EVENTS AFTER THE REPORTING PERIOD

There have been no significant events occurring since the end of the reporting period that would require any adjustments or additional disclosures in the interim financial statements.

AUDITORS

International Auditing and Valuation Company Limited has been appointed to perform the review of the Company's interim financial statements for the 6-month period ended 30 June 2026.

RESPONSIBILITY OF THE BOARD OF MANAGEMENT IN RESPECT OF THE INTERIM FINANCIAL STATEMENTS

The Board of Management of the Company is responsible for the preparation of the interim financial statements that give a true and fair view of the financial position, financial performance, and cash flows of the Company for the period. In preparing these interim financial statements, the Board of Management is required to:

- Select appropriate accounting policies and apply them consistently;
- Make judgments and estimates that are reasonable and prudent;
- State whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the interim financial statements;

REPORT OF THE BOARD OF MANAGEMENT (continued)

- Prepare the interim financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business; and
- Design and implement an effective internal control system for the purpose of proper preparation and presentation of the interim financial statements to minimize risks and frauds.

The Board of Management is responsible for ensuring that proper accounting records are kept which disclose, with reasonable accuracy at any time, the financial position and performance of the Company and ensure that the accounting records comply with the applied accounting system. The Board of Management is also responsible for safeguarding the assets of the Company and hence for taking appropriate measures to prevent and detect fraud and other irregularities and legal regulations relevant to the preparation and presentation of the interim financial statements.

The Board of Management hereby commits that the above requirements have been complied with in the preparation of the interim financial statements.

OTHER COMMITMENTS

The Board of Management commits that the Company has complied with Decree No. 155/2020/NĐ-CP dated 31 December 2020 of the Prime Minister detailing the implementation of certain articles of the Law on Securities, and that the Company has not violated information disclosure obligations stipulated in Circular No. 96/2020/TT-BTC dated 16 November 2020 of the Ministry of Finance guiding information disclosure on the stock market, and Circular No. 68/2024/TT-BTC dated 18 September 2024 amending and supplementing certain articles of circulars regulating securities trading on securities trading systems; clearing and settlement of securities transactions; operations of securities companies and information disclosure on the stock market.

APPROVAL OF THE INTERIM FINANCIAL STATEMENTS

The Board of Management hereby approves the accompanying interim financial statements. These interim financial statements give a true and fair view of the financial position of the Company as at 30 June 2026, and of its financial performance and its cash flows for the period then ended, in accordance with Vietnamese Accounting Standards, the Vietnamese Corporate Accounting System and relevant statutory regulations on the preparation and presentation of interim financial statements.

Nguyen Trong Nam

General Director

Hai Phong, 13 August 2026

No: 30065/2026/BCSX/IAV

REPORT ON REVIEW OF INTERIM FINANCIAL INFORMATION

To: The Shareholders

The Board of Directors, The Board of Supervisors, and The Board of Management

Hai Duong Pump Manufacturing Joint Stock Company

We have reviewed the accompanying interim financial statements of Hai Duong Pump Manufacturing Joint Stock Company (hereinafter referred to as "the Company"), prepared on 13 August 2026, from page 06 to page 56, which comprise the interim statement of financial position as at 30 June 2026, the interim statement of profit or loss, the interim statement of cash flows for the 6-month period then ended, and the notes to the interim financial statements.

Board of Management's Responsibility

The Board of Management is responsible for the preparation and fair presentation of these interim financial statements in accordance with Vietnamese Accounting Standards, the Vietnamese Corporate Accounting System, and relevant statutory regulations on the preparation and presentation of interim financial statements, and for such internal control as the Board of Management determines is necessary to enable the preparation of interim financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express a conclusion on the interim financial statements based on our review. We conducted our review in accordance with Vietnamese Standard on Review Engagements 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity.

