II. ACCOUNTING PERIOD AND ACCOUNTING CURRENCY

Accounting period: From January 1 to December 31.

Accounting Currency: Vietnamese Dong (VND)

III. STANDARDS AND APPLICABLE ACCOUNTING POLICIES

Applicable Accounting Policies:

The Company applies the Corporate Accounting System issued under Circular No. 99/2025/TT-BTC dated October 27, 2025, of the Ministry of Finance Statement of compliance with Accounting Standards and Accounting Policies

The Company has applied the Vietnamese Accounting Standards and the guiding documents issued by the State. The financial statements are prepared and presented in compliance with the provisions of each standard, the guiding circulars for implementing the standards, and the currently applied Accounting System.

Accounting method applied

The Company applies the Vouchers for book entry accounting method (using computer software) to record economic transactions.

IV. ACCOUNTING POLICIES APPLIED

1. Principles for recognizing cash and cash equivalents

Cash and cash equivalents include cash on hand, bank deposits, and short-term investments with a maturity period not exceeding three months that are highly liquid, easily convertible to a known amount of cash, and subject to an insignificant risk of changes in value.

Transactions arising in foreign currencies are converted into Vietnamese Dong at the actual exchange rate at the time of the transaction.

The actual exchange rate used to revalue monetary items denominated in foreign currencies at the time of preparing the financial statements is determined as follows:

- For items classified as assets: the average buying - selling exchange rate of the commercial bank with which the Company regularly transacts is applied

- For foreign currency deposits: the average buying - selling exchange rate of the bank where the Company holds the foreign currency account is applied.

- For items classified as liabilities: the average buying - selling exchange rate of the commercial bank with which the Company regularly transacts is applied.

2. Accounting policies for financial investments

Investments in subsidiaries, associates, and joint ventures under joint control

Investments in short-term securities

Other short-term and long-term investments

Method for setting up short-term and long-term provisions

3. Accounting policies for receivables

Receivables are presented in the separate financial statements at their carrying amounts, which represent the amounts receivable from customers and other receivables, net of provisions for doubtful debts.

4. Accounting policies for inventories

- Principles for inventory recognition

Inventories are recorded at historical cost. If the net realizable value is lower than historical cost, inventories are measured at the net realizable value. The historical cost of inventories includes purchase costs, processing costs, and other directly related costs incurred to bring the inventories to their current location and condition.

- Method for valuing inventories

- + The specific identification method is applied to rice, wheat flour, and raw materials.
- + The weighted average method is applied to goods and technology products.
- + The first in first out method is applied to finished products such as noodles, pasta, dry vermicelli, fresh vermicelli, and rice paper, to align with the production type and products of the enterprise.

- Method for accounting inventories

Inventories are accounted for using the perpetual method.

- Method for provisioning for inventory devaluation

The provision for inventory devaluation is made at the year-end and is the difference between the cost of inventories and their net realizable value when the historical cost is higher

5. Accounting policies for recognition and depreciation, amortization of fixed assets

Tangible fixed assets and intangible fixed assets are recognized at historical cost. During use, tangible and intangible fixed assets are recorded at their historical cost, accumulated depreciation, amortization, and net carrying amount.

Depreciation and amortization of fixed assets is calculated using the straight-line method over their estimated useful lives as follows:

Buildings and structures:	05 – 30 years
Machinery and equipment:	05 – 15 years
Transportation vehicles:	06 – 08 years
Office equipment and management tools:	03 – 08 years
Land use rights:	Indefinite useful life

6. Accounting policies for prepaid expenses

The calculation and allocation of long-term prepaid expenses to production and business expenses for each accounting period are based on the nature and magnitude of each type of expense to select a reasonable allocation method and criterion. Prepaid expenses are gradually allocated to production and business expenses using the straight-line method.

7. Accounting policies for dividends and profit distribution payable

Dividends payable to shareholders are recognized as payables in the Company's Balance Sheet after the Board of Directors declares the dividend and the Viet Nam Securities Depository and Clearing Corporation announces the record date for dividend entitlement.

8. Accounting policies for payables

Actual expenses that have not yet been incurred but are anticipated are accrued as payables in production and business expenses during the year. This ensures that when such expenses arise, they do not cause sudden spikes in production and business costs, while adhering to the matching principle between revenue and expenses. When the actual expenses are incurred, any difference between the accrued amount and the actual amount is adjusted by recording additional payables or reducing payables corresponding to the difference.

9. Accounting policies and methods for recognizing provisions for payables

Provisions for payables are recognized at the most reasonable estimate of the amount required to settle present obligations at the end of the financial year or interim period.

10. Accounting policies for owner's equity

Owner's contributed capital is recorded based on the actual capital contributions of the owners.

Foreign exchange differences: Transactions denominated in foreign currencies are accounted for at the actual exchange rate at the time of the transaction. At the financial year-end, monetary items denominated in foreign currencies (cash, bank deposits, receivables, and payables, excluding advances to suppliers and advances from customers, and deferred revenue) are revalued at the average buying - selling exchange rate of the commercial bank where the Company regularly transacts.

All actual exchange differences arising during the year and revaluation differences at year-end are recorded in the profit or loss of the fiscal year.

Undistributed after tax profit represents profits from the Company's operations after adjustments for retrospective application of changes in accounting policies or corrections of material errors from prior years.

11. Accounting policies and methods for recognizing revenue

Revenue from goods sales complies fully with the five conditions specified in Accounting Standard No. 14, "Revenue and Other Income".

Revenue from service rendering complies fully with the four conditions specified in Accounting Standard No. 14, "Revenue and Other Income."

Financial revenue complies fully with the two conditions specified in Accounting Standard No. 14, "Revenue and Other Income."

12. Accounting policies and methods for recognizing financial expenses

Financial expenses include:

- Expenses or losses related to financial investment activities.
- Costs of loans and borrowings;
- Losses due to exchange rate fluctuations from foreign currency transactions.
- Provisions for devaluation of trading securities.

These expenses are recognized as total amounts incurred during the period and are not offset against financial revenue.

13. Accounting policies and methods for recognizing current and deferred corporate income tax expenses

Deferred income tax assets are determined based on total deductible temporary differences and the unused tax losses and tax incentives carried forward to subsequent periods.

Deferred income tax assets are calculated using the current tax rate (or expected future tax rate if the reversal of deferred income tax assets falls within the period the new rate takes effect), based on applicable rates and tax laws in effect at the financial year-end.

Current corporate income tax expense is calculated based on taxable income and the current corporate income tax rate.

Deferred corporate income tax expense is calculated based on deductible temporary differences, taxable temporary differences, and the corporate income tax rate.
