Regarding the explanation of fluctuations
in after-tax profit Q3/2026 compared
to the same period last year

To: **Hanoi Stock Exchange.**

Based on Circular 96/2020/TT-BTC dated November 16, 2020, of the Ministry of Finance on guiding the disclosure of information on the securities market.

IDICO Investment Consulting Joint Stock Company explains the reasons for the fluctuation in after-tax profit in the Q3 2026 Business Performance Report, which increased by over 10% compared to the same period last year, as follows:

Profit after tax for the third quarter of 2026 reached VND 641,019,323, an increase of VND 238,940,317 (representing a rise of approximately 59.4%) compared to the VND 402,079,006 recorded in the third quarter of 2025. The primary reasons are as follows:

- Service revenue in the third quarter of 2026 increased by 22.5% year-on-year.
- Financial income for the period increased by 569.6% year-on-year, driven primarily by interest on deposits and profit distributions from business cooperation activities.
- Enterprise management expenses for the period decreased by 7.8% year-on-year.

The above is the explanation provided by IDICO Investment Consultancy Joint Stock Company regarding the fluctuations in profit after tax in the Statement of Profit or Loss for the third quarter of 2026, compared to the same period of the previous year.

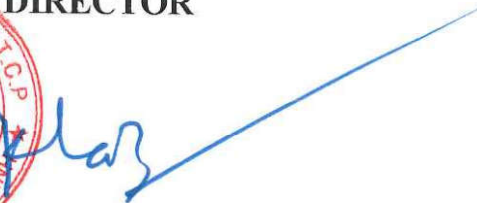

We look forward to your consideration and approval.

Recipient:

- As above; 
- Save HR.