A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Vietnamese Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

REPORT ON REVIEW OF INTERIM FINANCIAL INFORMATION (continued)

Auditor's Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial statements do not give a true and fair view, in all material respects, of the financial position of the Company as at 30 June 2026, and of its financial performance and its cash flows for the 6-month period then ended, in accordance with Vietnamese Accounting Standards, the Vietnamese Corporate Accounting System and relevant statutory regulations on the preparation and presentation of interim financial statements.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS*For the 6-month period ended 30 June 2026*

These notes form an integral part of and should be read in conjunction with the accompanying interim financial statements.

1. CORPORATE CHARACTERISTICS**1.1. Form of Ownership**

Hai Duong Pump Manufacturing Joint Stock Company, formerly known as Hai Duong Pump Manufacturing Company, was established and operates under Business Registration Certificate No. 111723 issued by the Department of Planning and Investment of Hai Duong Province on 16 January 1998. The Company was transformed into a joint stock company pursuant to Decision No. 07/2004/QĐ-BCN issued by the Ministry of Industry (currently the Ministry of Industry and Trade) on 12 January 2004, and operates under Enterprise Identification Number 0800287016 first issued by the Department of Planning and Investment of Hai Duong Province on 24 March 2004, with the 21st amendment issued by the Department of Finance of Hai Phong City on 2 February 2026.

Head office: No. 2 Ngo Quyen Street, Thanh Dong Ward, Hai Phong City.

Charter capital: VND 208,000,000,000 (In words: Two hundred and eight billion Vietnam Dong); equivalent to 20,800,000 shares with a par value of VND 10,000 per share.

Number of employees as at 30 June 2026: 247 employees (as at 31 December 2025: 253 employees).

The Company's shares were officially registered for trading at the Hanoi Securities Trading Center (now the Hanoi Stock Exchange) on 10 October 2006 with the stock code CTB.

1.2. Principal Business Activity

The Company operates primarily in the field of Manufacturing and Trading.

1.3. Principal Business Sectors

The Company's main activities include:

- Designing and manufacturing pumps, compressors, taps, valves, various industrial fans, and water turbines;
- Casting iron and steel; casting copper, cast iron, zinc, tin, aluminum, and other alloys;
- Manufacturing motors, generators, electricity transformers, and electricity distribution and control equipment;
- Manufacturing metal structures; forging, stamping, pressing, and rolling metals; metal powder metallurgy; mechanical processing; metal treatment and coating;
- Manufacturing lifting and handling equipment;
- Repairing fabricated metal products; repairing machinery, equipment, electrical equipment, and other equipment;
- Installing industrial machinery and equipment; drainage and wastewater treatment; installing electrical systems;
- Wholesale of other machinery, equipment, and spare parts;

- Freight transport by various types of automobiles (excluding specialized automobiles);
- Technical testing and analysis: pump testing;
- Manufacturing gaskets, seals, and accessories for pumps;
- Installing water supply and drainage systems, heating and air conditioning systems;
- Construction of residential and non-residential buildings;
- Leasing of automobiles and forklifts (excluding specialized vehicles);
- Construction of railway and road projects, power projects, water supply and drainage projects, telecommunications and communication projects, other public utility projects, hydraulic structures, mining, processing and manufacturing;
- Demolition, site preparation, completion of construction works, and other specialized construction activities.

1.4. Normal Operating Cycle

The Company's normal production and business cycle does not exceed 12 months.

1.5. Characteristics of the Company's Operations Affecting the Interim Financial Statements

During the 6-month accounting period ended 30 June 2026, there were no operations that materially affected the indicators on the Company's interim financial statements.

1.6. Corporate Structure

As at 30 June 2026, the Company had the following dependent subordinate units without legal status:

Subordinate Unit	Address	Principal Business Activity
Ho Chi Minh Office	No. 85/2 Nguyen Huu Dat, Tay Thanh Ward, Ho Chi Minh City	Transactions and market development work
Hanoi Branch	Office 2B, 3rd Floor, Tower B, Greenpearl Building, 378 Minh Khai, Hai Ba Trung Ward, Hanoi	Pump trading

1.7. Statement of Comparability of Information in the Interim Financial Statements

The figures presented in the interim financial statements for the 6-month period ended 30 June 2026 are comparable with the corresponding figures of the prior period.

