the transaction of selling the real estate can be determined.

(b) Service revenue

The consolidated income statement recognizes service revenue based on the proportion of the transaction completed at the end of the accounting period. Surveys of completed work are used to calculate the completion percentage. Revenue is not recorded when there are considerable concerns about the capacity to recover receivable.

(c) Revenue from construction contracts

Revenue from construction contracts is recognized in the consolidated income statement based on the value of work completed that has been confirmed by the customer during each acceptance and payment voucher. Revenue is not recognized if there are significant uncertainties related to the ability to collect receivables.

(d) Financial revenue

Interest revenue is recognized based on the corresponding time period according to the principal balance and the applicable interest rate.

Dividend revenue is recognized when the right to receive dividends is established. Stock dividends are not recognized as financial revenue. Dividends received related to the period before the investment purchase are deducted from the carrying value of the investment.

(e) Other revenue

Other revenue is recognized based on the amount of work completed and accepted by the customer upon acceptance and payment.

3.19. Borrowing costs

Borrowing costs are recognized as expenses in the period in which they are incurred, except in cases where borrowing costs are related to loans for the purpose of creating qualifying assets. In such instances, borrowing costs will be capitalized and included in the cost of these assets.

3.20. Earnings per share

The company presents basic earnings per share (EPS) for common shares. Basic earnings per share are calculated by taking the profit or loss attributable to the common shareholders of the company (after deducting the allocated amount to the reward and welfare fund for the reporting year) and dividing it by the weighted average number of common shares outstanding during the period. The company does not hold any potentially dilutive shares.

3.21. Related parties

Parties are considered related to the Company and its subsidiaries if one party has the ability, directly or indirectly, to control or significantly influence the other party's financial and operational decisions, or if the Company and its subsidiaries share control or significant common influence with the other party. Related parties can be businesses or persons, including close family members of those deemed related.

Related firms include the main company (Vietnam Import-Export and Construction Joint Stock Corporation), as well as its subsidiaries and joint ventures.

3.22. Principles for recognizing equity capital

- *Principles for recognizing owner's investment capital, surplus capital, and other owner's equity*

+ The owner's investment capital is recognized depending on their real contribution

+ Surplus capital is recognized based on the difference (greater or lesser) between the actual issuance price and the par value of shares in joint-stock companies when issuing shares for the first time, extra issuance, or reissuing treasury shares.

+ Other equity of the owner is recorded at the remaining value between the fair value of the assets given to the business by other organizations or individuals, after deducting the taxes payable (if any) related to the gifted assets.

The foreign exchange differences reflected in the Balance Sheet are the foreign exchange differences arising or revalued at the end of the period of monetary items with foreign currency origins (foreign exchange gains or losses).

- *The principle of recognizing undistributed profit.*

Undistributed after-tax profit reflected in the Balance Sheet is the profit (gain or loss) from the business operations after deducting corporate income tax expenses for this year and adjustments due to retroactive application of changes in accounting policies and retroactive adjustments of material errors from previous years.