2. BASIS OF PREPARATION OF INTERIM FINANCIAL STATEMENTS AND ACCOUNTING PERIOD

2.1. Basis of Preparation of Interim Financial Statements

The accompanying interim financial statements are presented in Vietnamese Dong (VND), under the historical cost principle and in accordance with Vietnamese accounting standards, the Vietnamese corporate accounting regime, and legal regulations relating to the preparation and presentation of interim financial statements.

The accompanying interim financial statements are not intended to reflect the interim financial position, interim results of operations, and interim cash flows in accordance with accounting principles and practices generally accepted in countries other than Vietnam.

2.2. Going Concern Assumption

There are no significant events causing major doubt about the going concern assumption, and the Company has neither the intention nor the compulsion to cease its operations or to substantially scale down its operations.

2.3. Financial Year

The Company's financial year begins on 1 January and ends on 31 December annually.

2.4. Application of New Guidance on Corporate Accounting Regime

On 27 October 2025, the Ministry of Finance issued Circular No. 99/2025/TT-BTC guiding the Corporate Accounting Regime ("Circular 99"). Circular 99 replaces the previous guidance on the corporate accounting regime under Circular No. 200/2014/TT-BTC dated 22 December 2014 ("Circular 200") and circulars amending and supplementing Circular 200. Circular 99 takes effect from 1 January 2026 and applies to financial accounting periods beginning on or after 1 January 2026.

The Company has applied the relevant requirements of Circular 99 on a prospective basis from 1 January 2026, except where otherwise stipulated by Circular 99.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

3.1. Accounting Estimates

The preparation of the interim financial statements in compliance with Vietnamese accounting standards, the Vietnamese corporate accounting regime, and relevant legal regulations on the preparation and presentation of interim financial statements requires the Board of Management to make estimates and assumptions that affect the reported figures for assets, liabilities, and the presentation of contingent assets and liabilities as at the interim financial statements date, as well as the reported figures for revenue and expenses throughout the financial year. Although accounting estimates are made with all of the Board of Management's best knowledge, actual results may differ from these estimates and assumptions.

3.2. Foreign Currency Transactions

Foreign currency translations are performed at actual transaction rates consistent with the nature of the transactions and regulations under Circular 99 and prevailing accounting standards. Tax obligations related to foreign currency transactions are executed in accordance with tax laws.

Actual transaction rate: The actual transaction rate chosen at the transaction date is the average transfer buy-sell rate (or an approximation rate where the variance does not exceed +/-1% compared to the average transfer buy-sell rate) of the commercial bank where the Company regularly transacts. The use of an approximation rate must ensure it does not materially affect the financial statements.

Exchange rates chosen for accounting exchange rate differences arising during the period: Foreign currency transactions are translated at the actual transaction rates at the transaction dates or at the rates specified in contracts (if any). Prepayments and advances received are recorded at the rates at the date of payment. Monetary items, receivables, payables, and owner's equity items are recorded at the rates at the dates of transaction and applied consistently for both Debit and Credit sides.

Exchange rates when revaluing foreign currency-denominated monetary items: At the end of the accounting period, the Company revalues the balances of foreign currency-denominated monetary items at the actual transaction rates at the financial statements date, which are the average transfer buy

and sell rates of the bank where the Company regularly transacts. For foreign currency deposits, the revaluation rate is determined based on the rate of the bank where the Company holds its account.

Foreign exchange differences arising during the period from foreign currency transactions are recognized in financial revenue or financial expenses. Foreign exchange differences arising from the revaluation of foreign currency-denominated monetary items at the end of the accounting period are determined on a net basis between gains and losses and are recognized in the profit or loss.

3.3. Cash and Cash Equivalents

Cash and cash equivalents comprise cash on hand, demand deposits, and short-term investments that are highly liquid, readily convertible to known amounts of cash, and subject to an insignificant risk of changes in value.

3.4. Financial Investments

Held-to-maturity investments

Held-to-maturity investments include investments that the Company has the intention and ability to hold until maturity. Held-to-maturity investments include: term bank deposits (including bills and promissory notes), bonds, preference shares which the issuer is required to buy back at a certain time in the future, and other held-to-maturity investments.

Held-to-maturity investments are recognized from the purchase date and initially measured at purchase price plus transaction-related costs. Interest income from held-to-maturity investments after the purchase date is recognized in the interim statement of profit or loss on an accrual basis. Interest earned prior to the date the Company holds the investments is deducted from the cost at the purchase date.

Held-to-maturity investments are measured at amortized cost less provision for doubtful debts.

Provision for doubtful debts of held-to-maturity investments is made in accordance with prevailing accounting regulations.

3.5. Receivables

Receivables reflect the Company's rights to demand payment or economic benefits from counterparties arising from completed transactions. Receivables are determined at historical cost and monitored in detail by counterparty and term. At the end of the accounting period, receivables are presented at historical cost net of provisions for doubtful debts (if any) that have been made.

Receivables are classified as short-term or long-term based on their nature and the expected recovery period of not more than or more than 12 months from the end of the accounting period.

The Company's receivables include:

Trade receivables, which are debts arising from revenue from sales of products, goods, provision of services, and other transactions with customers.

Other receivables, which include receivables arising outside sales, service provision, and internal relationships, such as shortages of assets awaiting processing, interest receivable on term deposits, compensations, payments made on behalf of third parties, collections on behalf of third parties, and other receivables under regulations. For other receivables of material value, the Company monitors and discloses detailed information regarding transaction nature, value, timing, payment/recovery terms, overdue status (if any), and related terms in accordance with prevailing regulations.

Provision for doubtful debts is made for each overdue receivable based on the overdue aging of debts or expected losses, or for receivables where debtors are unlikely to pay due to liquidation, bankruptcy, or similar difficulties.

3.6. Inventories

Inventories comprise assets purchased for production or for sale in the ordinary course of production and business, including: raw materials, materials, tools, instruments, work-in-progress, finished goods, and merchandise.

Inventories are stated at the lower of cost and net realizable value. Cost of inventories comprises direct materials, direct labor, and manufacturing overheads (if applicable) incurred in bringing the inventories to their present location and condition.

The value of inventories is calculated using the weighted average method and accounted for using the perpetual inventory method.

Net realizable value is determined as the estimated selling price less the estimated costs necessary to make the sale.

Provision for devaluation of inventories is made in accordance with prevailing accounting regulations. Accordingly, the Company is permitted to make provisions for obsolete, damaged, or substandard inventories, and in cases where the historical cost of inventories is higher than the net realizable value at the end of the financial year.

3.7. Tangible Fixed Assets

Tangible fixed assets are stated at historical cost less accumulated depreciation.

The historical cost of a tangible fixed asset acquired through purchase comprises its purchase price and all other directly attributable costs bringing the asset to a ready-for-use state. For tangible fixed assets formed from capital construction investment under contractor-appointment or self-construction and production methods, the historical cost is the finalized cost of the construction project in accordance with current regulations on investment and construction management, other directly related costs, and registration fees (if any). In cases where a project has been completed and put into use but its finalization has not been approved, the historical cost of the fixed asset is recognized at a provisional price based on actual costs incurred to acquire the tangible fixed asset. The provisional cost will be adjusted according to the finalized price approved by competent authorities.

Depreciation

Depreciation is provided on a straight-line basis over the estimated useful lives in accordance with Circular No. 45/2013/TT-BTC dated 25 April 2013, as amended and supplemented by Circular No. 147/2016/TT-BTC dated 13 October 2016 and Circular No. 28/2017/TT-BTC dated 12 April 2017 guiding the management, use, and depreciation of fixed assets, specifically as follows:

	<u>Number of Years</u>
Buildings and structures	05 - 25 years
Machinery and equipment	04 - 08 years
Office equipment	03 - 08 years
Means of transportation	05 - 10 years

Disposal and Liquidation

Gains or losses arising from the disposal or liquidation of an asset represent the difference between the proceeds from disposal and the disposal expenses, and are recognized in the interim statement of profit or loss.

3.8. Intangible Fixed Assets

Intangible fixed assets are stated at historical cost less accumulated amortization.

The historical cost of an intangible fixed asset comprises all costs incurred by the Company to acquire the asset up to the date it is ready for use. Costs related to intangible fixed assets incurred after initial recognition are recognized as production and business expenses in the period, unless these costs are associated with a specific intangible fixed asset and increase the economic benefits from these assets.

When an intangible fixed asset is sold or liquidated, its historical cost and accumulated amortization are written off, and any resulting gains or losses from liquidation are recognized in income or expenses for the year.

The Company's intangible fixed assets include:

Land Use Rights

Land use rights comprise all actual costs incurred by the Company directly related to the land used, including: payments to acquire land use rights, site clearance and compensation expenses, land leveling expenses, registration fees, etc.

The Company's land use rights are indefinite-term land use rights and are therefore not amortized.

Site Clearance and Compensation Costs

Site clearance and compensation costs related to the formation of the Phase II site are amortized on a straight-line basis over 16 years.

Computer Software

Costs related to computer software programs that are not an integral part of the related hardware are capitalized. The historical cost of computer software is the total cost incurred by the Company up to the date the software is put into use. Computer software is amortized on a straight-line basis over 2 to 5 years.

Trademarks and Trade Names

The historical cost of trademarks and trade names comprises trademark and trade name registration fees and other related costs eligible for capitalization. Trademarks and trade names are amortized on a straight-line basis over 3 years.

3.9. Construction in Progress

Assets under construction for production, rental, management purposes, or for any other purposes are stated at historical cost. This cost includes necessary costs to form the assets in accordance with the Company's accounting policy. Depreciation of these assets commences when the assets are ready for their intended use.

3.10. Prepaid Expenses

Prepaid expenses comprise expenses incurred that service production and business activities for multiple periods, such as tools and instruments, periodic repair and maintenance expenses of fixed assets, and other expenses that do not qualify for recognition as fixed assets.

Tools and Instruments

Tools and instruments put into use are allocated to expenses on a straight-line basis with an allocation period of not exceeding 03 years.

Other Expenses

Other expenses are allocated to expenses on a straight-line basis with an allocation period based on estimated useful lives.

3.11. Liabilities

Liabilities are recognized when the Company has a present obligation arising from past transactions or events, and the settlement of such obligation is expected to result in an outflow of economic resources. Liabilities are recognized when the obligation is probable and its value can be measured reliably.

At the end of the accounting period, liabilities are classified as short-term or long-term based on the remaining term of payment obligations under current accounting standards and regimes.

Liabilities must be monitored in detail by counterparty, payment term, type of foreign currency payable, and other factors according to the management needs of the enterprise, and implemented in accordance with the following principles:

Trade payables reflect the Company's payment obligations to suppliers of goods and services and related parties under contracts. These items are monitored in detail by counterparty, including advances to suppliers. Discounts and rebates (if any) are accounted for separately under regulations.

Other payables reflect non-commercial payables and obligations not arising directly from the purchase and sale of goods or provision of services, including: social insurance, health insurance, unemployment insurance, and trade union fees payable; shortages of assets awaiting processing; deposits and collateral received; unearned revenue; and collections on behalf of third parties. These items are monitored in detail by counterparty and payable content.

3.12. Dividend and Profit Payables

Dividend and profit payables reflect the dividends and profits that the Company is obliged to pay to shareholders and capital-contributing members in cash or other assets pursuant to profit distribution resolutions/decisions and prevailing legal regulations. The payable is recognized when the Company incurs the payment obligation and no longer has the right to avoid payment to shareholders.

3.13. Principles for Recognizing Accrued Expenses

Accrued expenses reflect expenses actually incurred or certain to be incurred relating to production and business activities in the period but lacking sufficient documents, unpaid, or not yet due at the financial statement date, recognized on the matching principle between revenue and expenses to ensure expenses are recorded in the correct accounting period. The accrual of expenses must have reasonable and reliable evidence and be calculated to match estimated actual expenses to be incurred.

Accrued expenses include items such as accrued loan interest and other accrued expenses related to the production and business activities of the enterprise, excluding provisions for liabilities.

3.14. Borrowings and Finance Lease Liabilities

The Company's borrowings and finance lease liabilities comprise short-term borrowings, long-term borrowings, bank loans, and loans from related parties serving the Company's production, business, and investment activities. Borrowings and finance lease liabilities are recognized at the actual amounts received and remaining payable excluding borrowing costs, and are monitored in detail by lender, loan agreement, loan term, and loan currency.

Borrowings and finance lease liabilities with a remaining repayment term of more than 12 months from the end of the accounting period are classified as long-term borrowings and finance lease liabilities. Those with a remaining repayment term of 12 months or less, or where the Company does not have an unconditional right to defer settlement for at least 12 months from the end of the accounting period, are classified as short-term borrowings and finance lease liabilities.

3.15. Borrowing Costs

Borrowing costs are recognized as production and business expenses in the year in which they are incurred, except where they are capitalized in accordance with Vietnamese Accounting Standard No. 16 "Borrowing Costs". Accordingly, borrowing costs directly attributable to the acquisition, construction, or production of assets that take a substantial period of time to get ready for their intended use or sale are added to the cost of those assets until such assets are ready for their intended use or sale. Income earned from the temporary investment of specific borrowings is deducted from the cost of the related assets. For specific borrowings serving the construction of fixed assets and investment properties, loan interest is capitalized even if the construction period is less than 12 months.

3.16. Owner's Equity

Owner's investment capital is recognized according to the actual capital contributed by shareholders.

3.17. Profit Distribution

Undistributed earnings reflect the results of business operations after corporate income tax and the distribution of profits or treatment of losses of the Company in accordance with legal regulations and the Company's Charter.

Profit distribution is carried out on the basis of the Company's undistributed earnings after considering the financial position, cash flows, and restrictions under legal regulations, the Company's Charter, and resolutions of the General Meeting of Shareholders.

When distributing profits, the Company considers the impact of non-monetary items that may affect the ability to pay dividends or profits, including gains from revaluing assets contributed as capital, revaluing foreign currency-denominated monetary items, revaluing financial instruments, and other non-monetary items.

3.18. Recognition of Revenue and Income**Revenue from Sales of Goods and Finished Goods**

Revenue from sales of goods and finished goods is recognized when all of the following conditions are satisfied:

- The Company has transferred to the buyer the significant risks and rewards of ownership of the goods or products.
- The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.

- The amount of revenue can be measured reliably.
- It is probable that the economic benefits associated with the transaction will flow to the Company.
- The costs incurred or to be incurred in respect of the transaction can be measured reliably.

Revenue from Provision of Services

Revenue from the provision of services is recognized when the outcome of the transaction can be estimated reliably. Where services are performed in multiple periods, revenue recognized in the period is based on the stage of completion of the transaction at the end of the accounting period. The outcome of a service provision transaction can be estimated when all of the following conditions are satisfied:

- The amount of revenue can be measured reliably.
- It is probable that the economic benefits associated with the transaction will flow to the Company.
- The stage of completion of the transaction at the end of the financial year can be measured reliably.
- The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

Financial Income

Interest income: Interest income is recognized on an accrual basis, determined based on the balances of deposit accounts, loans granted, and the actual interest rate for each period.

3.19. Cost of Sales and Provision of Services

Cost of sales comprises the cost of products, goods, and services provided during the year and is recognized in matching with revenue consumed during the year. Abnormal wastage of direct materials, labor costs, and fixed manufacturing overheads not allocated to the value of products put into storage must be recognized immediately in cost of sales (after deducting compensations, if any) even if the products and goods have not yet been determined as consumed.

3.20. Financial Expenses

Financial expenses comprise expenses and losses arising from financial activities, including: borrowing costs not capitalized under regulations; losses incurred upon selling foreign currencies; foreign exchange losses; and other financial expenses.

Financial expenses are recognized in detail for each expense category when actually incurred in the period and measured reliably with sufficient evidence.

3.21. Selling Expenses and General and Administrative Expenses

Selling expenses reflect actual expenses incurred in the process of consuming products, goods, and providing services of the Company. Selling expenses comprise sales staff costs; material and packaging costs; tools and instruments costs; depreciation of fixed assets belonging to the sales department; product, goods, and project warranty costs; outsourced service costs (advertising, marketing, transportation, sales commissions); and other cash expenses.

General and administrative expenses: Reflect general management expenses of the entire enterprise. General and administrative expenses comprise management staff costs (salaries, contributions based on salaries, insurance); office material costs; tools and instruments costs; depreciation of fixed assets used for management; taxes, fees, and charges (license tax, land rental not qualifying for capitalization); provision for doubtful debts; outsourced service costs; and other cash expenses belonging to the office department.

Recognition principles: Selling expenses and general and administrative expenses are recognized in the statement of profit or loss in accordance with the matching principle and accrual basis at the time they are incurred, independent of the actual time of cash disbursement. Expenses not considered reasonable and valid under the Law on Corporate Income Tax but supported by full accounting invoices and documents are still fully recognized in accounting expenses in the period and eliminated upon calculating corporate income tax.

3.22. Taxes

Corporate income tax expense represents the sum of current tax expense and deferred tax expense.

Current tax expense is based on taxable income for the year. Taxable income differs from profit before tax presented in the interim statement of profit or loss because taxable income excludes items of income or expense that are taxable or deductible in other years (including tax losses carried forward, if any) and also excludes items that are never taxable or deductible.

Deferred tax is computed on temporary differences between the carrying amounts of assets or liabilities in the interim financial statements and their tax bases and is recognized using the interim statement of financial position method. Deferred tax liabilities are recognized for all taxable temporary differences, while deferred tax assets are recognized only to the extent that it is probable that future taxable profits will be available against which temporary differences can be utilized.

The Company's determination of tax is based on current tax regulations. However, these regulations change periodically, and the ultimate determination of corporate income tax depends on the results of inspections by competent tax authorities.

Other taxes are applied in accordance with current tax laws in Vietnam.

3.23. Financial Instruments

Initial Recognition

Financial assets: At initial recognition, financial assets are recognized at historical cost plus transaction costs directly attributable to the acquisition of such financial assets. The Company's financial assets comprise cash, cash equivalents, trade receivables, other receivables, deposits, financial investments, and derivative financial instruments.

Financial liabilities: At initial recognition, financial liabilities are recognized at historical cost plus transaction costs directly attributable to the issuance of such financial liabilities. The Company's financial liabilities comprise trade payables, other payables, accrued expenses, finance lease liabilities, borrowings, and derivative financial instruments.

Subsequent Measurement

Currently, there are no regulations on the revaluation of financial instruments after initial recognition.

3.24. Related Parties

Parties are considered to be related if one party has the ability to control or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control or common significant influence.

In considering each possible related party relationship, attention is directed to the substance of the relationship, and not merely the legal form.

To: *The State Securities Commission;
Hanoi Stock Exchange*

Hai Duong Pump Manufacturing Joint stock company is a listed company on Hanoi Stock Exchange with the stock code CTB.

The Company would like to provide an explanation for the change in profit after corporate income tax presented in the reviewed Interim Financial Statements for the six-month accounting period ended 30 June 2026, as follows:

- Profit after corporate income tax for the first six months of 2026 was VND 29,974,215,554, representing an increase of 29.7% compared with the same period in 2025.
- The increase in profit after corporate income tax was mainly attributable to higher profit margins of products and goods sold during the period compared with the same period in 2025.

Respectfully. *nk*

Recipient:
